<sup>1</sup> Nine months.      <sup>2</sup> Not including exports of foreign produce.

## 3.—Movement of Coin and Bullion, fiscal years 1868-1934.

NOTE.—Up to 1919 "silver bullion in bars, blocks, ingots, drops, sheets and plates, unmanufactured" was included in "coin and bullion" but since that time it has been regarded as "merchandise". The figures from 1899 have been revised in accordance with the new arrangement.

| Fiscal Year.         | Total Imports. | Exports.   |             |             | Total Imports and Exports of Coin and Bullion. |

<sup>1</sup> No record of 1919 imports and exports.

#### 4.—Duties Collected on Exports, 1868-92, and on Imports for Home Consumption, 1868-1934, with Percentages of Expense of Collection to Gross Customs Revenue Collected, fiscal years 1868-1934.

NOTE.—Duties on exports were not collected after the year 1892. The figures in this table are the gross figures of duties collected; the net national revenue from customs taxation, because of the drawbacks paid where commodities on which duties have been collected are afterwards exported in a more highly manufactured state, is considerably smaller. For net customs revenue see statistics of revenue from customs duties, in the historical revenue table in Chapter XXI on Public Finance.

| Fiscal Year. | Duties Collected on Exports. | Duties Collected on Imports. | Percentage of Expense of Collection to Gross Customs Revenue. | Fiscal Year. | Duties Collected on Exports. | Duties Collected on Imports. | Percentage of Expense of Collection to Gross Customs Revenue. |

<sup>1</sup> In this classification the expression "Canadian Farm Products" refers, in the case of exports, to commodities actually produced, in their original state, on Canadian farms. In the case of imports, it covers all commodities of which the basic raw materials are such as Canadian farms produce. "Foreign Farm Products" covers, in both imports and exports, materials or commodities such as Canada does not produce in their original forms, e.g., cane sugar, tea, rubber, cotton, silk, etc.

**17.—Values of Total Exports, Imports Entered for Consumption, and Duties Collected Thereon, at Certain Ports and by Provinces, fiscal years ended Mar. 31, 1933 and 1934.**

NOTE.—The values of imports and exports at the several ports of entry given in the following table indicate that merchandise of the value stated was entered inwards, or passed outwards, at the ports mentioned, but it is not to be inferred that the imports were all for consumption at such ports or that the exports originated there.

| Province and Port.                            | 1933.              |                          |                   | 1934.              |                          |                   |

### Subsection 10.—Comparison of the Volume of Imports and Exports.\*

The statistics of the external trade of Canada have not, until lately, been analysed in detail to reveal the physical volume of external trade as well as the dollar value of that trade, and have therefore been somewhat misleading when used to show the physical growth of production and external trade. When, for example, Table 1 of this chapter is examined, it seems to show stagnation in our external trade between the early 70's and the middle 90's of last century and a very rapid growth thereafter. Yet we know that the apparent stagnation was partly due to the fall in general prices between the '70's and the middle '90's, while the rapid growth of the later figures is exaggerated by the rise of prices after 1897, especially in the war period, 1914 to 1921. Since 1929 another precipitate decline in prices has exaggerated the actual decrease of trade. Thus the figures as published give us no true measure of the *volume* of our external trade, yet, of the commodities that satisfy human needs, it is the volume rather than the value with which the masses of the population are more intimately concerned. Volume is, from many points of view, a more important consideration than value, and it is desirable to secure a record of the fluctuations in the volume of the country's trade as distinguished from the value thereof. This is what is attempted in Table 22.

The method adopted for ascertaining the fluctuations in volume has been to take a base year—1926—and to revalue the quantities of each commodity imported or exported in any given year at the average import or export value of that commodity in the standard or base year. Where quantities are not available, the values of items are assumed to have moved in the same direction and in the same proportions as closely related commodities. For this reason the results must not be regarded as of great precision but, since the value of goods not returned by quantity and of those not comparable over a limited series of years is small in comparison with the total trade, the amount of error introduced on their account is inconsiderable. By this method it is comparatively easy to compare the volume of the trade in a particular year with that in a recent year and the margin of error is fairly small. When, however, a comparison of the volume of trade in a particular year with that of another year ten or more years before is undertaken, the margin of error is very much greater. Certain new commodities have come into existence in the course of the decade, while the qualities of others have been materially changed; further, various new items have been added to the customs classifications, and it is not always possible to say just what customs items of 1934 correspond with those of 1914. For these reasons comparisons with the pre-war fiscal year ended 1914 have been discontinued since 1929. This comparison for 1929 and certain previous years appeared on pp. 581–583 of the 1930 Year Book.

In Table 22 the values and volumes of imports and exports respectively for the years 1929 to 1934 are compared with 1926, for the main groups, as follows: the imports and exports are first shown at the values at which the trade was recorded; the same imports and exports are then shown at the value they would have had if the average price or unit value had been the same in each year as it was in 1926. In other words, the figures on the basis of 1926 average values enable a comparison to be made of the imports or exports for the given years on the basis of variations in quantity only, variations due to different prices having been eliminated. Index numbers of declared values, that is, the total declared values of the imports or exports in each year expressed as percentages of 1926, are then given. These are

\*Further information as to the methods adopted in making the following analyses will be found on p. 804 of the Annual Report on the Trade of Canada for the fiscal year ended Mar. 31, 1934, published by the Dominion Bureau of Statistics.

followed by the index numbers of average values, which show the prices at which goods were imported or exported in each year expressed as percentages of the prices in 1926. Finally, the index numbers of physical volume show the relative quantity of merchandise imported or exported in each year expressed as a percentage of the quantity of the same merchandise in 1926.

For an analysis in greater detail, dealing similarly with sub-groups and principal commodities imported and exported, the reader is referred to pp. 803-817 of the Annual Report on the Trade of Canada for 1934, published by the Dominion Bureau of Statistics.

The physical volume of imports has been fairly well maintained throughout the depression in those groups comprising goods which enter more or less directly into consumption, such as vegetable products and textiles, while the volumes of imported chemicals and non-metallic minerals (chiefly petroleum products and coal) were higher in 1934 than 1926. On the other hand, the volume of imports of lasting or capital goods, largely comprised within the iron, non-ferrous metal and wood products groups, was at a very low level in the two latest years shown.

In the second half of Table 22 the volume of exports in 1934 of farm products, comprising both the vegetable and animal groups, are shown to be only about two-thirds those of the base year 1926. Exports of wood and paper products (another important group in the Canadian economy) recovered in 1934 to nearly 90 p.c. of the volume of the base year. However, of the four groups of major importance to the prosperity of Canada, the best showing was made by non-ferrous metals with a volume of exports in 1934 amounting to 165 p.c. of those of 1926. Furthermore, if the product of the chief branch of Canadian mining enterprise—namely, gold mining—had been included in the non-ferrous metal exports, instead of being treated as bullion and excluded from the commodity groups altogether, the exports of non-ferrous metals would have shown a still greater volume.

**Section 4.—The Tourist Trade of Canada.\***

**Tourist Expenditures in Canada.**—In recent years the tourist trade has become an important source of revenue in certain sections of the Dominion, materially affecting the balance of trade. It represents the economic disposition of national assets in which Canada is particularly rich, namely: its picturesque scenery; its invigorating climate; its opportunities for hunting, fishing and boating, as well as for winter sports—for the exploitation of which a considerable capital expenditure has been made on hotel accommodation, improved highways and other attractions. Those entering from the United States in automobiles are by far the most important class of tourists. The business accruing to the Dominion in this manner represents some return for expenditures on highways which have been very large in the period since the War (see pp. 733-736). In order to attract this traffic, highways have been built through regions of picturesque scenery, such as the Rocky Mountains, northern Ontario, and the Laurentians and Gaspé in Quebec. A further asset for Canada arises from the fact that these scenic regions with their invigorating climate

\*Abridged from "The Tourist Trade in Canada, 1920-26", and reports for each year from 1927 to 1933 inclusive, published by the Dominion Bureau of Statistics and obtainable on application. These reports contain a full explanation of the methods used in making the estimates.

are at their best in the summer holiday season when motorists are most ready to travel. The expenditure of travellers coming to Canada from other countries on business has the same effect, so far as its influence on the balance of trade is concerned, as the export of additional commodities would have. Indeed, in so far as commodities are sold to tourists travelling in the Dominion, our exportable surplus of such commodities is reduced.

It is impossible to obtain a direct record of expenditures of this kind. Moreover, even a rough estimate of the total is extremely difficult to make, visitors to Canada being of all classes, engaging in widely different activities or forms of recreation, remaining for varying periods, with expenditures undoubtedly ranging from very small to very large amounts.

The tourists who enter Canada may be divided into three classes: (a) those coming in *via* ocean ports; (b) those entering from the United States in automobiles; (c) those entering from the United States by rail or steamer. In 1933 these classes are estimated to have expended in Canada \$7,763,000, \$72,196,000 (equivalent to \$77,250,000 in Canadian funds at average rates of exchange for the period) and about \$29,460,000 (\$32,111,000 in Canadian funds) respectively, or a grand total of approximately \$109,419,000 (about \$117,124,000 in Canadian funds).

The Department of National Revenue records the number of tourists entering Canada in automobiles from the United States through each of the ports of entry along the border. An estimate of the expenditure of tourists of this class in 1933, according to the provinces by which they entered, is as follows: Maritime Provinces, \$43,986,000; Quebec, \$17,773,000; Ontario, \$48,920,000; Manitoba, \$828,000; Saskatchewan, \$410,000; Alberta, \$349,000, and British Columbia \$4,984,000.

**Expenditures of Canadian Tourists Abroad.**—Canadian tourists visiting other countries travel in the main to the British Isles and other European countries on visits home, or as sightseers. Again, many of them, especially elderly or delicate persons, go to Florida, Bermuda or the West Indies. These tourists may be classified in the same three classes as those entering Canada. The total expenditures of such Canadian tourists in other countries were \$50,860,000 in 1933—a decline of \$6,543,000 from the previous year.

**Summary.**—For the years 1924 to 1933 the total estimated expenditures of tourists from other countries in Canada, as compared with those of Canadian tourists in other countries, are given in Table 23.

23.—Tourist Expenditures in Canada and of Canadians Abroad, 1924-33.

<sup>1</sup> Converted into Canadian funds at average rates of exchange for the period.

Until the depression made itself felt in 1930, there was a steady increase in the amounts spent both by tourists from other countries in Canada and by Canadians in other countries. During the years 1930-32 the tourist trade, in spite of successive declines, exhibited a surprising vitality as compared with the generally depressed state of trade and industry. In each of these years the expenditures of tourists in Canada (and in the latter two the balance after deducting the corresponding expenditures of Canadians in foreign countries) constituted an "invisible" export of greater value than any single commodity exported. A marked contraction in both volume of travel and tourist expenditures occurred in 1933, reflecting the cumulative effects of the low level of economic activity in recent years, the general lowering of incomes and the intensification of "depression" psychology. Data at present available indicate a fairly substantial increase in tourist revenues in 1934.

### Section 5.—Balance of International Payments 1920-32.\*

"Balance of Trade" figures are frequently misinterpreted owing to the persistence of the doctrine long ago exploded that a nation's trade is necessarily in a healthy state when exports exceed imports, necessitating an import of gold to make up the difference. Trade was then said to show a "favourable" balance. This theory only took account of the "visible" or commodity items of trade, whereas the true balance of a nation's trade can only be known when not only the commodity items are considered, but also the "invisible" items such as interest, freight, immigrant remittances, financial services, tourist traffic, etc. In short, all debit and credit transactions must be set down in order to find out the true balance. If all the visible and invisible items are thus tabulated the debit or credit difference will be a final invisible item—capital import or export—and this will bring the nation's trade account into a state of balance. Thus, the commodity trade balance of a country cannot be understood by itself but only as it is interpreted in the light of the invisible items of a country's international transactions. In the light of such data, it will be found that a so-called favourable or unfavourable balance will mean an entirely different thing at different times in a country's history. The balance of international payments, which takes account not only of commodity trade but of all transactions, reveals the meaning of the trade balance. It shows, for example, that in 1920, 1921 and 1922 our international accounts were balanced by large imports of capital, although our commodity trade balance was favourable in 1920 and 1922. During these years Britain repaid us war funds as follows: 1920, \$104,000,000; 1921, \$128,000,000; 1922, \$84,000,000. From 1923-28, however, the international accounts show a credit balance after allowing for interest payments and maturities, thus denoting capital exports. In these years Canada became temporarily a capital-exporting country. In these latter years, therefore, the explanation of our favourable commodity trade balance was quite different from that for the period, 1894 to 1903, when it was explained by payments of interest and maturities.

From the foregoing it will be seen that an estimated balance of international payments is indispensable to the understanding of trade accounts. It has, however, a great many other important uses, among which the following may be mentioned: (1) to give a comprehensive picture of our international debits and credits and how they are balanced; (2) to show the extent of our international borrowings and lend-

\*Abridged from the annual report "Canada's Balance of International Payments", by Herbert Marshall, B.A., F.S.S., Chief of the Internal Trade Branch of the Dominion Bureau of Statistics. This report includes explanatory data on the methods followed in computing these statistics.

ings; (3) to show the magnitude of individual invisible items, such as interest, freights, tourist traffic, etc., in our international transactions; (4) to explain exchange disturbances and the effect of international financial difficulties; and (5) to furnish data for guidance in the formulation of international fiscal, financial and commercial policy.

As already stated, in the years from 1923 to 1928 Canada became temporarily a capital-exporting country. This was the result of abundant funds accumulating in the Dominion owing to three causes. In the first place, there had come into the country during the War about \$1,250,000,000 through the purchase of our commodities at high prices; this was seeking an investment outlet. In the second place, the large investment of United States capital in the Dominion from 1914 to 1920 was now increasing the nation's output. In the third place, successive large harvests at relatively high world prices were a foundation of prosperity. These factors combined, caused an unprecedented accumulation of savings, which was used by financial institutions and individuals not only to finance domestic capital needs, but also to avail themselves of opportunities for profitable investment abroad. The prolonged and extravagant "bull" market in the New York and other United States' stock exchanges culminating in the early summer of 1929, and the high interest rates prevailing in those markets, attracted enormous sums to the United States from other countries, including Canada. Thus from 1923 to 1928 we had on balance an export of capital to our credit, though at the same time other countries, particularly the United States, continued to invest large sums in the Dominion. In contrast to this there were unfavourable balances in 1929 and 1930, considering both visible and invisible items, of \$65,000,000 and \$159,000,000 respectively, while in 1931 the balance was favourable by about \$28,000,000. In the light of all available information, it appears that the balances in 1929 and 1930 represented a net movement of capital into Canada for investment, while those of 1931 and 1932 represented a net movement outwards. In the last-named year, however, the capital export appears to have been in the main not for investment but for the purpose of retiring maturing issues and for repurchases. A more detailed discussion of the balance of payments in these years will be found at pp. 600-601 of the 1933 Year Book.

In 1933 credit balances of \$146 million for commodities, \$92 million for gold, \$60 million for tourist trade, amounting in all to \$298 million, were more than sufficient to meet net debits of \$225 million for interest, \$15 million for freight, and \$9 million for exchange, totalling \$249 million. Minor invisible items showed a net debit of \$8 million. The total net credit, exclusive of capital, was approximately \$40 million which, plus a net credit of approximately \$62 million, representing capital inflow, makes a total of \$102 million for which no debit items appear. An error and omission estimate is therefore added to bring the two sides of the international accounts into balance.

In 1934 it will be noted that the debit for interest and dividend payments was \$230 million. Maturity payments were \$75 million. These two items together amount to \$305 million. Commodity, tourist and gold credit balances totalled \$323 million and these, less \$18 million, were required to meet the interest, dividends and maturities. The balance of \$18 million just about offset a freight deficit of \$21 million. Remaining debits amounting to \$10 million plus the \$48½ million debit for untraced items (errors and omissions) were balanced by sundry credits of \$6½ million plus capital credits on the sale and purchase of securities and direct investments.

Table 24 shows the preliminary estimates of the balance of international payments for 1933 and 1934. Figures for 1920-26 were given at pp. 601-602 of the 1929 Year Book, although these have since been somewhat revised in later estimates. Figures for 1927-28 will be found at p. 501 of the 1932 Year Book and those for 1929-32 at p. 601 of the 1933 Year Book.

#### 24.—Estimated Balance of International Payments, 1933 and 1934.

NOTE.—Figures for both years are preliminary.

## CHAPTER XVII.—INTERNAL TRADE.

This treatment of trade within the Dominion commences with a general statement on interprovincial trade. This is followed by sections dealing with the statistics of the grain trade and of the marketing of live stock and animal products. Statistics of cold storage facilities and of commodities in cold storage are next in order. In the latter part of the chapter will be found sections relating to various administrative services connected with trade, including: the payment of bounties; the granting of patents, copyrights and trade marks; and weights and measures, electricity and gas inspection. The concluding section of the chapter deals with the statistics of wholesale and retail merchandising collected at the Census of Distribution in 1930 and subsequently.

### Section 1.—Interprovincial Trade.\*

Canada may be divided into the following five economic regions, each deriving its specific character from the predominant occupations of its people:—

1. *The Eastern Fishing, Lumbering and Mining Region*, comprising the river valley and gulf of the St. Lawrence, together with the Atlantic coast; in other words, the greater part of the Maritime Provinces, the northern part of the province of Quebec (excluding the former district of Ungava), and a portion of northern Ontario.

2. *The Eastern Agricultural and Industrial Region*, comprising the cultivated portions of the Maritime Provinces and of the provinces of Quebec and Ontario. In the latter provinces the cultivated areas extend along the banks of the St. Lawrence and its tributaries.

3. *The Central Agricultural Region*, extending from the Red River valley to the Rocky mountains and from the Canada-United States boundary to about 56° N. lat.

4. *The Western Fishing, Mining and Lumbering Region*, comprising the western portion of the province of Alberta, the whole of British Columbia and the southern portion of Yukon.

5. *The Northern Fishing and Hunting Region*, extending from the regions of permanent settlement northwards, and from the boundary of Labrador to the Pacific and to the Alaskan Boundary. This vast region is sparsely inhabited by indigenous nomadic tribes engaged in fishing and hunting for their own support or for exchange with the fur-trading companies, and with individual whalers and traders who visit the region.

Great differences exist between the products of these various regions; even the fisheries and lumber products of the east are quite distinct from those of British Columbia. The needs of the people throughout the country are met to a great extent by the exchange of the products of one region for those of another.

Interprovincial trade in what is now Canada had its beginning, many years before Confederation, in the exchange of the furs and lumber products of Upper and Lower Canada for the fisheries and mineral products of the Maritimes. Indeed, it was thought at the time of Confederation that the coal fields of Nova Scotia would furnish sufficient fuel for the needs of all the eastern part of the Dominion. Later, manufacturers of Ontario and Quebec found markets from one end of the Dominion to the other in exchange for the farm, mineral and other products required by large urban communities and produced principally in western and northern regions. Thus the principle of comparative advantage is seen operating in the increased trade between the economic regions of the Dominion, a trade which is principally

\* Revised by G. S. Wrong, B.Sc., Chief of the Transportation Branch, Dominion Bureau of Statistics.

carried on over the railways of the country, but also largely over its waterways. A comparatively new development is the inauguration of sea transport between Eastern Canada and British Columbia *via* the Panama Canal. (See pp. 754-755.)

A monthly railway traffic report is published by the Transportation and Public Utilities Branch of the Dominion Bureau of Statistics showing, for each province and for the Dominion as a whole, the total *revenue* freight traffic of all railways (not the "on company service" freight), divided into 76 classes of commodities. The data also show the quantity of each class that originated and terminated in each province, and are of use in computing the imports and exports of each province for each of the 76 classes of commodities. These statistics show rail traffic only, a limitation which should be borne in mind in connection with the trade of provinces having water transportation. Summary figures for all commodities are given in Table 1.

The revenue freight traffic movement on the steam railways of Canada fluctuates to a certain extent with the yield of the crops and with activity in the mining and construction industries involving heavy movements of low-grade freight. The general trend from 1921 to 1928 was upward, increasing from 83,814,436 tons of freight carried in 1921 to 119,227,758 tons in 1928. In 1929, however, a decrease to 114,600,778 tons and in 1930 a further decrease to 95,833,228 tons were reported and, with the continued industrial depression, there have been still greater decreases to 73,837,245 tons in 1931, to 60,468,093 tons in 1932 and to 57,099,111 tons in 1933, but latest figures indicate a rise to 67,681,499 tons in 1934.

Statements similar to that in Table 1 may be compiled for any of the 76 commodities for which statistics are collected, showing the interprovincial trade by rail in these commodities. For details see "Summary of Monthly Traffic Reports of the Railways of Canada, 1933", obtainable from the Dominion Bureau of Statistics.

| British Columbia.....     | 2, 224, 317                                  | 2, 309, 759         | 3, 758, 897                       | 2, 900, 780         | 5, 983, 214                               | 5, 210, 539         |
| <b>Totals.....</b>        | <b>40, 704, 259</b>                          | <b>38, 139, 335</b> | <b>18, 390, 342</b>               | <b>18, 105, 771</b> | <b>59, 094, 601</b>                       | <b>56, 245, 106</b> |

<sup>1</sup>The freight originating and that terminating will not agree because that which originates within a certain year does not all terminate within the same year. On the other hand some which terminated in 1933, for instance, originated within the previous year.

## Section 2.—Grain Trade Statistics.\*

The Canada Year Book, 1922-23, contained on pp. 581-583, an historical summary of the more important points respecting the shipment, inspection and sale of Canadian grain under the Canada Grain Act, and an outline of the Canada Grain Act of 1925 appeared at p. 1017 of the 1925 Year Book. The 1929 amendments were dealt with at pp. 1047-1048 of the 1930 Year Book, and the Canada Grain Act, 1930, at p. 1101 of the 1931 Year Book.

**Movement of Canadian Wheat, Crop Year 1932-33.**—For a description of the wheat crop movement in this year the reader is referred to the "Report on the Grain Trade of Canada for the crop year ended July 31, 1933," which may be obtained from the King's Printer, Ottawa, at a price of fifty cents. A chart illustrating this movement will be found on p. 644 following.

\* Revised by Dr. T. W. Grindley, Chief, Agricultural Branch, Dominion Bureau of Statistics.

**Movement of Canadian Wheat, Crop Year 1933-34.**—A résumé of the Canadian wheat movement naturally begins with a description of the crop of the Western Inspection Division. The wheat crop of 1933 marketed in the Western Division during the crop year from Aug. 1, 1933, to July 31, 1934, amounted to 264.3 million bushels. A carry-over of 172.9 million bushels from the previous crop year, together with some minor items, brought the stock of the Western Division to a total for the year of 437.0 million bushels. As for distribution, 260.8 million bushels were commercially disposed of, the chief items of which were 75.3 million bushels exported to the United Kingdom and 101.5 million bushels shipped to the Eastern Division. The direct exports to the United States were only 117 thousand bushels and to other countries 20 million bushels. The total shipments from the Western Division were thus 215.4 million bushels. The wheat used by the milling companies for the manufacture of flour amounted to about 17.1 million bushels, of which 12.7 million bushels were ground into flour for domestic consumption. The all-rail movement eastward from the Western Division, including shipments to the Ogilvie Flour Mills Co. at Fort William for grindings, was 201 thousand bushels. Lake shipments from Fort William and Port Arthur were 145.9 million bushels,

1932 - 1933

Scale of miles

0 100 200 300 400 500

100.7 million bushels going to Canadian ports and 45.2 million to United States' ports. The shipments to Canadian and U.S. ports represented, respectively, a decrease of 21.1 p.c. and a decrease of 14.4 p.c. from 1932-33. The principal Canadian lake ports were those of lake Huron and Georgian bay, with receipts of 25.7 million bushels, and Port Colborne with 19.8 million bushels. Among the United States' lake ports, Buffalo was of chief importance in the handling of Canadian wheat, with receipts by water from Port Arthur and Fort William of 40.8 million bushels. The export of wheat through Vancouver was 45.4 million bushels, as compared with 96.4 million in the previous crop year; 2.8 million bushels were exported through New Westminster, and 2.7 million from Churchill. The seed requirements were estimated at 29.2 million bushels, feed for livestock and poultry at 9.3 million bushels, and the stocks at the end of the crop year were 158.6 million bushels.

The Eastern Division received during the crop year not only the eastern crop, estimated at 17.5 million bushels, but also shipments from the West aggregating 101.5 million bushels. The quantity on hand at the beginning of the crop year was 38.8 million bushels, making, with a comparatively small importation from the United States, a total stock entering the Eastern Division of 158.1 million bushels. The distribution included 35.3 million bushels carried over in store into the following year, 66.6 million bushels exported from the St. Lawrence ports, and 7.7 million bushels shipped through the winter ports of Saint John and Halifax. In addition, 44.6 million bushels were cleared for export to the United Kingdom and other countries *via* the United States' Atlantic ports. The chief ports concerned with the movement of Canadian grain from both Divisions were New York, Albany, Boston and Portland.

Total exports from Canada to the United States for consumption amounted to 218,814 bushels, to the United Kingdom 114.8 million bushels, to other countries 55.1 million bushels; 127.6 million bushels were shown to be shipped *via* Canadian ports and 42.3 million bushels *via* United States' ports, after deducting 2.3 million bushels transhipped from Buffalo to Montreal and adding the same to the Canadian movement. Total exports of wheat from Canada during the crop year amounted to 170.2 million bushels.

Table 3 shows, for the licence years 1933 and 1934, the number of railway stations at which elevators are placed, the number of elevators and their total storage capacity, the figures being given by provinces for each class of elevator, with a summary showing the total of all elevators for each province. The growth of Canadian elevators in number and capacity has accompanied the expansion of grain acreage in the present century. Canadian elevators in 1901 numbered 426 with a capacity of 18,329,352 bushels; in 1911 these had increased to 1,909 elevators and 105,462,700 bushels; and totals of 3,855 elevators and 231,213,620 bushels were reached in 1921. Further increases in the past few years have resulted in a total of 5,901 elevators with a capacity of 419,592,660 bushels in 1934.

Table 4 gives summary statistics of the inspections of grain for 1931-34, detailed statistics given in previous Year Books being omitted to save space. The latter may be found in the Reports on the Grain Trade of Canada.\* Tables 5 and 6 show the shipments of grain by vessel and rail for 1933 and 1934.

Tables 7 and 8 deal with the Canadian grain handled in recent years at Eastern elevators, while Tables 9 and 10 show the average cost of delivering a bushel of wheat from the Canadian wheat producer to British ports, by both the Atlantic and Pacific routes.

\* The latest report is for the crop year ended July 31, 1934, and may be obtained from the Dominion Statistician.

**2A.—Summary of the Distribution of Canadian Grain, crop year ended  
July 31, 1934.**

**Flour-Milling in 1933.**—The flour and grist mills industry in Canada in 1933 showed an increase of 38 mills over 1932, but their capacity was reduced by 15,253 barrels of flour a day from the 1932 figure. Their capital investment was \$59,054,505. The mills were distributed by provinces as shown in Table 11. Statistics of the employees, value of products, etc., for both flour and feed mills, for the latest year available will be found in Table 7 of the chapter on manufactures, p. 462 of this volume.

<sup>1</sup>Two chopping mills included with flour mills.

## Section 3.—Marketing of Live Stock and Animal Products.\*

The estimated value of farm live stock and poultry in Canada in 1933 was \$436,591,000, or 103·4 p.c. of the value of field crops grown during the year. In 1932 the value of farm live stock and poultry was \$409,860,000 or 98·4 p.c. of the value of field crops during that year. In gross value of product the slaughtering and meat-packing industry, which is dependent chiefly on animal husbandry for its materials, has during recent years been one of the most important single manufacturing industries in Canada.

The Canada Year Book, 1922-23, contained on pages 594-595 a brief historical description of the development and present position of the live-stock industry in the Dominion, with statistics of farm animals compiled from the decennial censuses, 1871 to 1921. A summary of this data, with the addition of figures for 1931, is given in Table 12.

\*Revised by Dr. T. W. Grindley, Chief, Agricultural Branch, Dominion Bureau of Statistics. For more detailed information on this subject see "Live Stock and Animal Products Statistics", published annually by the Dominion Bureau of Statistics, also "Live Stock Market and Meat Trade Review", published annually by the Live Stock Branch of the Dominion Department of Agriculture. See also the material in Chapter VIII under the heading "Farm Live Stock and Poultry".

**12.—Animals in Canada and Animals Killed or Sold by Farmers in Canada, by census years, 1871-1931.**

| 1901.....               | 5,576,451            | 2,510,239 | 2,353,828 | 1,086,353                             | 1,329,141              | 2,497,636              | 10,657,597 |
| 1911 <sup>2</sup> ..... | 6,526,083            | 2,174,300 | 3,634,778 | 1,752,792 <sup>3</sup>                | 949,039 <sup>3</sup>   | 2,771,755 <sup>3</sup> | 6,933,955  |
| 1921 <sup>3</sup> ..... | 8,519,484            | 3,203,966 | 3,404,730 | 1,616,626 <sup>3</sup>                | 1,027,969 <sup>3</sup> | 1,779,257 <sup>3</sup> | 11,338,268 |
| 1931 <sup>3</sup> ..... | 7,990,947            | 3,608,540 | 4,716,761 | 2,046,428                             | 1,295,158              | 3,770,524              | 12,795,634 |

<sup>1</sup>Figures for 1871-91 do not include work oxen.

<sup>2</sup>Census taken as of June 1, while previous censuses were taken in April, so that the proportion of young animals is greater than for years previous to 1911.

<sup>3</sup>Animals slaughtered on farms were not included. The following figures are comparable with data given for the previous years (the 1911 amounts being partly estimated):—

|           | Cattle.   | Sheep.    | Swine.    |
|-----------|-----------|-----------|-----------|
| 1911..... | 1,915,059 | 1,097,015 | 4,282,624 |
| 1921..... | 2,097,390 | 1,217,987 | 2,972,331 |

In Table 13 statistics are given showing the numbers of animals on farms for the years 1921 to 1934, expressed as percentages of the average numbers for the quinquennium 1921-25.

**13.—Index Numbers of Animals on Farms in Canada, calendar years 1921-34.**

(Average number for 1921-25=100.)

| Year.     | Animals on Farms. |                   |               |        |        |

<sup>1</sup>Figures revised since the publication of the 1933 Year Book.

**Live-Stock Marketings, 1933.**—The numbers of cattle and calves and sheep and lambs sold at stockyards showed increases in 1933 as compared with 1932. Cattle sold numbered 604,337 in 1933 and 569,633 in 1932, calves 317,334 and 300,176 and sheep and lambs 471,566 and 465,034, respectively. The total number of hogs sold in 1933 was 1,047,941, as compared with 1,212,821 in 1932. Two new stock yards figured in the 1933 receipts, *viz.*, Saskatoon Pool and Regina, and a few sales by live-stock brokers at North Battleford are also included in the totals for the year.

Table 14 shows the receipts for sale at the various stockyards and a partial disposition of the live stock sold in 1932 and 1933.

<sup>1</sup>Included with cattle.<sup>2</sup>Market opened in 1933.

The interprovincial and export movement of live stock in 1933 shows increases in all classes except hogs. Total shipments in 1933 with comparative figures for 1932 in parentheses were as follows: cattle 322,097 (261,915); calves 97,070 (91,165); swine 1,038,576 (1,121,760); and sheep 186,702 (153,259). For both years Alberta was the largest shipper in the aggregate and also the largest shipper of hogs and sheep. Saskatchewan led in cattle shipments and Ontario in shipments of calves.

The marketings of live stock through stockyards, by direct shipment to packers, or by export according to provinces of origin for the calendar year 1933 are given in Table 15. In Table 16 are given the statistics of the grading of animals from several provinces marketed through the stockyards in 1933.

**Slaughtering and Meat Packing.** This industry has become one of the most important branches of manufacturing in Canada. Its growth, shown by the statistics of Table 17, has been accompanied by a concentration of the major part of the production of the industry into a comparatively small number of large establishments, thereby facilitating the utilization of by-products and greater efficiency of operation. In 1931, 1932 and 1933, the large increase in the number of establishments is due to the inclusion of wholesale butchers operating small plants engaged in slaughtering only. The addition of these small establishments does not affect

materially the value of production of the industry. The numbers of live stock slaughtereded at Canadian inspected establishments in 1932 and 1933 are shown in Table 18.

**Consumption of Animal Products.** —The consumption of meats in Canada in 1933 is estimated at 599,145,695 pounds of beef, 796,541,284 pounds of pork and 67,532,961 pounds of mutton and lamb. The per capita consumption of beef on this basis amounts to 56.09 pounds; pork, 74.58 pounds and mutton and lamb, 6.32 pounds, a total of 136.99 pounds of meats per capita per annum. The corresponding data for other animal products are as follows: butter, 320,821,718 pounds and 30.04 pounds; cheese, 35,255,660 pounds and 3.30 pounds; eggs, 229,146,612 dozen and 21.45 dozen, and poultry 114,144,900 pounds and 10.68 pounds. Details are given in Table 19.

**19.—Total and Per Capita Consumption of Meats and Live-Stock Products in Canada, calendar years 1929-33.**

<sup>2</sup>Figures revised since the publication of the 1933 Year Book.

**Interprovincial and International Trade in Meats.**—The shipments of meats and meat products out of each province to other provinces and for export are shown in Table 20. Manitoba was the largest shipper in the aggregate.

Information regarding this traffic may be found in greater detail at pp. 50-59 of the report on “Live Stock and Animal Products Statistics, 1933”, obtainable on application to the Dominion Bureau of Statistics.

<sup>1</sup>Includes miscellaneous products not specified.

**Export and Import Trade in Live Stock and Live-Stock Products.**—The exports of live stock and live-stock products from the Dominion to the United Kingdom, the United States and all countries, are shown for the four fiscal years ended Mar. 31, 1931-34, in Table 12 of the chapter on External Trade, at pp. 566-572,

and imports in Table 13 at pp. 590-594. Exports and imports are also available by calendar years 1927-1933, and may be found at pp. 81, 83 and 84 of the report on "Live Stock and Animal Products Statistics, 1933". At pp. 75-95 of the report on "Trade of Canada (Imports for Consumption and Exports), Calendar Year 1933" figures are given of exports of "Animals and Animal Products" for 1932 and 1933 and imports of this class for the same calendar years will be found at pp. 198-220 of the same report.

### Section 4.—Cold Storage.

**Cold Storage Warehouses.**—Under the Cold Storage Act, 1907 (6-7 Edw. VII, c. 6), now consolidated as c. 25, R.S.C., 1927, subsidies have been granted by the Dominion Government towards the construction and equipment of cold storage warehouses open to the public, the Act and regulations made thereunder being administered by the Department of Agriculture. Table 21 shows for 1933 and 1934 the number of cold storage warehouses in Canada, with the refrigerated space.

#### 21.—Cold Storage Warehouses in Canada, by Provinces, 1933 and 1934.

NOTE. The figures in this table are supplied through the courtesy of J. F. Singleton, Dairy and Cold Storage Commissioner, Dominion Department of Agriculture.

<sup>1</sup>To October 31st.

**Cold Storage Stocks.**—Statistics of the stocks of food in the cold storage warehouses of Canada are collected and published monthly by the Agricultural Branch of the Dominion Bureau of Statistics. A summary of the cold storage data is included in the report on "Live Stock and Animal Products Statistics", published annually. In Table 22 are included statistics by months, for 1933 and 1934, of the stocks of food in cold storage and in process of cure for various important commodities.

## 22.—Stocks of Food on Hand in Cold Storage and in Process of Cure, by Months and Commodities, 1933 and 1934.

NOTE. —Figures in this table are of stocks on hand on the first of each month as published by the Agricultural Branch, Dominion Bureau of Statistics.

| Month.         | Eggs.      | Butter.    | Cheese.    | Beef.               |           |                     |           |
|----------------|------------|------------|------------|---------------------|-----------|---------------------|-----------|
|                |            |            |            | Fresh.              | Cured.    | In Process of Cure. |           |
|                | doz.       | lb.        | lb.        | lb.                 | lb.       | lb.                 |           |
| 1933.          |            |            |            |                     |           |                     |           |
| January.....   | 5,328,816  | 21,688,844 | 13,279,857 | 8,534,648           | 222,042   | 183,544             |           |
| February.....  | 4,612,107  | 16,555,315 | 11,649,769 | 9,294,287           | 228,906   | 113,791             |           |
| March.....     | 3,624,349  | 9,730,676  | 10,577,535 | 8,162,827           | 303,412   | 188,631             |           |
| April.....     | 3,654,357  | 3,541,511  | 8,524,814  | 8,353,451           | 156,189   | 173,115             |           |
| May.....       | 7,374,259  | 1,972,488  | 7,542,780  | 7,345,799           | 61,617    | 224,919             |           |
| June.....      | 15,076,474 | 5,393,674  | 8,356,711  | 7,546,718           | 328,659   | 185,630             |           |
| July.....      | 18,056,044 | 20,476,943 | 17,148,746 | 6,484,226           | 210,092   | 202,809             |           |
| August.....    | 18,414,517 | 34,710,067 | 25,498,088 | 7,139,126           | 357,522   | 234,532             |           |
| September..... | 18,838,892 | 42,418,605 | 33,009,493 | 8,608,839           | 308,211   | 160,499             |           |
| October.....   | 16,981,891 | 40,872,824 | 31,462,460 | 11,039,428          | 201,687   | 140,971             |           |
| November.....  | 12,252,452 | 37,948,121 | 27,426,187 | 14,059,852          | 214,493   | 137,881             |           |
| December.....  | 6,905,850  | 29,419,116 | 16,612,478 | 17,662,654          | 113,573   | 194,359             |           |
| 1934.          |            |            |            |                     |           |                     |           |
| January.....   | 3,587,926  | 22,026,655 | 15,973,921 | 14,477,743          | 228,712   | 189,761             |           |
| February.....  | 1,998,593  | 14,787,944 | 13,942,470 | 13,449,341          | 257,304   | 116,867             |           |
| March.....     | 1,372,198  | 7,462,885  | 12,351,874 | 11,413,039          | 204,343   | 98,484              |           |
| April.....     | 1,309,675  | 3,818,672  | 10,808,620 | 9,426,120           | 262,161   | 121,384             |           |

## Section 5.—Bounties.\*

In cases where it is considered advisable for the Government to encourage the production of a particular commodity, bounties paid by the Government are recognized substitutes for protective duties. In the past they have been made use of by Canada to a considerable degree, but the only bounties which involved payments in the last few years were those on copper bars and rods, hemp and bituminous coal mined in Canada and used in the manufacture of iron or steel. The Copper Bounty Act expired on June 30, 1931 and the Hemp Bounty Act expired on Dec. 31, 1932. The bounty on bituminous coal was the outcome of a recommendation of the Royal Commission on Maritime Claims relating to the use of Canadian coal in the manufacture of iron and steel.

The amounts of the above bounties paid in recent fiscal years have been as follows:—

## Copper Bounties Paid in—

|              |                           |               |
|--------------|---------------------------|---------------|
| 1924-25..... | 1,164,140 lb. at 11c..... | \$ 14,551-75  |
| 1925-26..... | 1,482,267 lb. at 1c.....  | 14,822-67     |
| 1926-27..... | 9,326,360 lb. at 1c.....  | 93,263-60     |
|              | 9,463,826 lb. at 2c.....  | 189,265-52    |
| 1927-28..... | 6,923,478 lb. at 2c.....  | 138,475-56    |
|              | 5,578,693 lb. at 3c.....  | 167,360-79    |
| 1928-29..... | 13,772,877 lb. at 1c..... | 137,728-77    |
| 1929-30..... | 6,507,212 lb. at 1c.....  | 65,072-12     |
| 1930-31..... | 17,739,497 lb. at 1c..... | 177,394-97    |
| 1931-32..... | 29,645,832 lb. at 1c..... | 296,458-32    |
| Totals.....  | 101,604,182 lb.           | \$ 611,762-93 |

## Hemp Bounties Paid in—

|              |                         |              |
|--------------|-------------------------|--------------|
| 1927-28..... | 19,048 lb. at 11c.....  | \$ 2,095-28  |
|              | 50,508 lb. at 11c.....  | 5,555-88     |
| 1928-29..... | 6,579 lb. at 11c.....   | 723-69       |
|              | 826,821 lb. at 12c..... | 99,218-52    |
| 1929-30..... | 666,113 lb. at 13c..... | 86,594-69    |
| 1930-31..... | 348,345 lb. at 1c.....  | 3,483-14     |
| 1931-32..... | 250,280 lb. at 1c.....  | 2,502-80     |
|              | 17,193 lb. at 12c.....  | 2,063-16     |
| 1932-33..... | 18,306 lb. at 12c.....  | 2,196-72     |
| Totals.....  | 2,203,193 lb.           | \$ 26,846-82 |

## Coal Bounties Paid in—

|                              |                           |               |
|------------------------------|---------------------------|---------------|
| 1930-31.....                 | 273,148 tons at 49½c..... | \$ 135,209-23 |
| 1931-32.....                 | 126,356 tons at 49½c..... | 62,546-18     |
| 1932-33.....                 | 118,753 tons at 49½c..... | 58,797-54     |
| 1933-34.....                 | 213,841 tons at 49½c..... | 106,851-25    |
| 1934-35 to August 31/34..... | 84,189 tons at 49½c.....  | 41,673-54     |
| Totals.....                  | 816,317 tons              | \$ 404,077-74 |

Bounties have been paid at various times in the past on iron and steel, on lead, on crude petroleum, on manila fibre, on zinc and on linen yarns, but the bounties on iron and steel ceased in 1911, on lead in 1918, on zinc in 1921, on linen yarns in 1923 and on crude petroleum in 1927. The total amounts paid in bounties on these commodities between 1896 and the date of expiration were: iron and steel, and manufactures of (1896-1912), \$16,785,827 (Canada Year Book 1915, p. 460); lead (1899-1918), \$1,979,216 for 1,187,169,878 lb.; zinc, \$400,000; linen yarns, \$17,523; manila fibre (1903-1913), \$367,962; crude petroleum (1905-27), \$3,457,173 on 233,135,217 gallons. (For quantities of crude petroleum and bounties paid in each year, see table on p. 635 of the 1927-28 Year Book.) Total payments for expired bounties between 1896 and 1932 aggregated \$23,007,701, which, with the

\*Revised by L. T. Lett, Chief Accountant, Department of Trade and Commerce.

\$611,763 paid on copper bars and rods and the \$26,847 for hemp and the \$404,078 for coal, make a total of \$24,050,389. The Year Book of 1915, pp. 459-461, gave a description of the bounties that had been payable since 1883, as well as tables showing, for each commodity, the quantities on which bounties were annually paid and the amounts of such bounties for the years 1896 to 1915 inclusive. For details of the bounties on zinc, see p. 635 of the 1927-28 Year Book.

## Section 6.—Patents, Copyrights, and Trade Marks.\*

**Patents.**—Letters patent, which in England have been in the gift of the Crown from the time of the Statute of Monopolies and earlier, are a purely statutory grant in Canada and have always been so. The earliest Act was one of Lower Canada, passed in 1824, wherein provision was made for the granting of patent rights to inventors who were British subjects and inhabitants of the province. Upper Canada passed its Act in 1826, and Nova Scotia and New Brunswick passed theirs at later dates. In 1849, after the Union, a consolidating Act was passed applying to both Upper and Lower Canada, and the B.N.A. Act assigned the granting of patents exclusively to the Parliament of Canada. The Dominion Patent Act of 1869 repealed the provincial Acts and has formed the basis of all succeeding Acts.

The first Canadian patent was issued under the Lower Canada Act of 1824 to Noah Cushing of Quebec; 165 patents were granted under the Acts of Upper and Lower Canada, and, under the consolidating and later Acts of the provinces 3,160 patents were granted.

Letters patent are now issued subject to the provisions of Chapter 150, R.S.C., 1927 (as amended by c. 4, 1928, c. 34, 1930, and c. 21, 1932), and application for protection relating to the same should be addressed to the Commissioner of Patents, Ottawa, Canada.

Invention means any new and useful art, process, machine, manufacture or composition of matter or any new and useful improvement in any art, process, machine, manufacture or composition of matter.

The growth of Canadian inventions is shown by the fact that an average of 1,422 patents was issued annually to Canadians during the decade 1920-29. The business of the Office has continued to expand gradually. The number of applications and total fees increased each year without a break from the beginning of the present century until the fiscal year ended Mar. 31, 1913, when 8,681 applications were received and the total fees amounted to \$218,125. In the fiscal year ended Mar. 31, 1934, there were 9,267 applications, with fees amounting to \$362,146, as compared with 10,145 and \$393,067, respectively, in 1933. For the fiscal year ended Mar. 31, 1934, the number of patents granted was 9,124 as compared with 10,241 in 1933, a decrease of 1,119. Of the patents of 1934, 5,998 or 66 p.c. were issued to United States' inventors, 982 to Canadians and 804 to residents of Great Britain and Ireland, while Germany with 566, France with 175, Holland with 97 and Sweden with 91 came next in the number of inventors to whom patents were issued.

\*Revised by J. T. Mitchell, Acting Commissioner of Patents, Ottawa.

It will be seen from the table that the more populous provinces of Ontario and Quebec obtained the largest absolute number of patents, but a calculation of the number of patentees in relation to population shows that, for the fiscal year 1934, the greatest relative inventiveness was displayed in British Columbia, with one patent granted for every 6,971 persons, while Ontario had one for every 7,507 persons and Quebec one for every 12,805 persons.

As will be seen from Table 24 the increased activity in invention which was manifested during the fiscal year ended 1929 was still more marked in the fiscal year ended 1930; there has been a decline in each year since then. Apparently the industrial depression has extended its baneful influence over this field also. In the latest year applications for patents were distributed pretty well over the whole field of invention without showing outstanding trends along any particular lines.

**Copyrights and Trade Marks.** Registration of copyright is governed by c. 32, R.S.C., 1927, and an application for protection relating to same should be addressed to the Commissioner of Patents, Ottawa, Canada.

The Copyright Act of 1921 (amended in 1923 and consolidated in c. 32, R.S.C., 1927) sets out in Section 4 the qualifications for a copyright and in Section 5, its duration: "Copyrights shall subsist in Canada . . . in every original literary, dramatic, musical and artistic work, if the author was, at the date of the making of the work, a British subject, a citizen or subject of a foreign country which has adhered to the (Berne) Convention and the additional Protocol . . . or resident within His Majesty's Dominions. The term for which the copyright shall subsist shall, except as otherwise expressly provided by this Act, be the life of the author and a period of fifty years after his death".

Copyright protection is extended to records, perforated rolls, cinematographic films and other contrivances by means of which a work may be mechanically performed. The intention of the Act is to enable Canadian authors to obtain full copyright protection throughout all parts of His Majesty's Dominions, foreign countries of the Copyright Union, and the United States of America, as well as in Canada.

The Trade Mark and Design Act (c. 201, R.S.C., 1927) was amended by c. 10 of the Statutes of 1928, bringing the Act into agreement with the terms of the Convention for the Protection of Industrial Property, as amended at The Hague in 1925 with regard to refusal to register certain trade marks. The renewal of expired trade mark registration was also provided for, while it was also enacted that in certain cases interested parties might apply to the Exchequer Court of Canada for the cancellation of a trade mark at any time within three years from its registration. The Unfair Competition Act, 1932, (22-23 Geo. V, c. 38), repealed all parts of the above Act relating to trade marks and all trade marks are now registered under and protected by the new Act.

### Section 7.—Weights and Measures.\*

The object of weights and measures administration is to maintain uniformity and accuracy in the use of the legal standards of the country in industry and commerce, to protect the public from short weight and measure and the trading community from unfair competition arising from such practices.

Prior to Confederation, the administration of weights and measures was in the hands of each Provincial Government but passed to the Dominion Government in 1867, under Section 91 of the British North America Act. Steps were then taken to simplify the standards in use and to establish uniformity throughout the Dominion.

What might be termed the principal Weights and Measures Act of Canada was passed in the session of 1872-73; its provisions closely followed English weights and measures law, but the system of weights and measures was greatly simplified. This Act established as the primary legal standards for Canada the imperial pound, gallon and yard, but in place of the system of stones, quarters, hundredweights (112 lb.) and the long ton (2,240 lb.) it provided a decimal series of weights, 1, 2, 3, 5, 10, 20, 30, 50, 100 lb., and the short ton of 2,000 lb. The only exceptions to this were the continued use of the old French land measure, the arpent, in Quebec, and the use of the long ton (2,240 lb.) in the coal-mining industry, but not for the retail sale of coal. The troy ounce of 480 grains and its decimal submultiples are the legal weights for the weighing of gold and precious metals. The metric system is legal for all transactions.

Many changes, deletions and additions have been made to the Act of 1873 by later legislation, but its principles remain unchanged. The latest legislation is the Weights and Measures Act (c. 212, R.S.C., 1927).

The Weights and Measures Service was first administered by the Department of Inland Revenue, and offices were opened in all the principal centres of Canada and equipped with standards and inspection equipment. In 1918 the Service was transferred to the Department of Trade and Commerce. For purposes of administration, the Dominion is divided into 18 districts, each in charge of a district inspector. The chief rules of administration are as follows:—

- (a) Every new type of weighing and measuring device must be submitted to the Department at Ottawa for approval before being placed on the market.
- (b) Every new machine must be inspected and stamped by an inspector before being sold or taken into use.
- (c) Imported machines are held by the customs until release is approved by the nearest inspector.
- (d) All inspections take place on the traders' premises, except where devices are brought to the inspection offices.
- (e) Fees are charged for inspection and stamping, the schedule being defined by Order in Council, and all moneys so collected are paid into the Consolidated Revenue Fund of Canada.

The following table is a summary of the articles and machines inspected in the fiscal years ended Mar. 31, 1933 and 1934. The total revenues collected by the Service in the fiscal years ended 1933 and 1934 amounted to \$394,222 and \$399,717, respectively, while the expenses, including salaries, totalled \$306,158 and \$236,667, respectively.

\*Revised by E. O. Way, Director of Weights and Measures, Department of Trade and Commerce.

### Section 8.—Electricity and Gas Inspection.\*

The Electricity and Gas Inspection Branch of the Department of Trade and Commerce administers three Acts: the Electricity Inspection Act (c. 22, 1928), the Gas Inspection Act (c. 82, R.S.C., 1927), and the Electricity and Fluid Exportation Act (c. 54, R.S.C., 1927).

The latest report of the Branch shows 402,662 electricity and gas meters tested in the fiscal year ended Mar. 31, 1934, as compared with 439,334 in the preceding year. The total revenue derived from electricity and gas inspection was \$271,203, as compared with an expenditure of \$200,593. The Branch also collected \$245,274 as export duty and licence fees under the provisions of the Electricity and Fluid Exportation Act; the cost of collecting this revenue was only \$302.

Other related statistics collected in the administration of the last-named Act will be found on p. 430, in the Water Power chapter of the Year Book. Here, however, are given statistics, also collected by the Branch in the process of administration, showing a phenomenal increase in the number of consumers of electricity in the past 20 years, from 505,597 to 1,720,997 (Table 28); a lesser increase in the gas meters in use from 267,454 in 1916 to 657,612 in 1934 (Table 29); and the number of cubic feet of gas sold in Canada from 1920 to 1934 classified as carburetted water gas, coal gas, coke oven gas, natural gas, acetylene gas and butane (Table 30).

\*Revised by J. L. Stiver, Director, Electricity and Gas Inspection Service, Department of Trade and Commerce.

## 28.—Numbers of Electricity Meters in Use, fiscal years ended Mar. 31, 1915-34.

## Section 9.—Census of Merchandising and Service Establishments.\*

A comprehensive survey of business carried on by trading and service establishments was undertaken for the first time in connection with the Seventh Decennial Census in 1931. A partial census of trading establishments only had been made in 1924, but the results of this initial survey, while indicative of the extent of domestic trade, suffered from the incompleteness of the canvass made at that time. The Census of Merchandising and Service Establishments, 1931, covered not only the operations of retail and wholesale merchandising establishments in 1930, but also those of service establishments, including hotels. In addition, information was collected to show the manner in which goods manufactured in Canada are distributed. Preliminary figures for the census were issued in several series of mimeographed bulletins, while the final results are being published in a series of provincial reports.

An outgrowth of the Census of Merchandising and Service Establishments has been an annual survey of retail and wholesale trade based on the reports of all chain stores and of the larger independent stores having an annual turnover of \$30,000 or more in 1930 (\$20,000 or more in the case of food stores or country general stores). While the annual figures for merchandising are not based on such a comprehensive survey as that made in connection with the decennial census, and are thus *estimates based on a sample of from two-thirds to 70 p.c. of the whole field*, they provide the most reliable indicators available of recent trends in merchandise trade.

**Retail Merchandise Trade, 1930-1933.**—On the basis of the results of the annual Census of Merchandising and Service Establishments, to which reference has already been made, the retail merchandise trade in Canada during the year 1933 is estimated at \$1,776,884,000, compared with \$2,755,569,900 in 1930. (See Table 31.) While the decline in all lines of trade combined was thus 35.5 p.c., some kinds of business show much heavier losses than others. How much of the decrease is due to the decline in prices and how much to a reduction in the physical volume of trade, it is not possible to say. The food and general merchandise groups show the least loss in dollar sales, while the largest declines are shown for the retail establishments specializing in building materials and furniture and household goods.

Among the provinces, Saskatchewan has suffered the most severe decline in business, followed by Alberta and British Columbia. If the year-to-year changes in the volume of business are compared, it will be found that in the Prairie Provinces the greatest decline during the period took place in 1931, while for all other provinces the year 1932 shows the largest losses. In all provinces the decline in 1933 was less than in either 1931 or 1932.

#### Subsection 1.—Wholesale and Other Bulk or Non-Retail Merchandising, 1930.

The wholesale field, as defined for the purposes of the census, embraces many types of establishments other than those generally classed as wholesale houses. Thus, under this heading of bulk merchandising, will be found not only the conventional types of wholesalers selling to retailers but also other establishments engaged in handling or arranging for the sale of commodities, or the transfer of rights, etc., on a non-retail basis, whether for domestic or foreign trade. In the tables presented below will be found the salient features of the operations of such classes as importers, exporters, commission merchants, brokers, etc., as well as the business of wholesale merchants. It should also be noted that the business of such establishments as bulk tank stations and manufacturers' sales branches is not included with that of the wholesale merchants, although a considerable part of the trade of these establishments is done with retailers.

There were 13,140 wholesale and other bulk or non-retail merchandising establishments in Canada in 1930. The total net sales for these establishments were \$3,325,210,300. This trade was concentrated, to a marked degree, in certain well-defined trading areas. Of the above total sales 30·49 p.c. were made by establishments in Ontario, 27·21 p.c. by those in Quebec, and 20·12 p.c. by those in Mani-

toba. In fact, approximately two-thirds of the entire trade was carried on by establishments located in the four cities of Montreal, Toronto, Winnipeg and Vancouver.

As already suggested, the bulk and non-retail merchandising field embraces many types of establishments, so that the amount of trade attributed to this field cannot be compared directly with the amount of retail business. A certain amount of business is transacted between bulk merchandising establishments, especially with respect to agents, brokers, and commission houses, and sales are made, by or through many wholesalers establishments, to manufacturers or other industrial consumers. In addition, some of these establishments are engaged in trading with foreign countries. Thus allowances must be made for the duplication in bulk and non-retail merchandising, for the sales of raw materials, for direct sales to consumers and for export business. In order to give a rough indication of the amount of pre-retail business, bulk merchandising establishments have been divided into two classes, "wholesalers proper" and "other bulk or non-retail distributors". The first class consists of those establishments which are carrying on the more conventional form of wholesale trading. The sales made by 5,108 wholesalers proper in 1930 were \$1,111,319,200, of which \$887,878,600 were made by wholesale merchants. Other types of bulk or non-retail distributors, consisting of 8,032 establishments, made sales or arranged orders to the value of \$2,213,891,100. It will be noted from Table 32 that, while the province of Manitoba had 20.12 p.c. of the total sales of all bulk merchandising, the business of wholesalers proper in Manitoba was only 7.15 p.c. of the total for Canada. This marked difference is due to the influence of the grain trade, which is such an important factor in the commerce of that province. The trade in grain is carried on mainly by establishments classified under "other bulk distributors" and appears, therefore, only in the all-inclusive figures of Table 32.

<sup>1</sup> Less than one one-hundredth of one per cent.

## Subsection 2.—Retail Trade.

While by far the greater part of retail trade is handled by retailing establishments, a considerable amount of retail business is conducted through other channels. The total value of the known retail trade in 1930 is shown in Table 34. The retail trade not included in this table consists for the most part of unrecorded sales by farmers and other producers directly to householders. In order to provide an indication of the purchasing power in each province, the average sales per household have been calculated. It should be borne in mind that the merchandise trade includes mail order sales, which may be made to persons outside of the province in which the mail order house is situated. The average sales per household tend to be highest in the provinces with the highest proportions of urban population and lowest in those provinces with the largest relatively rural populations.

**Summary of Merchandising and Services.**—The line of demarcation between these two classes of retailing cannot be sharply drawn. In many service establishments, especially those of the repair group, the retail sale of commodities is also carried on. Conversely, a great many stores, chiefly engaged in retail merchandising, have service departments for making alterations and repairs, for hair-dressing and other personal service, for cleaning, decorating, fur storage, etc. Establishments where both these functions are carried on have been classified according to the function which provided the largest receipts. For the sake of convenience, the fields are summarized by provinces and business groups in Table 35.

## RETAIL TRADE\* IN CANADA BY PROVINCES

\* The data cover all branches of retail trade which were statistically measured in the Census of Merchandising Establishments, 1931, and certain other branches which could not be so measured but for which estimates could be made upon the known data. A few branches do not admit of measurement or estimation and these are necessarily omitted.

## 34.—Value of the Known Retail

**Retail Merchandising by Provinces.**—The total sales made by 125,003 retail merchandising establishments in Canada in 1930 were \$2,755,569,900. In addition to these sales, the manufacturing bakeries and dairies reported retail sales of \$80,524,179, included in total retail trade (see Table 34 and chart on p. 673) but omitted in the figures of Table 36. Ontario led in amount of business with 39.92 p.c. of the total sales, although only 33.07 p.c. of the population of the Dominion resided in this province in 1931. On a per capita basis, retail merchandise sales show wide differences between provinces. The average for Canada on the basis of the 1931 population was \$265.55, but the per capita sales in Prince Edward Island were \$156.45, and in British Columbia \$358.07. It should be noted, however, that in these figures no allowance is made for the mail order or other sales outside the province.

In Table 37 retail stores have been grouped according to the value of net sales in 1930. Of the total number of stores classified in this way, 38.38 p.c. had sales of less than \$5,000 in 1930, while 18.21 p.c. had sales between \$5,000 and \$9,999. The combined sales of these two groups formed less than 10 p.c. of the total sales in that year. On the other hand, there were only 86 stores with a turnover of \$1,000,000 or more, but these establishments handled 14.25 p.c. of the total retail merchandise trade. These very large stores are found chiefly in the general merchandise and automotive groups.

**Table 37.—Total Retail Merchandising Establishments Grouped According to Annual Net Sales, with Numbers and Proportions of Full-Time Employees, Stores and Sales in Each Class, and Average Number of Employees per Store, 1930.**

<sup>1</sup>In some cases only the net sales for a group of stores were reported instead of the volume of business for each unit. The figures for such establishments have not been included in the above table.

More than 16 p.c. of the total sales in 1930 were made by stores in the general merchandise group. The most important kinds of stores in this group were the department stores and the variety stores. The sales of food stores, of which the most numerous and important are the grocery stores, formed 22.33 p.c. of the total, while those of the automotive group accounted for 13.86 p.c. While such proportions are indicative of the sales of commodities, they do not furnish an accurate guide to commodity sales. Few stores restrict their sales to one line of goods and some kinds of stores handle a wide variety of merchandise. Department and general stores, as is well known, deal in many commodities, but there are other stores which also carry many lines of goods. The figures that are given in Table 38 show the retail merchandise trade by groups and kinds of business.

### 38.—Retail Merchandise Trade in Canada, by Group and Kind of Business, 1930.

| Group and Kind of Business.                              | Stores.       | Employees.    |              | Salaries and Wages. | Net Sales.         | Stocks on Hand, End of Year (at Cost). |
|----------------------------------------------------------|---------------|---------------|--------------|---------------------|--------------------|----------------------------------------|

Retail merchandising in Canada is analysed by type of operation in Table 39. This analysis is first applied to all retail stores and, following this, to some particular kinds of retail business which have been most subject to chain system organization. Single stores under independent ownership accounted for 70.44 p.c. of the total retail merchandise sales in 1930. Included in this percentage are the sales of single stores in voluntary chains or co-operative buying organizations, which amounted

to 4.32 p.c. of the total. The sales of the units of provincial, sectional and national chains were 16.53 p.c. of the total and those of local chains 2.55 p.c. Two- and three-store multiples accounted for 7.98 p.c. of the total sales. For certain of the larger cities, the business of department stores belonging to national organizations has been taken with that of independent stores.

### 39.—Types of Operation of Stores Engaged in Retail Merchandising in Canada, 1930.

| Type of Operation.                                         | Stores.        | Full-Time Employees. |               |                     | Net Sales.           | Proportion of Net Sales. |
|------------------------------------------------------------|----------------|----------------------|---------------|---------------------|----------------------|--------------------------|
|                                                            |                | Male.                | Female.       | Salaries and Wages. |                      |                          |
|                                                            | No.            | No.                  | No.           | \$                  | \$                   | p.c.                     |
| <b>ALL STORES.</b>                                         |                |                      |               |                     |                      |                          |

<sup>1</sup>Exclusive of cafés with groceries and refreshment booths.

*Retail Merchandise Trade of Canadian Cities.*—The retail merchandise trade in Canadian cities of over 10,000 population is shown in Table 40. The cities are arranged in descending order according to their 1931 census populations. A notable feature of these figures is the wide variation in different cities in the relationship between population and retail sales. In general, per capita sales are high for cities which form distributing centres for large or populous areas, while such sales are lowest in residential or industrial satellite cities adjacent to larger centres, as in the case of St. Boniface, Man., Sandwich, Ont., and Verdun, Outremont, Westmont and Hull, Que.

*Retail Sales, by Commodities.*—The calculation of the value of sales by commodities presents tremendous difficulties, as so few stores keep any records of their sales in various lines of merchandise. On the basis of the information returned for the Census of Merchandising and Service Establishments, Table 41 has been constructed to show the value of retail sales for broad commodity groups. It should be understood, however, that the figures are estimates only. The table includes retail sales by hotels, manufacturing bakeries and dairies, as well as the commodity sales of retail merchandising and service establishments. The sale of food and kindred products forms the largest single commodity group, as the value of goods sold is 29 p.c. of the total commodity sales.

**41.—Estimated Retail Sales and Percentages of Total, by Commodities, 1930.**

| Commodity.                                                                                           | Estimated<br>Sales.  | Per cent<br>of Total. |

*Employment and Wages.*—The labour force engaged in retail merchandise trade numbered 400,628 persons in 1930. This includes proprietors actively engaged in retailing and full-time and part-time employees. The salaries and wages of full-time and part-time employees are shown separately in Table 42 and also the withdrawals of those proprietors who reported receiving a fixed salary. It will be noted that only a few of the total proprietors draw fixed salaries each month from their businesses; the majority do not limit themselves to fixed amounts.

**42.—Employment and Wage Facts, Retail Merchandising Establishments in Canada, by Business Groups and Provinces, 1930.**

*Service Establishments.*—The 42,223 service establishments from which reports were secured had receipts of \$249,455,900 in 1930. The professional services, such as medicine, dentistry or law, were not included in the census, nor were the building trades, such as carpentry, tinsmithing, etc. A special report has been prepared for hotels and the figures for these establishments are not included in the tables that follow. The provincial distribution of retail services in Canada during 1930 is shown in Table 43. Ontario again led in the amount of business with 43·86 p.c. of the total service receipts, while Quebec came second with 25·49 p.c.

Among service establishments, the amusements group was the most important, 21·34 p.c. of the total receipts being reported by establishments of this class. Of the receipts of \$53,231,500 for amusement establishments, \$38,479,500 was secured by motion picture houses. The next group in importance was that of storage and transportation, which includes carting and storage, taxi and motor transportation. The barber shops were the most important section of the personal service group and did more than twice as much business as hairdressing and beauty parlours. The repair and service group had the largest number of establishments. Blacksmith

shops were the most numerous, their receipts being only slightly less than the total for boot and shoe repair shops. Repair and service shops for motor vehicles formed an important section of this group.

#### 43.—Retail Services in Canada, by Provinces, 1930.

*Detailed Statistics of Business Services.*—The salient features of the business of service establishments are given in Table 45, which also shows the type of operation, *i.e.*, the extent to which these establishments operate independently or are organized in chain systems. Of the total of 42,223 establishments, there were 40,964 under independent operation, while the receipts of single independent establishments formed 74.79 p.c. of the total of all receipts for services. Except in the case of theatres, which are separately analysed in the table, chain systems were not an important factor in the service field.

## CHAPTER XVIII.—TRANSPORTATION AND COMMUNICATIONS.

Canada is a country of continental dimensions, nearly 4,000 miles in length from east to west, with its relatively small population of 10,835,000 (estimated population as at June 1, 1934) in the main thinly distributed along the southern borders of its vast area. Different parts of the country are shut off from each other by areas which are almost wildernesses, such as the region lying between New Brunswick and Quebec and the areas north of lakes Huron and Superior, the last dividing the industrial region of Ontario and Quebec from the agricultural areas of the prairies. To such a country with such a population, producing, like our western agriculturists, mainly for export, or, like our manufacturers, largely for consumption in distant portions of the country itself, cheap transportation is a necessity of life. Before 1850, when the water routes were the chief avenues of transportation and were closed by ice for several months each year, the business of the central portions of the country was reduced to a state of relative inactivity during the winter. The steam railway was therefore required for the adequate economic development of Canada, more particularly for linking up with the economic and industrial world the vast productive areas of the Canadian West, and thus promoting their development. The construction of the Canadian Pacific Railway gave to Canada, as an economic unit, length; the building of the newer transcontinental railways has given the country breadth.

Railway transportation, though essential, is nevertheless expensive, particularly in post-war years, and for bulky and weighty commodities. Hence new enterprises have either been undertaken or are under consideration for improving water communication, such as the new and deeper Welland canal, the deepening of the St. Lawrence canals and of the channel between Montreal and Quebec, and the development of the Hudson Bay route.

Problems of transportation are, therefore, of vital importance in the economic life of Canada, occupying a large part of the time and thought of our Parliaments and public men. Scarcely less important, from the social and economic points of view, is the development of methods of communication in a country so vast and so thinly peopled. The Post Office has been a great though little recognized factor in promoting solidarity among the people of different parts of the Dominion, while telegraphs and telephones have gone far to annihilate distance; the rural telephone, in particular, has been of great social and economic benefit in country districts. The use of the automobile has also been of great benefit in promoting social intercourse and in facilitating the transaction of business among the dwellers of both urban and rural districts. The press, again, assisted by cheap telegraph and cable rates, and reaching, through the mails, all parts of the country, has been of use in developing national sentiment. To sum up, it may be said that the progress of modern inventions, not least among which is the radio, has greatly improved living conditions in both rural and urban communities throughout the Dominion.

Part I of this chapter includes a statement of the tendencies toward monopoly which have made it necessary to establish a measure of government control over those transportation and communication agencies which are not governmentally-owned and operated; to this is added an account of the origin and functions of the

Board of Railway Commissioners. The subsequent parts deal in order with steam railways, electric railways, express companies, roads, motor vehicles, air navigation, canals, shipping, telegraphs, telephones, radio and the Post Office.

## PART I.—GOVERNMENT CONTROL OVER AGENCIES OF TRANSPORTATION AND COMMUNICATION.

Private enterprises engaged in the transportation and communication business in Canada have, in the past 50 years, shown the same tendency toward consolidation and amalgamation which has been evident elsewhere throughout the civilized world. The basic reason for such consolidation and amalgamation has been the fact that the business of transportation and communication is, generally speaking, a "natural monopoly", *i.e.*, a type of enterprise in which service can be more efficiently and economically rendered to the public where one or a few concerns control a particular type of service throughout the country. The outstanding example of these consolidations in Canada in our time is the concentration of control of the railways of the country in the hands of the Canadian Pacific Railway Company and the Canadian National Railway Company.

However, since such control brings with it an element of monopoly and possible overcharge which is distasteful to the public, it has been deemed advisable in Canada, as in other countries, to set up authorities controlling the rates to be charged and the other conditions on which services to the public are to be rendered by common carriers. This control, so far as railways within the jurisdiction of the Dominion Government are concerned, has been placed in the hands of the Board of Railway Commissioners, whose authority has been extended to cover various other means of transportation and communication. A brief summary of the history and functions of this body follows on pp. 693-694.

Besides the Board of Railway Commissioners, dealing with the larger public utilities coming under the jurisdiction of the Dominion Government, there exist, in several of the provinces, bodies which undertake among their duties the supervision and control of local public utilities operating under the jurisdiction of the provinces, and the regulation of their rates for service. Among these is the Railway and Municipal Board of Ontario, established in 1906, which controls the construction, operation and maintenance of railways, and the approving of their rates and their rules and regulations affecting the public. Similarly, in Quebec, a Commission of Public Utilities was established in 1909 and was given superintendence over all Quebec corporations, other than municipalities, "that own, operate, manage or control any system, works, plant or equipment for the conveyance of telegraph or telephone messages or for the conveyance of travellers or goods over a railway, street railway or tramway, or for the production, transmission, delivery or furnishing of heat, light or power, either directly or indirectly to or for the public". In Nova Scotia there is a Board of Commissioners of Public Utilities and in Manitoba a Public Utilities Commission with similar functions, while in the three westernmost provinces these same duties are performed by provincial Departments of Railways.

Due to changing conditions and increasing complexities in the transportation field, the Dominion Government appointed in 1931 a Royal Commission to inquire into the whole problem of transportation in Canada, particularly in relation to railways and shipping and communication facilities, having regard to present conditions and the probable future development of the country. (See pp. 648-50 of the 1933 Year Book.)

## The Board of Railway Commissioners for Canada.\*

In the early days of railway building in Canada, the provinces were more concerned with rapid development than with rate regulation. Under the Railway Clauses Consolidation Act of 1851, rates were fixed by the directors of the railway, subject to the approval of the Governor in Council. Beyond this, competition was relied upon to bring rates to a reasonable level. As time went on, however, those who believed in the efficacy of competition as a regulator were disillusioned. For example, complaints were made that the Grand Trunk gave low through transit rates, say from Chicago to New York, through Canada, and recouped itself by high non-competitive rates in Upper Canada. In 1888, the supervision of rates was assigned to the Railway Committee of the Privy Council, sitting in Ottawa.

At the turn of the century, two reports were prepared for the Department of Railways and Canals by Prof. S. J. McLean, the first setting down the experience of railway commissions in England and the United States, and the second discussing Canadian rate grievances, with a recommendation that regulation by commission be adopted in Canada. The second report found that non-competitive rates were exorbitant as compared with competitive rates and that the railways had exercised their right to vary rates without notice, to the great distress of shippers. Among the weaknesses of the Railway Committee as a rate-regulating body was its fixed station at Ottawa, which made the cost of appearing before it practically prohibitive. Besides, members of Parliament had no necessary aptitude for dealing with railway rates, and of their two functions—legislative and administrative—the legislative was to them the more important.

The Board of Railway Commissioners for Canada, as provided for by the amended Railway Act of 1903, was organized on Feb. 1, 1904. In the beginning, its membership consisted of a Chief Commissioner, a Deputy Chief and one Commissioner. In 1908 the membership was increased by the inclusion of an Assistant Chief Commissioner and two other Commissioners. According to the Act, the Board may be divided into two sections of three members but, since any two constitute a quorum, two Commissioners usually hear all but the more important cases, and, agreeing, give the decision of the Board.

The powers of the Commission, in brief, are in matters relating to the location, construction and operation of railways. The most important of these powers has to do with rate regulation. Passenger rates are divided into standard and special, freight rates into standard, special and competitive. Standard rates are maximum rates and the only ones which must be approved by the Board before they are applied. Special and competitive rates, being less than maximum rates, may be applied by railways without the Board's approval, provided that a change of rates has been advertised. But important rate adjustments usually come to the notice of the Commission, for the changed rate alters the extent of the territory in which a shipper can compete and on this account he is apt to appeal the case to the Commission. It is a knotty problem to mark the boundaries of competitive areas—to decide whether Nova Scotian manufacturers should be given rates which would allow them to compete west of Montreal, or again, whether high construction and operation costs in British Columbia should enforce a rate which prevents her goods from moving far into the prairies. By an amendment to the Railway Act, the regulation of telephone, telegraph and express rates was given to the Commission, but with narrower powers than were given to it in dealing with railways.

\*Revised by A. D. Cartwright, Secretary, Board of Railway Commissioners for Canada.

The procedure of the Board is informal, as suits the nature of its work, for experience has shown that hearings in strict legal form give the parties to the argument uncompromising attitudes. If possible, matters are settled by recommendations to the railway company or the shipper; thus, during 1933, 96.8 p.c. of the applications to the Board were settled without formal hearing. The Railway Committee had kept its station at Ottawa, giving only formal hearings, so that the grievances of those who could not afford to appear in person or pay counsel went unredressed. The itineraries of the Railway Commission are arranged so that evidence may be taken at the least expense to those giving it.

The Chief or Assistant Chief Commissioner, depending upon which one is presiding, gives final judgment on points of law when, in the opinion of the Commissioners, the question is one of law. On questions of fact the findings of the Board are final and are not qualified by previous judgments of any other court. Questions of law and jurisdiction are differentiated. In the first case, the Board may, if it wishes, allow an appeal to the Supreme Court; in the second, the applicant needs no permission to present his appeal.

The Railway Committee of the Privy Council, being a Committee of the Cabinet, was responsible to Parliament. When the powers of the Committee were made over to the Railway Commission the responsibility was retained, but necessarily by a different means. There is now provision for an appeal from any decision to the Governor General in Council, who may also of his own motion rescind or vary the action of the Board, but the power to rescind or vary usually consists in referring to the Board for reconsideration. From its inception until Dec. 31, 1933, the Board gave formal hearing to 10,092 cases. Its decision was appealed in 110 cases, 67 of these being to the Supreme Court of Canada and 43 to the Governor General in Council. Of the appeals 12 of those carried to the Supreme Court were allowed and 3 of those to the Governor General in Council.

## PART II.—STEAM RAILWAYS.\*

### Section 1.—Historical Sketch.

Construction was begun on the first Canadian railway in 1835. This was a line only 16 miles long between St. Johns and Laprairie, Quebec, intended to expedite the journey between Montreal and New York. It was opened for traffic in 1836, being operated at first with horses, for which steam locomotives were substituted a year later. About the same time, a line 6 miles long was built in Nova Scotia from Stellarton to a loading point on Pietou harbour to haul coal from the mines to vessels. On this line also the motive power was at first provided by horses, but in the spring of 1839 the "Samson", a locomotive built in England, brought over in a sailing vessel and still preserved in Halifax, was put in operation. A railway from Montreal to Lachine was opened in 1847 and another line to St. Hyacinthe in 1848. In 1850, however, there were only 66 miles of railway in Canada.

**Commencement of the Railway Era** *The Grand Trunk.*—The railway era in Canada may be said to have begun in 1851, when an Act was passed providing for the construction of a main line of railway between the two Canadas. The

\*Revised and checked by G. S. Wrong, B.Sc., Chief of the Transportation and Public Utilities Branch of the Dominion Bureau of Statistics. This branch publishes an annual report on Steam Railways, as well as numerous other reports, for a full list of which the reader is referred to Chapter XXIX of this volume.

result was the completion of the Grand Trunk Railway between Montreal and Toronto in 1856, its extension westward to Sarnia in 1859, and eastward to Rivière du Loup in 1860. The Atlantic and St. Lawrence Railway, from Portland, Maine, to the Canadian boundary, was leased for 999 years and in 1859, on the completion of the Victoria bridge across the St. Lawrence at Montreal, the Grand Trunk had a through route 800 miles long from Portland to Sarnia. A line from Detroit to Port Huron was leased in 1859, the Champlain roads in 1863, the Buffalo and Lake Huron in 1867, while the Chicago and Grand Trunk was completed from Port Huron to Chicago in 1880. In 1881 the Georgian Bay and Lake Erie system (171 miles) was incorporated, and in the following year the Great Western (904 miles) and the Midland systems (473 miles) were also incorporated into the Grand Trunk. In 1888 the Northern Railway, which had been opened from Toronto to Barrie in 1853, and the Hamilton and Northwestern Railway were taken over by the Grand Trunk. In 1891 the completion of the St. Clair Tunnel gave direct communication with the railways of the United States. In the 1870's the gauge had been changed from the original 5' 6" to the standard gauge of 4' 8½".

**Construction of the Intercolonial.**—An intercolonial railway between the Maritime Provinces and Canada had been proposed as early as the 1830's. In 1844 the Imperial Government made a survey for a military road, and in 1851 agreed to recommend to Parliament either a guarantee of interest or an advance of the sum required to build a railroad. Differences of opinion as to the route resulted in the project being dropped, but in 1853 Nova Scotia undertook to construct by 1862 a trunk line from Halifax to the New Brunswick frontier, with branch lines to Pictou and Victoria Beach. In both Nova Scotia and New Brunswick, however, the scheme of an intercolonial railway broke down for lack of funds, and in 1867 there were only 374 miles of railway in the Maritimes—229 miles in New Brunswick, including lines from Saint John to Shediac and from St. Andrews to Richmond; 145 miles in Nova Scotia, including lines from Halifax to Truro and Windsor, and from Truro to Pictou. These, under the B.N.A. Act, passed to the Dominion Government. The latter undertook the completion of the railway, and in 1876 the line was opened. In 1879 the Rivière du Loup branch of the Grand Trunk was acquired, and in 1898 the Drummond Counties Railway from Chaudière Junction to Ste. Rosalie Junction was leased and running rights obtained from the latter point over the Grand Trunk tracks into Montreal, the Intercolonial thus becoming a competitor for the business of the commercial metropolis of Canada.

**The First Transcontinental Railway—The C.P.R.**—As early as 1849 a pamphlet published by Major Carmichael-Smyth advocated the construction of a Canadian Pacific railway nearly along the present route. In 1851 a Parliamentary Committee reported against undertaking the enterprise at that time. In 1871 the terms under which British Columbia entered Confederation bound the Dominion to commence the Pacific railway within two years and complete it within ten years. The building of the railway as a public work actually commenced in 1874, but was not very rapidly pushed forward. In 1880 the Government entered into a contract with the Canadian Pacific Railway syndicate, granting to the syndicate all portions of the line completed or under construction, a cash subsidy of \$25,000,000, a land grant of 25,000,000 acres, free admission of materials for construction, and protection for 20 years against competing lines. The company on its side agreed to complete the railway to a fixed standard by May 1, 1891, and thereafter to maintain it efficiently. As a matter of fact the last spike on the main line was driven on Nov. 7, 1885. Like the Grand Trunk, the Canadian Pacific Railway began to acquire

branch lines as feeders, among them being the North Shore, Quebec, Montreal, Ottawa and Occidental in 1881; the Winnipeg to Manitou line in 1882; the Ontario and Quebec, the Credit Valley and the Toronto, Grey and Bruce in 1883; the St. Lawrence and Ottawa, and the Manitoba Southwestern in 1884; the North Shore, Nova Scotia in 1885; the Atlantic and Northwest in 1886; the West Ontario Pacific in 1887; the Sudbury and Sault Ste. Marie in 1888; the New Brunswick Railway and the Columbia and Kootenay in 1890; and the Montreal and Ottawa, and Montreal and Lake Maskinongé in 1892.

**The Second Transcontinental—The Grand Trunk Pacific.**—About the end of the century the Grand Trunk, which already had a line as far west as Chicago, submitted to the Canadian Government a proposal whereby it might participate in the settlement and development of the West. Lines were to be leased from Chicago *via* Minneapolis to Winnipeg, and thence a new line, subsidized by the Government, would be built to the Pacific Coast. The Government raised objections to so much of the line lying in the United States and a second proposal was made for a connecting line with larger subsidies from North Bay to Winnipeg. The Government submitted, in 1903, a counter proposal that the line, instead of terminating at North Bay, should be continued east to Moncton, New Brunswick, the eastern section from Moncton to Winnipeg to be constructed by the Government and leased to the Grand Trunk Pacific for a 50-year period, the railway paying no rent for the first seven years and 3 p.c. on the cost of the railway for the remaining 43 years. The western half of the railway from Winnipeg to Prince Rupert was to be built by the Grand Trunk Pacific, the Government guaranteeing interest on bonds to 75 p.c. of the cost of construction, not exceeding \$13,000 per mile on the prairie section and \$30,000 per mile on the mountain section. The Grand Trunk reluctantly accepted this proposition and construction of the National Transcontinental and Grand Trunk Pacific commenced.

**The Third Transcontinental—The Canadian Northern Railway.**—The third transcontinental railway, the Canadian Northern, was begun in 1896 with the completion by Mackenzie and Mann of the 125-mile line of the Lake Manitoba Railway and Canal Co., chartered in 1889. The charters of the Winnipeg and Hudson Bay, the Manitoba and Southeastern, the Ontario and Rainy River, and the Port Arthur, Duluth and Western were next acquired. Assisted by the Manitoba Government, which desired to establish competition with the Canadian Pacific Railway, the Canadian Northern then secured the Manitoba lines of the Northern Pacific and in 1902 completed its line from Winnipeg to Port Arthur. During the following decade, the agricultural west was filling up very rapidly and, with the public of Canada under the influence of this boom, the Canadian Northern Railway was able to secure guarantees of bonds from the Dominion and Provincial Governments to enable it to extend its lines both westward to Vancouver and eastward to Montreal and so complete the great scheme of a transcontinental road.

**Effect of the War on the Railways—The Drayton-Acworth Report.**—With two new transcontinental main lines, besides branches, under construction Canadian railway mileage was doubled between 1900 and 1915, increasing from 17,657 miles in the former year to 34,882 miles in the latter. The builders of the new lines, as well as the Canadian Government and people, had expected that immigration of capital and labour from Europe would rapidly settle the areas tributary to the new railroads and give them abundant and lucrative traffic, as had been the case with the C.P.R. Instead, the War came, and European labour

and capital were conscripted for the struggle; immigration fell off, while cost of operation increased, owing to the scarcity of labour and material in Canada. The interest on the bonds had to be met, and in 1915 the Government felt it necessary to give assistance to the railways. In 1916, after having again made loans to the Grand Trunk Pacific Railway and the Canadian Northern Railway Co., a Royal Commission was appointed by Order in Council of July 13, 1916, to investigate : (1) the general problem of transportation, (2) the status of each of the three trans-continental systems, (3) the reorganization of any of the said systems, or their acquisition by the State, and (4) other matters considered by the Commission to be relevant to the general scope of the inquiry. The majority report of the Commission, signed by Sir Henry Drayton and Mr. Acworth, has formed the basis of the subsequent railway policy of Canada. Their recommendation was that the public should take control of the Canadian Northern, of the Grand Trunk Pacific and the Grand Trunk proper, and that they should be administered on purely business principles by a board of trustees, such compensation as seemed proper to be decided by arbitration and given to the shareholders of the Canadian Northern and the Grand Trunk.

The process of the acquisition of these railways and the financial results of their operation down to the end of 1933 are described in Section 3, pp. 714-725.

**The Royal Commission of 1931.**—During 1930 and 1931 both freight and passenger traffic declined until new low records were being established each succeeding month. Freight and passenger revenues consequently decreased at alarming rates and with increasing capital expenditures and fixed charges, the financial condition of Canadian railways demanded readjustment. The dividend rate of the Canadian Pacific Railway was reduced from 10 p.c. to 5 p.c. for the second and fourth quarters of 1931 and early in 1931 it was evident that the Canadian National system would not earn the interest due on the public holdings of its bonds and debentures, not to speak of over \$32,000,000 interest on Government loans. To study the situation and, if possible, to remedy it, the Government appointed a Royal Commission under the chairmanship of the Rt. Hon. L. P. (now Sir Lyman) Duff, Judge of the Supreme Court of Canada, which held hearings throughout the country and on Sept. 13, 1932, submitted its report, summarized at pp. 648-650 of the 1933 Year Book. During the following session of the Dominion Parliament legislation known as The Canadian National-Canadian Pacific Act, (c. 33) 1933, was passed implementing the report of the Commission.

Under this Act the former Board of Directors of the Canadian National Railways is replaced by a board of three trustees, the chairmanship of which is a full-time position. The members are appointed for terms of five years and shall not be removed from office unless for assigned cause and on Address of the Senate and House of Commons. Decisions of the majority, which must include the chairman, will prevail. The trustees must submit each year estimates of requirements to Parliament through the Finance Minister and income deficits shall not be funded. The trustees shall also present annual reports to Parliament through the Minister of Railways and Canals. Continuous audit shall be made by independent auditors appointed annually by Parliament.

Under Part II of the Act the Canadian National and Canadian Pacific Railways are required to co-operate as recommended by the report of the Commission and, in addition, the railways are to divide the employment of such co-operative

activities between the employees of the two railways, the division to be made by negotiations with the employees.

The co-operative measures may include:—

- (a) New companies controlled by stock ownership, equitably apportioned between the companies;
- (b) Leases, entrusting agreements, or licences, or agreements for pooling and division of earnings arising from the joint operation of any part or parts of freight or passenger traffic, or express, telegraph, or other operating activities or services;
- (c) Joint trackage, running rights, joint ownership, or joint operating agreements, depending upon the nature of the property or services included in any co-operative plan;
- (d) Joint or individual highway services, or highway and railway services combined, in any form.

In the formation of any new company, the employees in any services taken over by the new company shall be given preference.

Under Part III provision is made for the erection of a tribunal with jurisdiction as recommended by the Commission, except that clause (e) "abandonment of lines, services and facilities" is struck out. The powers of the tribunal may be invoked by either company and decisions of the presiding officer and one member shall be final and binding on both railways, even if one railway fails to appoint a representative. The orders of the tribunal shall be binding and enforced in the same manner as orders of the Board of Railway Commissioners and shall not be subject to appeal except as to jurisdiction and only to the Supreme Court of Canada. Where an order of the tribunal conflicts with an order of the Board of Railway Commissioners the former shall prevail. Where a dispute is of substantial concern to the public, or affects any province, the presiding officer shall give due notice and the interested parties may be heard at the sitting.

The Act does not authorize the amalgamation or unified management of the two railways.

## Section 2.—Statistics of Steam Railways.

The steam railways of the world may be said to have commenced their operation with the opening of the Stockton and Darlington railway in England on Sept. 26, 1825. Between then and 1933 the mileage of the steam railways of the world had increased to a total of approximately 783,000 miles. Nearly a third of this total was in the United States, which had a total of 247,595 miles in 1932. Soviet Russia came second with 55,926 miles, British India third with 42,961 miles and Canada fourth with 42,338 miles. France had 26,113 miles, Germany 36,405 miles, Great Britain 20,251 miles, Australia 27,798 miles, Argentina 25,451 miles, Brazil 19,853 miles and Mexico 14,506 miles. On a per capita basis Australia had the greatest mileage with only 238 inhabitants per mile of line, and Canada was second with 254 persons per mile of line, (exclusive of 341 miles of line, chiefly main lines of Canadian railways, crossing over United States territory).

The mileage of steam railways in operation in Canada is given by years for each year from 1850 to 1933 in Table 1, showing the first great period of construction in the 1850's, when the mileage grew from 66 to 2,065, the lull in the 1860's, the second great period of construction in the 1870's and 1880's, the lull in the 1890's, the third great period of construction between 1900 and 1917 and the subsequent falling-off in the rate of increase.

**1.—Record of Steam Railway Mileage as at June 30, 1835-1919, and Dec. 31, 1919-33.**

<sup>1</sup>Revised since the publication of the 1933 Year Book.

The operated mileage in the different provinces is given for recent years in Table 2. Construction was most active in Saskatchewan and Alberta during the period covered, as will be seen from the increased mileage recorded in these provinces.

<sup>1</sup>Revised since the publication of the 1933 Year Book.

**Capital Liability.**—The capital liability of the steam railways of Canada is shown in Table 3 for the years 1901 to 1933. The great increase after 1922 is due to the inclusion of all Government loans to railways and investment in road and equipment of Government railways as part of the capital liability of the railways. Statistics of individual lines are given in Tables 4 and 4A.

### 3.—Capital Liability of Steam Railways, as at June 30, 1901-19, and Dec. 31, 1919-33.

NOTE.—Corresponding figures for each year from 1876 to 1900 inclusive were given on p. 649 of the 1927-28 Year Book.

<sup>1</sup>Canadian lines only. <sup>2</sup>Including capital of leased lines. <sup>3</sup>Constructed and operated by Ontario Government Railway Commission. <sup>4</sup>Included with Canadian Pacific Ry. <sup>5</sup>Includes \$201,989,152 Canadian railway capital owned by Canadian railways.

**Capital Investment.**—The capital investment in road and equipment of Canadian steam railways is shown in Table 5 for the calendar years 1928–33. The table gives the investment in new lines and in additions and betterments during the year, together with the cumulative total of such investments as at the end of each year. During 1933, \$208,671 was invested in new lines and \$107,684 in additions and betterments, while up to Dec. 31, 1933, a total of \$3,365,464,255 had been invested in road and equipment of Canadian steam railways. When comparison is made with the figures of Table 3, it is seen that the capital liability of the steam railways was considerably greater than the actual investment in physical property by the railways at the same date. This discrepancy is largely accounted for by the fact that the total of capital liabilities as shown in Table 3 includes loans and advances from the Government to cover deficits of the Canadian National Railways and unpaid accrued interest on such loans which, up to Dec. 31, 1933, amounted to \$424,338,109 as shown in Table 21. A further factor in the discrepancy is that some of the outstanding railway stocks represent little actual investment in physical property.

### 5.—Capital Invested in Road and Equipment of Canadian Steam Railways, calendar years 1928-33.

| Investment.                                    | 1928.                       | 1929.                      | 1930.                       | 1931.                      | 1932.                | 1933.                        |

<sup>1</sup>Includes a credit of \$13,477,505 on account of Canadian National property transferred to Harbour Commissions of Halifax and Saint John.

<sup>2</sup>Includes difference between purchase price of Atlantic, Quebec and Western; Kent Northern; Quebec, Montreal and Southern; and Quebec Oriental Railways and investment reported in 1928—a credit of \$7,198,024; difference between valuation of Northern Alberta Railways and investment of Alberta and Great Waterways; Central Canada; Edmonton, Dunvegan and British Columbia; and Pembina Valley Railways as at June 30, 1929—a credit of \$5,639,429; a credit of \$1,869,859 for the Hereford Railway which ceased operation; and additions and betterments to separately operated properties and other undistributed items amounting to a debit of \$5,828,816.

<sup>3</sup>Credit of \$18,180,692 for Canadian Northern and Grand Trunk Pacific rails lifted during the War for use in France and other lines dismantled after consolidation of the Canadian National system.

<sup>4</sup>Includes a credit of \$6,928,410 due to balance sheet transfers, and a credit of \$1,359,261 for additions and betterments to separately operated properties of Canadian National Railways and miscellaneous credits amounting to \$309,876.

<sup>5</sup>Includes \$2,900,000 due to balance sheet transfers, a credit of \$179,805 for additions and betterments to separately operated properties of the Canadian National Railways and a credit of \$1,742,894 due to adjustments in investment in leased lines of the Canadian Pacific Railway.

<sup>6</sup>Includes a credit of \$1,792,204 due to balance sheet transfers of the Canadian National Railways; a credit of \$139,806 due to balance sheet transfers and a credit of \$40,295 for additions and betterments to its separately operated properties, also a debit of \$14,883,870 covering investments of its leased lines not shown in previous years; a credit of \$84,376,267 due to adjustments of expenditures of the Canadian Pacific Railway to Dec. 31, 1932, largely investments in hotels and office buildings previously carried as railway investment, and a debit of \$2,000 due to correction of expenditures for its leased and acquired lines; a credit of \$32,445,146 due to adjustments in investments of the Pacific Great Eastern Railway and a debit of \$413,210 for the Winnipeg River Railway not previously shown.

**Summary of Traffic Statistics.**—A summary of freight and passenger traffic statistics and of the ratio of operating expenses to gross earnings, continuing a series which has been compiled since 1875, will be found for recent years in Table 6. This table, however, has the defect that its figures of passengers and freight carried are not comparable throughout but have been reduced as a result of the consolidation of railways. Better tests of the real volume of passenger and freight traffic are supplied in Table 9 of this chapter under the headings "Passengers carried one mile" and "Freight carried one mile". These records, commencing in 1915, show that the maximum volume of passenger traffic was reached in the calendar year 1919 and the maximum volume of freight traffic in 1928. Both freight and passenger traffic, especially the latter, have in recent years been affected by the increase in the use of motor vehicles. This traffic decrease has been much aggravated since 1929 by the general decline in commercial activity.

The statistics of gross earnings and operating expenses illustrate the difficulties confronting our railways in recent years. Before the War it was generally held that, on account of the enormous initial investment required in roadbed and equipment, a railway's operating expenses should not exceed about two-thirds or 70 p.c. of its

gross earnings, the remainder being required to meet interest on capital invested, whether represented by stocks or bonds, as well as to provide for necessary improvements. The ratio of operating expenses to gross earnings is called the operating ratio, and in 1913 the Canadian operating ratio was 70.90 p.c. The new conditions of the war period, especially the higher cost of labour and of fuel, increased the operating ratio, in spite of advances in freight and passenger rates, until in 1920 it reached 97.18 p.c. By 1928 the operating ratio had declined to 78.53 p.c. but it rose to 89.53 in 1931 and decreased to 87.48 in 1932 and to 86.26 p.c. in 1933. Although operating revenues for 1933 were lower than in 1932 on account of the decreases in both freight and passenger traffic, the net operating revenues increased by \$423,128.

In Table 7 will be found an analysis of the distribution of the operating expenses of steam railways for the latest four years. The earnings and operating expenses per mile of line and per train-mile are analysed in Table 8.

#### 6.—Summary of Steam Railway Statistics of Freight and Passenger Traffic, and Ratio of Expenses to Earnings, years ended June 30, 1911-19, and calendar years 1919-33.

NOTE.—These statistics were published for the years 1875-1910 on p. 434 of the 1916-17 Year Book, and for 1901-25 on p. 591 of the 1926 Year Book.

| Year.               | Miles in Operation. | Total Train-Miles. | Passengers Carried. <sup>1</sup> | Freight Carried. <sup>1</sup> | Gross Earnings. | Operating Expenses. | Ratio of Expenses to Receipts. |

| 1933 ( " ).....     | 6,365             | 5,490               | 875           | 3.655           | 3.153               |

A summary analysis of passenger and freight traffic statistics for recent years is given in Table 9, showing among other things a decline in average receipts per passenger per mile from 3.04 cents in 1921 to 2.29 cents in 1933, and a decline in the average number of passengers per train from 70 in 1919 and 64 in 1920 to 39 in 1933. Similarly, freight traffic statistics show a reduction in freight receipts per ton per mile from 1.200 cents in 1921 to 0.955 cents in 1933. The average haul for freight has been revised to show the average for all railways instead of for each railway, thereby eliminating the effects of consolidations of railways and of interchanging freight between Canadian railways. The passenger traffic has shown the effects of the competition of motor vehicles, both public and private, which in 1915, numbered only 89,944, while in 1933 they numbered 1,082,957. The average revenue per passenger increased in 1918 and 1919 with increases in rates, but the increases between 1924 and 1930 have been largely due to decreases in the short haul traffic. The increases in freight train loading and train revenues have been due to the use of larger and more powerful locomotives.

**9.—Summary Analysis of Statistics of Passenger and Freight Services and Receipts, for the years ended June 30, 1915-19, and the calendar years 1919-33.**

**Railway Wages and Salaries.**—The data in Table 10 show the number of employees and the salaries and wages, as reported by the railways, for 1912-33 inclusive and columns of adjusted data have been added. These adjusted data, as explained in footnote 2, are for comparative purposes only and were necessitated by several revisions in the method of reporting employees and wages.

The Canadian National Railways brought into their railway accounts in 1923 the express and hotel employees and, in 1928, the commercial telegraph employees. The Canadian Pacific excluded the wages chargeable to capital account and also deducted a *pro rata* number of employees prior to 1926, and in 1915 and 1916 omitted to include outside operations employees. Because these railways were not able to correct the data for the early years, the Bureau compiled these adjusted data on

a basis as nearly comparable as possible. Employees and wages for 1926 and subsequent years are on the same basis and include the total employees and salaries and wages charged to both capital accounts and operating expenses.

The number of railway employees and the amount of their remuneration are naturally affected by the volume of traffic, which tends to rise in periods of active business conditions and fall in times of depression. The volume of traffic is also very directly affected by the size of the grain crops in the West. Thus it may be observed in Table 10 that the very favourable industrial and agricultural conditions of 1928 resulted in a considerable increase in the number of employees.

The monthly average number of employees dropped from 132,678 in 1932 to 121,923 in 1933. This was the smallest staff working on Canadian railways since 1908, when the mileage was only 54 p.c. of the 1933 mileage. These are monthly averages, so that the average annual wages and time worked are not affected by seasonal lay-offs and fluctuations. Thus four men working three months would have the same effect on the average as one employee working twelve months.

**10.—Numbers of Steam Railway Employees, Totals and Averages of Salaries and Wages, and Ratios of the Latter to Gross Earnings and Operating Expenses, for years ended June 30, 1912-19, and for calendar years, 1919-33.**

<sup>1</sup> The ratio percentages are for pay roll chargeable to operating expenses only for 1926 and subsequent years.

<sup>2</sup> Data for early years could not be corrected, so the other data were adjusted to be as nearly comparable as possible, but these data should be used only for purposes of comparison. (See text above.)

<sup>3</sup> Revised to include commercial telegraph employees of Canadian National Railways.

**Rolling Stock.**—Statistics of the rolling stock of the steam railways of Canada are given for the last seven years in Table 11. The figures may be supplemented by the statement that between 1920 and 1933 the average capacity of box cars increased from 34.779 tons to 39.398 tons, of flat cars from 33.459 to 39.536 tons, and of all freight cars from 35.141 tons to 40.016 tons. The average tractive power of the locomotive in use in 1920 was 31,112 lb. and in 1933, 37,242 lb.

<sup>1</sup> Includes pullman cars.

**Commodities Hauled.**—In Table 12, the duplications from two or more railways handling the same freight have been eliminated. The peak year was 1928 when agricultural products were particularly heavy. The 1933 statistics show a decrease of 3,443,457 tons, or 6 p.c. from the 1932 total and of 52 p.c. from 1928.

## 12.—Commodities Hauled as Freight on Steam Railways during the calendar years 1929-33.

**NOTE.**—In this table duplications are eliminated, i.e., the same freight handled by two or more railways is counted only once. In this respect these figures differ from those in the corresponding table in the 1926 and previous Year Books, and also from those of Table 6 in this chapter.

<sup>1</sup> Includes 22 tons not distributed.<sup>2</sup> Includes 10,680 tons not distributed.<sup>3</sup> Included with dressed meats in 1932 and 1933.<sup>4</sup> Includes 20 tons not distributed.

**Government Aid to Private Railways.**—In order that the private railways of Canada might be constructed in advance of settlement, as colonization roads or through thinly settled districts where little traffic was available, it was necessary for Dominion, Provincial and even municipal governments to extend some form of assistance. In our earlier history, when our governments had plenty of Crown land and little cash, the subsidies granted to railways frequently took the form of land grants, which had the advantage of giving the railway a direct interest in opening up the country, though they sometimes led to the railways holding large tracts of land idle for speculative purposes when intermixed Crown lands had been homesteaded, thus retarding the settlement of agricultural land. Table 13 shows the areas of the land granted as subsidies and for right of way, station grounds and townsite purposes to steam railway companies by the Dominion and Provincial Governments, with the names of the companies in the case of the Dominion Government. The total area granted up to Dec. 31, 1933, amounted to 47,405,719.53 acres.

As the country grew wealthier, the objections to the land-grant method became more apparent, and aid was more frequently given in the form of a cash subsidy per mile of line, a loan, or a subscription to the shares of the railway. From 1851 up to Dec. 31, 1933, as shown analytically in Table 14, the total value of such aid granted to steam railways in Canada, exclusive of the capital of Government railways, amounted to \$224,320,757. Of this sum, \$177,834,528 was granted by the Dominion Government, \$33,385,615 by the Provincial Governments, and \$13,100,614 by municipalities. Table 15 records the details of the most recent type of assistance given to private railways, *viz.*, by the guaranteeing of their bonds or of the interest thereupon. These guarantees enabled the railways receiving them to borrow money at rates of interest considerably lower than would otherwise have had to be paid. The total amount outstanding on Dec. 31, 1933, was \$900,046,923.

**13.—Areas of Land Granted to Steam Railways by the Dominion and Provincial Governments up to Dec. 31, 1933.**

<sup>1</sup> Does not include \$216,207,142 perpetual debenture stock and guaranteed stock of the Grand Trunk Railway, on which interest and dividends are guaranteed by the Dominion Government, nor Government-guaranteed bonds held by the Government itself but it does include \$60,000,000 advanced to the Canadian Pacific Railway by the banks and guaranteed by the Dominion Government. This latter sum is not included in the guarantees shown in Tables 25 and 26, Chapter XXI of this volume, nor is a further sum of \$750,000, paid off between Dec. 31, 1933 and Mar. 31, 1934.

**Railway Accidents.**—The number of passengers, employees and others killed and injured in steam railway accidents is given in summary form from 1920 to 1933 in Table 16, and in detailed analysis for 1931 to 1933 in Table 17.

During 1933, (Table 17) 8 passengers were killed in train accidents and 306 injured. Fewer passengers were killed in 1932 and 1931, but this is the smallest number injured since 1919. A new low record for the past 25 years was established in the number of employees killed in train accidents with a total of 41. In 1932, 57 were killed; in 1931, 42; in 1930, 81; and a maximum of 298 in 1913. There was an increase in employees injured from 957 in 1932 to 985; both these years, however, were well below the previous 20 years. Postal clerks, etc., trespassers and non-trespassers brought the total up to 260 persons killed and 1,851 injured in train accidents. Highway crossing accidents accounted for 78 persons killed and 247 injured. Of the fatalities, 11 were pedestrians, 61 were motorists and 6 were occupants of other vehicles. Fifteen of the total were killed at protected crossings and 63 at unprotected crossings and 46 persons were injured at protected highway crossings and 201 at unprotected crossings. Persons killed and injured in railway accidents other than train accidents numbered 20 and 3,522 respectively, the majority of the injured being trackmen and shopmen.

### 16.—Numbers of Passengers, Employees and Others Killed and Injured on Steam Railways, calendar years 1920-33.

NOTE.—For the years ended June 30, 1888 to 1919, see Canada Year Book, 1910, p. 378, and 1922-23, p. 635.

### Section 3.—Origin and Growth of Government-Owned Railways.

**Canadian Government Railways.**—The Intercolonial Railway, built as a condition of Confederation and completed in 1876, and the Prince Edward Island Railway, opened in April, 1875, have since their construction been owned and operated by the Dominion Government. In 1903 the Dominion Government undertook the construction of the National Transcontinental Railway from Moncton, N.B., to Winnipeg, to be leased to the Grand Trunk Pacific Railway Co. for a period of 50 years. However, as a result of the conditions arising from the Great War, the company was unable to take over the operation of the road when completed in 1915. The Government itself undertook its operation and was also obliged to lease the Lake Superior branch of the Grand Trunk Pacific Railway, which was isolated from the main line. A number of eastern branch lines have been acquired in recent years, including: the New Brunswick and Prince Edward Island Railway which forms the mainland connection of the Prince Edward Island car ferry, the International Railway, the Moncton and Buctouche Railway, the Salisbury and Albert Railway, the St. Martin's Railway, the Elgin and Havelock Railway, the

York and Carleton Railway, the Quebec and Saguenay Railway, the Caraquet and Gulf Shore Railway, the Lotbinière and Mégantic Railway and the Cape Breton Railway. The Saint John and Quebec, and Inverness Railways, which had been operated under lease, were purchased in 1929, together with the Kent Northern, the Atlantic, Quebec and Western, the Quebec Oriental and the Quebec, Montreal and Southern. The Hudson Bay Railway, which had 332.5 miles of steel rail at the end of 1920, was declared to be comprised in the Canadian Government Railways, and until 1926 was operated to a limited extent by the board of directors of the Canadian National Railways. In that year, as a result of the decision to complete the road, it was returned to the Department of Railways and Canals until completed. The eastern terminus was transferred from Nelson to Churchill, and the line rehabilitated and extended through to Churchill. Construction of wharves and a grain elevator was completed in time to allow two cargoes of wheat to be shipped to Europe in September, 1931. To Mar. 31, 1934, the total cost of this railway was \$32,090,577 and of terminal work at Churchill \$12,900,635, exclusive of the expenditures of \$6,240,201 on the terminal at Nelson, some of which was salvaged.\*

Table 18, from the Annual Report of the Department of Railways and Canals, shows Dominion Government investments in the Canadian Government Railways and other lines to Mar. 31, 1934.

\*These figures of total cost include deficits from operations during construction.

### 18.—Government Investments in Railways to Mar. 31, 1934.

**The Consolidation and Organization of the Canadian National System.\***

—In pursuance of an Act of 1917 (7-8 Geo. V, c. 24), the Government acquired the capital stock of the Canadian Northern Railways with a mileage of 9,566.5. The insolvency of the Grand Trunk Pacific led to the appointment of the Minister of Railways as receiver on Mar. 9, 1919, and in October, 1920, the road was transferred to the Canadian National Railways. The Grand Trunk Railway was acquired under c. 13 of the Statutes of the second session of 1919, providing for arbitration of the considerations to be given to its shareholders. This arbitration finally disposed of, steps were taken to consolidate the various railways under government operation and control. In October, 1922, the Grand Trunk Board and the Canadian Northern Board gave place to a single Canadian National Board, to which the former Canadian Government Railways were turned over for management and operation. The unification of the Grand Trunk and Canadian National Railways was provided for by Order in Council of Jan. 30, 1923, which also brought into effect the Act to incorporate the Canadian National Railway Co. and respecting Canadian National Railways (c. 13, 1919). This was followed, on Feb. 5, 1923, by an Order in Council establishing the head office of the Canadian National Railways at Montreal, Que.

**Operation of the Canadian National Railways.**—The Canadian National system's steam mileage at Dec. 31, 1933, including lines in the United States but exclusive of the Northern Alberta Railways and Toronto Terminals Railway (which

\*For further details of the acquisition of the Canadian Northern, Grand Trunk Pacific and Grand Trunk Railways by the Dominion Government, see pp. 602-603 of the 1926 Year Book.

are controlled jointly by the Canadian National and the Canadian Pacific Railways), was 23,750.03. Including the Thousand Islands Railway, 4.51, and the Muskegon Railway and Navigation Co., 5.25, controlled but separately operated, the total steam mileage was 23,759.79. Including 121.11 miles of electric lines, the grand total was 23,880.90.

The Maritime Freight Rates Act (17 Geo. V, c. 44), effective July 1, 1927, ordered that the accounts of the Canadian National lines east of Lévis and Diamond Junction, Quebec, be kept separate from those of the remainder of the Canadian National system. These lines were designated the "Eastern Lines" of the Canadian National Railways. The Act ordered that specified freight rates on the Eastern Lines be reduced by 20 p.c. Other railways were allowed to make similar reductions in their freight rates in that territory and to bill on the Board of Railway Commissioners of Canada for the difference in freight receipts due to such reductions. The Government contributions to the deficits of the Eastern Lines are shown in Table 22. The differences between the reduced rates and the normal rates are treated as revenues by the Canadian National Railways and paid by the Dominion Government. The total paid to privately-owned railways under the Act was \$421,655, \$828,893, \$811,149, \$861,195, \$669,673, \$508,233 and \$611,130, respectively, for 1927-33.

For operation the Canadian National Railways system is divided into five divisions: the Atlantic division, including all lines east of Rivière du Loup and Monk, Quebec, 3,339 miles; the Central division, west from these stations to Port Arthur and Armstrong and south to Portland, Maine, 7,529 miles; the Western division, all lines west of Port Arthur and Armstrong including the line to Duluth, 11,419 miles; the Grand Trunk Western, all lines in Michigan, Indiana and Illinois, 1,008 miles; and the Central Vermont from Iberville, Quebec, to New London, Connecticut, 455 miles.

The Quebec Bridge across the St. Lawrence above Quebec city, with a main span of 1,800 ft., carrying a single track railway and accommodation for motor and pedestrian traffic, forms a connecting link in the Canadian National Railways system and is operated as a part of it.

Table 19 shows some of the more important train traffic statistics of Canadian National Railways operation for the years 1932 and 1933.

<sup>1</sup> Excludes electric lines.

<sup>2</sup> For detailed statistics of the operation and finances of the Canadian National Railways during 1933 see the annual report of the Department of Railways and Canals for the fiscal year ended Mar. 31, 1934, and Steam Railway Statistics, 1933, published by the Dominion Bureau of Statistics, also the annual report of the Canadian National Railways.

<sup>3</sup> Work service excluded.

**Operating Finances of the Canadian National Railways.**—In Table 20 "Canadian Lines" include those of the Canadian Northern system, the Grand Trunk Railway of Canada, the Grand Trunk Pacific and the Canadian Government Railways. The "United States Lines" include those lines known as the New England line, the Grand Trunk Western, the Duluth, Winnipeg and Pacific and the Central Vermont from Feb. 1, 1930. The Hudson Bay Railway was returned to the Government while under construction, and appropriations, etc., for this were not included with the 1926 and later data. The Maritime Freight Rates Act necessitated the segregation of the Eastern Lines, which were kept separate from July 1, 1927, but as a result of the "Duff Report" are again included with those of the Canadian Lines.

Gross revenues, operating expenses and net revenues shown in Table 20 include only those from steam railway and commercial telegraph operations, but the deficits are for the entire system, including the operating results of the Niagara, St. Catharines and Toronto Railway (electric) and other railways operated separately, hotels, commercial telegraphs, coastal steamships and all other outside operations.

Up to 1928 there was a marked improvement over the results of the first year after consolidation (1923), when the deficit, including profit and loss adjustments, was \$54,634,322, but the light traffic in 1932 so reduced gross revenues that, with increased interest charges, the deficit increased to \$101,335,074. It was reduced slightly in 1933 to \$97,651,957.

The figures of Table 20 are taken from the accounts of the railways as at Dec. 31, 1933. Adjustments have been made which result in minor changes in the items of interest and deficits for former years.

<sup>1</sup> Includes Central Vermont Railway from Feb. 1, 1930.  
<sup>2</sup> Revenues and expenses 1923-27, adjusted to include commercial telegraph lines to be comparable with 1928-33. <sup>3</sup> The deficit shown is as per the accounts and includes Government interest accounting adjustments of \$12,199,307 and appropriation for insurance fund of \$9,634,306, the actual cash deficit for the period being \$282,004,297, as shown in Table 22. <sup>4</sup> Interest at 4 p.c. on \$34,927,998 G.I.P. debenture stock reduced under agreement to 2 p.c.

**The Debt and Interest Charges of the Canadian National Railways.—**

Table 21 analyses the increase in the debt and interest charges of the system, including both Canadian and United States lines. The table shows to whom the liabilities which have accumulated up to the end of 1933 and the new funds available each year are payable. To define clearly what is included under debt due to the Dominion Government in Table 21, the appropriations for the Canadian Government Railways have been separated from the loans and advances to the remainder of the system. The Canadian Government Railways include the Intercolonial, National Transcontinental, Prince Edward Island and several other smaller railways in the Eastern Provinces, together with the Quebec Bridge. The Hudson Bay Railway was included in the Canadian Government Railways until 1926, when it was transferred back to the Department of Railways and Canals for completion, and appropriations on its account were deducted. These Canadian Government Railways appropriations do not include the operating deficits of the Canadian Government Railways for 1919 and subsequent years nor the deficits of other portions of the Eastern Lines since July 1, 1927, but include investments for construction, purchase and working capital of the Canadian Government Railways. As the book value of these properties is included on the assets side of the balance sheet, the cost of these roads to the Dominion is included in the liabilities of the system as an offset. The construction or purchase of these roads was financed by the Dominion from the Consolidated Revenue Fund, and consequently no interest on such expenditures is allowed for in the railway accounts.

In a rather different class are the loans and advances made by the Government to the Canadian National Railways or constituent companies on notes, bonds and receiver certificates with accrued simple interest ranging from  $3\frac{1}{2}$  to 6 p.c. In computing the public debt of Canada the Finance Department considers these railway loans and advances as "non-active assets" similar to investments in canals, public works, etc., and as such does not subtract them from the gross debt in computing the net debt; also, no interest is charged by the Finance Department on the railway advances. The railways, however, debit their accounts with the accrued interest on these Government advances, all of which remains unpaid.

The debt due to the public includes debenture stock maturing and perpetual, and bonds and mortgages of the constituent railways, but does not include the capital stock of the Grand Trunk Railway held by the Government, nor the cost of acquiring the same. Likewise it does not include the capital stock of the Canadian Northern system. The stock of the Grand Trunk Pacific is all held by the Canadian National system and is therefore not included either.

Table 22 analyses the capital received by the Canadian National Railways. In addition to the funds available under long-term debt, as shown in Table 21, the railways have frequently had short-term loans. Table 22A shows how the capital thus made available has been expended.

21.—Long-Term Debt of Canadian National Railways (Including Appropriations for Canadian Government Railways), Showing Principal Outstanding at ends of calendar years 1923-33, and New Funds Raised, calendar years 1923-33.  
PRINCIPAL OUTSTANDING AT END OF EACH YEAR.

|                            |                                |                                                                                                     |                               |                                    | 786,176,643            |

<sup>1</sup>Includes 1932 deficits paid in 1933 but not the following portions of 1933 deficits paid in 1934: Eastern Lines \$688,777; Canadian National \$12,291,921; total \$12,975,698. <sup>2</sup>Excludes accounting adjustments and appropriations for insurance fund—(see note 3, Table 20). <sup>3</sup>Excludes transfer of \$31,583,630 investment in Central Vermont Lines transferred from "Investments in Affiliated Companies" to "Investment in Road and Equipment" in 1930 accounts, also transfer of \$30,571,817 for Canadian Government Railways property transferred per note 12 of Table 21, \$17,827,041 for retirement of abandoned lines, principally duplicate lines of Grand Trunk Pacific and Canadian Northern, west of Edmonton, held in suspense until 1930, \$3,021,486 for Toronto Suburban Railway for which a receiver was appointed in 1931, and other miscellaneous additions and deductions. <sup>4</sup>See note 6 for transfer to "Investment in Road and Equipment".

The figures given in Tables 22 and 22A differ from the figures given in the annual reports of the railways by reason of certain accounting adjustments (not representing new funds or expenditures) entered into the accounts during the period but excluded therefrom. It should be noted, therefore, that the total cash deficit of \$282,004,297 for the period 1923-33 does not include \$12,199,307 of accounting adjustments and \$9,634,306 appropriated for investment in the Insurance Fund. If these items are included, the total deficit for the eleven-year period is \$303,837,909 as shown in Table 20.

Table 23 has been compiled to reconcile the investments in and loans to the Canadian National Railways (including Canadian Government Railways) as shown in the Public Accounts for the fiscal year ended Mar. 31, 1934, with the debt to the Dominion Government shown in the railway's balance sheet, Dec. 31, 1933. The last section of the table shows the adjustments to the statement in Public Accounts which make up the difference.

Table 24 shows the assets of the Canadian National Railways at Dec. 31, 1922, and at Dec. 31, 1933, with the increase or decrease for the eleven-year period.

**23.—Adjustments Accounting for Difference in Railway Obligations as shown by Public Accounts, Mar. 31, 1934, and by Canadian National Railways Balance Sheet, Dec. 31, 1933.**

FROM PUBLIC ACCOUNTS, MAR. 31, 1934.

### PART III.—ELECTRIC RAILWAYS.\*

The cheap and reasonably rapid conveyance of human beings is a necessity of modern urban life. One important means by which this necessity is supplied throughout Canada is the electric street railway, generally operated by the hydro-electric energy which is so important a feature of Canadian economic life.

**Historical.**—Replacing the horse-car systems, used in Montreal and Toronto as early as 1861, electric street railways were first seen in operation in Canada in 1885, when a successful experimental railway was constructed and operated at the Toronto Exhibition grounds. Before many years their safety and convenience resulted in the discarding of the older system. An electric system 7 miles in length was opened at St. Catharines in 1887, using the double overhead trolley. The second electric railway in Canada commenced operations in Vancouver, in June, 1890. This was followed by the completion of the Ottawa Electric Railway in 1891, and the electrification of the Montreal and Toronto systems in 1892. The

\* Revised and checked by G. S. Wrong, B.Sc., Chief of the Transportation and Public Utilities Branch of the Dominion Bureau of Statistics. This Branch publishes an annual report on Electric Railways in Canada.

street railways of other eastern cities were generally electrified during the 1890's, while in the newer western cities electricity was used from the commencement. In the cities of Eastern Canada, electric street railways are generally operated by private companies under city franchises, while in a considerable number of cities in Ontario and the West the street railways are owned and operated by the municipalities, a fact indicated in Table 28. In 1921, on the expiry of the 30-year franchise of the Toronto Street Railway Co., the railway in this second largest city of Canada was taken over by the city and is now being operated by a transportation commission.

Many difficulties are met in operating the cars during the winter season, owing to snow. This, however, has been overcome by the use of sweepers, scrapers and ploughs. The single overhead trolley system has been found the most suitable and is in general use. During the past few years an increasing number of motor buses have been used; in 1924 only 48 were operated, but by 1933 the number had increased to 531.

In addition to street railways in the cities there are several systems serving suburban areas and also doing an interurban business, but this latter class of service is fast being supplanted by motor bus service.

**Development of Electric Railway Traffic.**—Figures for the year 1893 show that 30 companies, with a paid-up capital of about \$9,000,000, operated 256 miles of railway. By 1897, 35 companies made returns showing 583 miles of track, 1,156 cars, 26,431,017 miles run, 83,811,306 passengers carried and capital of \$18,727,355. In 1904, 44 companies showed 766 miles of track, 2,373 passenger cars, 42,066,124 car miles run, 181,689,998 passengers and capital of \$50,399,188. The statistics for 1933 show that during that year 41 companies with a capital of \$200,098,870, had 1,864 miles computed as single track, 3,773 passenger cars, 531 buses, 298 freight cars and 45 electric locomotives, 119,162,796 car miles run, and 585,385,094 fare passengers. The number of employees in the service of electric railways on Dec. 31, 1933, was 14,883, as compared with 15,961 in 1932. Total salaries and wages for the year 1933 were \$18,692,236, as against \$21,534,419 in 1932.

**Statistics of Electric Railways.**—Summary statistics of the operation of electric railways in Canada from 1911 to 1933 inclusive are given by years in Table 25. It may be noted in this table that the carriage of freight reached its maximum in 1928, with 3,888,672 tons, while the number of fare passengers carried in 1929 reached a new record of 833,496,866, decreasing in 1933 to 585,385,094. In Table 26 statistics of mileage and equipment are given for the latest four calendar years, and statistics of the capital liability of electric railways are furnished for the years 1908-33 in Table 27. Detailed figures of the mileage operated, the capital liability, the earnings, operating expenses, passengers carried, employees and salaries and wages, are given for 1932 and 1933 in Tables 28 and 28A, while Table 29 shows by years from 1919 to 1933 the number of passengers, employees and others killed and injured on electric railways in Canada.

### 25.—Summary of Statistics of Electric Railway Operation, years ended June 30, 1911-19, and calendar years 1919-33.

Norm.—For figures for 1901-10, see p. 676 of the 1933 Year Book.

## PART IV.—EXPRESS COMPANIES.\*

"Express service is an expedited freight service on passenger trains". But express companies do not own the means of performing their services; they use railway facilities by virtue of contracts with the railway companies. Express companies in Canada have had close relations with the railways practically from the beginning. A brief history of the various express companies will be found on pp. 611-612 of the 1926 Year Book.

Before 1915, an express company in Canada was not liable for delay or damage caused by anything quite beyond its control, thus maintaining itself as an entity separate from the railway company. Thenceforth an express company became liable for delay or injury of goods if either was caused by the railway company in whose cars the goods were being carried.

Goods are sent by express for quick transit, so that express rates do not compete with freight rates. Thus in its first tariff the Dominion Express Co., in pursuance of its contract with the Canadian Pacific Railway, gave a rate of  $2\frac{1}{2}$  times the maximum first-class railway freight rate for the same goods carried the same distance. The majority of the contracts between express and railway companies for carrying express freight are on the basis of a percentage of the gross express revenue. The rates are subject to the approval of the Board of Railway Commissioners.

**Express Company Operations.**—During 1933, the latest year for which the statistics of the Transportation Branch of the Dominion Bureau of Statistics are available, there were three Canadian and one American express organizations operating in Canada. The Canadian Pacific Express Co., formerly the Dominion Express Co., is a subsidiary of the Canadian Pacific Railway and handles the express business on the railways and the inland and ocean steamship lines of the parent company. The express business of the Canadian National system is handled by a department of the railway. When the Central Canada, the Edmonton, Dunvegan and British Columbia and the Alberta and Great Waterways railways were amalgamated to form the Northern Alberta Railways Company, the express business was handled by a department of the new company from Nov. 1, 1929. The Railway Express Agency, Inc., operates over the Canadian sections of United States railways and over the route from Skagway to points in Yukon. These companies are all organized under powers conferred by Acts of the Dominion Parliament and their business consists in the forwarding of parcels, the transfer of baggage and the issue of money orders, travellers cheques, letters of credit and other forms of financial paper. The total capital liabilities of the three Canadian companies and departments stood at \$6,244,173 on Dec. 31, 1933.

Statistics of the receipts and expenses of express companies in Canada are given in summary form for all companies for the years 1919 to 1933 in Table 30, and for each company for the years 1932 and 1933 in Table 31. In these tables the amounts paid by express companies to the carriers, *i.e.*, railways, steamship lines, etc., for transporting the express matter, are shown under the heading "express privileges". Table 31 also shows the mileage operated by each company in 1932 and 1933. Of the total of 62,405 miles, 42,471 were over steam railways, 279 over electric railways, 14,227 on ocean steamship services (mainly by the Canadian Pacific lines), 5,176 miles on inland or coastal steamboat routes and 252 miles over other carriers.

\*Revised and checked by G. S. Wrong, B.Sc., Chief of the Transportation and Public Utilities Branch of the Dominion Bureau of Statistics. This Branch issues an annual report on Express Statistics.

**30.—Summary Statistics of Revenues and Expenses of Express Companies, calendar years 1919-33.**

NOTE.—Similar figures for the years ended June 30, 1911-19, were published at p. 673 of the 1927-28 Year Book.

| Calendar Year. | Gross Earnings. | Operating Expenses. | Express Privileges.    | Net Operating Revenue. |
|----------------|-----------------|---------------------|------------------------|------------------------|
|                | \$              | \$                  | \$                     | \$                     |
| 1919.....      | 24,933,219      | 13,227,652          | 12,936,615             | -1,231,048             |
| 1920.....      | 30,512,504      | 16,120,880          | 16,009,460             | -1,617,836             |

## PART V.—ROADS AND HIGHWAYS.\*

**Historical.**—The early roads were auxiliary to water routes as avenues of transportation. They were used during the summer season, when portages were necessary to avoid obstacles to river and lake travel, and during the winters, when ice prevented navigation. Even the extensive system of waterways of Eastern Canada was an inadequate means of communication between points of settlement in a rapidly growing colony, and the need for overland routes manifested itself in the introduction of the system of common roads which prevailed under the old *régime*. Not only did the crude early roads serve the needs of the settlers, but also those of the British, French and American armies during the numerous campaigns. Soldiers were frequently employed, in times of peace, on road construction in different parts of Upper and Lower Canada.

The first important highway in Canada extended along the north shore of the St. Lawrence from Quebec to Montreal, being gradually completed with the growth of the French settlements. In Upper Canada, one of the earliest roads (Yonge St.) was that from Toronto to lake Simcoe, completed in 1794 under the direction of Governor Simcoe, the work being done by the Queen's Rangers. This road not only gave access to the area north of Toronto, but also provided a more convenient route than that of the Ottawa river from the trading posts on the Upper Lakes to the centres of population along the St. Lawrence. Montreal was joined to Kingston by road in 1816, and in the following year to Toronto. Thereafter, other highways to inland settlements, from points served by water routes, began to increase in number, as it became apparent that they were essential to the commercial life of the country for transporting supplies to the settlers and bringing their products to the central markets of the colony. The system of posts, which had been established about the beginning of the nineteenth century, necessitated passable routes between the various points, and by 1827 a through road was available between Halifax and Amherstburg, comprising for the most part the old Kempt road, the York road, Dundas street and the Baldoon road. From this trunk line of communication branch roads extended north and south to the more important centres of population in the two Canadas. The cost of construction of these roads was high, and travel by stage coach was tedious and costly. As late as 1850 some points in central Ontario were still inaccessible to any vehicle. Later years, however, have brought with them improved methods of construction and a resulting reduction in expenses, together with an improvement in the wearing qualities of the more important highways.

**Recent Highway Development.**—The growth of motor traffic during and since the War has greatly stimulated the movement for increased and improved road construction. Good roads associations assisted by the automobile clubs are to be found in most of the provinces for the education of the public in the need for improved highways. With the rapid increase in the percentage of motor car owners to the population (see pp. 737-738) the demand for improved roads became insistent after the War. Furthermore, the advantages to be gained by attracting touring motorists have been a powerful incentive to governing bodies to improve trunk roads and scenic highways within their jurisdictions. One sphere where the motor car has been of special economic advantage has been in rural areas, where its speed and economy are a great improvement over the old horse-drawn vehicle.

\*Revised by G. S. Wrong, B.Sc., Chief of the Transportation and Public Utilities Branch of the Dominion Bureau of Statistics, which publishes an annual report entitled "Highways and Motor Vehicles in Canada".

As a result, in the Census of 1931 every second farm reported a farm-owned motor vehicle (1.96 farms per farm-owned motor vehicle). This widespread rural ownership of automobiles has resulted in the improvement of secondary rural roads.

A table of road mileage in Canada follows. These roads do not include those within the boundaries of urban municipalities and average about one mile of road for each 10 rural inhabitants or for each 26 persons, both rural and urban. There are great stretches of country in the northern portions of Quebec, Ontario, the Prairie Provinces and British Columbia with very few people and very few roads, but the southern portions are well supplied. A Trans-Canada highway is now under construction, running from the Atlantic to the Pacific oceans entirely in Canadian territory.

### 33.—Classification of Canadian Highways, by Provinces, Dec. 31, 1933.

| Province.                       | Unimproved.    | Improved Earth. | Gravel.       | Water-bound Macadam. | Bituminous Macadam. | Bituminous Concrete. | Cement Concrete. | Total.                     |

<sup>1</sup> Manitoba and Saskatchewan figures are as at April 30, 1934. <sup>2</sup> B.C. figures are as at Mar. 31, 1933.

<sup>3</sup> Includes 156 miles of other classes.

The great improvement indicated above in the extent and character of Canadian highways has entailed the expenditure of large sums by governing bodies, chiefly provincial or municipal authorities, as roads are under their jurisdiction. Unfortunately, there are no comprehensive or comparable statistics available regarding these expenditures prior to 1928. Expenditures by the Dominion Government have taken the form of subsidies to the provinces for specific highways and have been made under the Canada Highways Act, 1919, largely in the few years immediately after the War, and under relief legislation during the present depression to aid in providing useful employment. These subsidies paid in the years 1931-33 are shown in Table 34.

**The Canada Highways Act.**—Partly in response to the general demand for improved highways and partly to increase civilian employment at the end of the War, the Dominion Parliament, by c. 54 of the Statutes of 1919, authorized the expenditure of \$20,000,000 for the purpose of constructing and improving the highways of Canada during the five years succeeding the passage of the Act. In its apportionment, grants of \$80,000 were made to each province during each of the five years, the remainder being allotted in proportion to their respective populations. By c. 4 of 1923 and c. 4 of 1925 the operation of the Act was extended to April 1, 1928. A table on p. 669 of the Canada Year Book, 1929, shows the working of the Act and the allocation of expenditure as between the Dominion and the various provinces down to Mar. 31, 1928, by which time the grant had been expended. Road projects subsidized under the Act amounted to 8,753 miles with an estimated subsidizable cost of \$49,581,192.

**Road Expenditures by Provinces and Municipalities.**—Table 34 presents the available statistics of expenditures on highways in the latest five years. However, the limitations of the statistics in this table should be clearly realized. These expenditures cover only national and provincial highways, secondary highways and other important roads to which the Provincial Governments contribute, together with the bridges or ferries necessary to such highways. The figures do not include expenditures on roads or streets within urban municipalities, nor expenditures by rural municipalities on local roads to which no contribution is made by the Provincial Governments. Expenditures for both construction and maintenance of municipal roads receiving subsidies are often made over and above the amounts upon which subsidies are granted and these extra expenditures are not included. Although the record of expenditures on roads by municipalities is incomplete, the principal highways, which are the expensive roads to construct and maintain, are under provincial jurisdiction, so that only a small percentage of the total expenditures is omitted. In the Maritime Provinces all road expenditures are made by the Provincial Governments.

**34.—Capital and Maintenance Expenditures on Provincial Highways or Provincially Subsidized Highways in Canada, calendar years 1929-33.**

**Provincial Funded Debt Incurred for Highways.**—Table 35 shows the funded debts of the provinces outstanding at Dec. 31, 1932 and 1933, incurred for highway development. These amounts should not be confused with estimates of the total investment in highways. The cost of constructing a new road is considerably greater than that of putting a permanent surface on an old road; the latter has been the purpose of much of the provincial expenditure.

The maintenance expenditures by the Provincial Highway Departments during 1933 amounted to \$13,117,735, while the annual charges for highway debt were \$23,768,656, a total provincial charge of \$36,886,391. The provinces collected \$48,209,587 in licences, gasoline taxes, tolls, etc., in connection with highway traffic. While these left an apparent surplus of \$11,323,196, no provision was made for the cost of administering highway and motor vehicle departments, for traffic patrols, nor for adequate retiring charges on capital expenditures.

**35.—Provincial Government Funded Highway Debt and Annual Charges thereon, Dec. 31, 1932 and 1933.**

NOTE.—New Brunswick and Ontario as at Oct. 31, Manitoba and Saskatchewan as at April 30, 1933 and 1934. Other provinces as at Dec. 31.

## PART VI.—MOTOR VEHICLES.

The earliest motor vehicles were propelled by steam, the history of the gasoline motor car commencing with the successful construction of a gasoline engine by Daimler in 1884. Until 1900 France remained the headquarters of the industry, possessing in that year more than half of the 10,000 cars in operation in Europe, while in the United States the number of cars was only about 700. Shortly afterwards, the development of the Ford car resulted in a keen competition to bring motor cars within the reach of the average man, profits being secured from large production rather than high prices. Detroit became the centre of the automobile industry of the United States and the Canadian side of the Detroit river became the headquarters of the Canadian industry. As a consequence, the population of the border towns Windsor, Walkerville and Sandwich greatly increased between 1911 and 1921, while the town of Ford (now East Windsor), which had no existence in 1911, had 5,870 inhabitants in 1921 and 14,251 in 1931, when the aggregate for the "Border Cities" was 98,179. Problems of regional location have resulted, during more recent years, in a gradual shifting of the centre of the industry, and the Toronto and Oshawa districts now rival in importance the older established centre on the Detroit river.

Like many other inventions, the motor car commenced as a toy, then became a luxury of the rich, while now it ranks as a necessity of life to a large proportion of the population. In the past few years, the motor truck and the motor bus have assumed considerable economic importance, and are separately classified in Table 37.

Up to the present the motor vehicle has affected the passenger traffic of the steam and electric railways more than the freight. Thirteen inter-urban and ten urban electric railways have ceased operation since 1926, and passenger traffic on the smaller electric railways and on the steam railways has declined during the last decade instead of increasing with increased population. This diversion of passenger traffic has been effected largely by the private automobile, although the motor bus is rapidly becoming more important and is now operating between all large centres. The motor truck is also carrying an increasing amount of freight, although no statistics showing the tonnage handled are as yet available.

The automobile manufacturing industry in Canada has made very rapid growth since its beginning about the year 1905, two of its chief tendencies during the period having been a consolidation of smaller firms into large units and the adoption of large-scale methods of production, similar in many ways to those of the United States' industry. A brief statement of its history, with statistics of production, etc., is to be found on pp. 432-436 of the Canada Year Book, 1924, while more recent statistics of production will be found in the Manufactures chapter of this volume. (Chapter XIV.)

### Section 1.—Statistics of Motor Vehicle Operation.\*

**Registration.**—The increase in the use of motor vehicles in Canada has been very rapid. In 1904 the number of motor vehicles registered in Ontario was only 535. In 1907, 2,130 motor vehicles were registered in six provinces and in 1908, 3,033 in eight provinces, the motor car being at that time prohibited in Prince Edward Island. From these small beginnings Table 36 shows an increase to 1,232,486 motor vehicles by 1930. For the last three years decreases have been recorded. In Table 37 the numbers of motor vehicles registered in 1932 and 1933 are given by provinces, classified as passenger cars, commercial cars or trucks, motor buses and motor cycles.

The average population per vehicle registered was 9.9 in 1933. Canada ranked fourth in this respect, the United States being first with 5.3. On the basis of the total registration of 1,114,503, only three countries had larger numbers in 1932, *viz.*, United States, 23,827,290; France, 1,890,174; and Great Britain and Northern Ireland, 1,725,025.

\*Revised by G. S. Wrong, B.Sc., Chief of the Transportation and Public Utilities Branch of the Dominion Bureau of Statistics. The subject is treated in greater detail in "Highways and Motor Vehicles in Canada", published annually by this Branch.

### 36.—Numbers of Motor Vehicles Registered in Canada, by Provinces, calendar years 1907-33.

NOTE.—The numbers of motor vehicles in Yukon are included in the totals for Canada, 1914-33.

<sup>1</sup>Includes taxicabs.

<sup>2</sup>Includes tractors, road machines, flushers, and municipal fire engines, etc., in Ontario and Quebec.

<sup>3</sup>Revised to exclude dealers' cars and include road tractors.

**Government Revenue.**—The taxation of motor vehicles, garages, chauffeurs, etc., is becoming a lucrative source of Provincial Government income. In every province the operation of automobiles and motor cycles is dependent on carrying licences duly issued by the various authorities, while similar licences permit the maintenance of garages and the driving of cars or trucks by hired chauffeurs. Perhaps the most recent form of levy on the use of motor vehicles is the gasoline tax, which has been assessed in all provinces since May 1, 1928. The following table shows the provincial revenue for the years 1932 and 1933, indicating, at the same time, the more important sources from which it is derived.

**38.—Provincial Revenues from the Taxation of the Distribution and Operation of Motor Vehicles, for the years 1932 and 1933.**

| Province.                  | Passenger Cars.   | Trucks.          | Motor Cycles. | Dealers' Licences. | Operators and Chauffeurs. | Mileage Tax on Motor Buses and Trucks. | Gasolene Tax.     | Total, including Miscellaneous Revenue. |

<sup>1</sup>Revenue figures for Ontario are for fiscal year ended Oct. 31. <sup>2</sup>No gasoline tax.

**Apparent Consumption of Automobiles in Canada.**—The apparent consumption of motor cars in Canada in any year may be computed by deducting the number of cars exported from the sum of the production and imports. In 1933 production totalled 65,852 cars and imports amounted to 1,781, making an available supply of 67,633 cars, but as exports aggregated 20,900 units, the apparent consumption was 46,733 cars.

Table 39 shows the statistics worked up on this basis for the years 1917 to 1933. Prior to 1925 the figures of apparent consumption do not show a pronounced trend but between 1925 and 1929 they increased substantially. From 1929 to 1932 the decrease was rapid and continuous but was practically halted in 1933, in which year production showed some improvement but mainly on account of the export demand.

## 39.—Apparent Consumption of Automobiles in Canada, 1917-33.

## Section 2.—Motor Vehicle Acts and Regulations.\*

In all provinces a motor vehicle must be registered and each person who operates a car must be licensed as a chauffeur, an operator, or a beginner. The following is a brief synopsis of the regulations in force in each province.

**Prince Edward Island.**—Under the Highway Traffic Act, 1930, and Regulations, all cars must be registered in the office of the Provincial Secretary. In addition to a registration fee of \$2.50 for cars not previously registered in the province and a marker fee of \$1, an annual tax of 50 cents per 100 pounds weight is payable on Mar. 1, but is not required of non-residents if the Province or State of origin grants exemptions to Prince Edward Island privately-owned passenger motor vehicles. Every car must have a lock or other device to prevent it from being operated when left unattended. The speed limits are: in cities, towns and villages 15 miles an hour; on approaches to steep descents, bridges, or highway crossings 10 miles an hour; on roads outside cities or incorporated towns on which the driver has not a clear view for at least one hundred yards free from turns and intersections 15 miles an hour; and in other places a speed reasonable and proper.

**Nova Scotia.**—The Motor Vehicle Act requires cars to be registered by the Motor Vehicle Branch, Department of Highways, which issues permits renewable annually on Jan. 1, but usually extended to Mar. 31. Cars belonging to persons residing outside of Nova Scotia need not be registered, if registered where the owners reside and operated for private use. This privilege is given for not more than three months in each year. If owners come into the province to reside permanently or to carry on business, they must register. Every person who operates a motor vehicle must be licensed as a chauffeur, an operator, or a beginner. Motor vehicles must be equipped as provided in the Uniform Vehicle Code. There is no set speed limit. The rate of speed must be reasonable and proper, and 20 miles per hour is *prima facie* reasonable and proper in a residential district, at intersections, passing schools, etc., and 40 miles per hour is *prima facie* reasonable and proper in open country. Commercial motor vehicles having a gross weight in excess of 4,000 lb., are limited to a maximum speed of 25 miles per hour.

\*The information in this Section has been revised by the officials in charge of the administration of Motor Vehicle Acts and Regulations in the different provinces.

**New Brunswick.**—Under the Motor Vehicle Act, 1934, the registering and licensing authority is the Motor Vehicle Branch, Department of Public Works. An operator of a motor vehicle must carry a driver's licence. Cars must be registered each year and, besides the registration fee, an annual fee is payable on Jan. 1. A non-resident tourist may not, without registering in New Brunswick, operate a car registered in another Province or a State during more than 90 days in any year or such shorter time as is reciprocally granted in the Province or State in which the tourist's vehicle is registered. The speed of a motor vehicle must not be greater than is reasonable or proper having due regard to the traffic and use of the highway or such as to endanger life or property. Commercial vehicles must not exceed 30 miles per hour. Penalties may be suspension of driver's licence and fine or imprisonment.

**Quebec.**—The law regarding motor vehicles is contained in the Quebec Revised Statutes, 1925, c. 35. Cars must be registered in the Office of the Provincial Treasurer and re-registered annually on Mar. 1. Certain government and municipal cars and farm tractors are given free registration, while exemptions are made in the case of pleasure cars registered in other provinces and certain commercial vehicles, but only in cases specified in Article 10 of the Act. Cars must have mufflers and, when left unattended, must be locked in such a way as to prevent operation. The speed limits are: in cities, towns and villages, 20 miles an hour; on highways where the land is closely built up, 20 miles an hour; and in open country, 30 miles an hour. Motor vehicles must be stopped before proceeding over a railway crossing. Motors must stop for street cars which are standing to take on or discharge passengers, and must reduce the speed to 16 miles an hour when meeting another vehicle. These rates have reference to pleasure cars only. In the case of a commercial vehicle having non-pneumatic tires, a speed of 8 miles an hour when loaded and 10 miles an hour when unloaded is allowed. When equipped with pneumatic tires the corresponding rates are 12 and 15 miles an hour. Motor buses are allowed a speed of 30 miles an hour in open country.

**Ontario.**—In this province the Highway Traffic Act, under the administration of the Motor Vehicles Branch of the Department of Highways, regulates the operation of motor vehicles on the highways. Motor vehicle permits and drivers' licences are issued for the calendar year. Vehicles owned by residents of other provinces who do not reside or carry on business in Ontario for more than three consecutive months in each year may be operated in Ontario without Ontario registration plates. Passenger cars registered in the United States may be operated in Ontario without Ontario plates for thirty days in any one year. The speed limit in cities, towns and villages is 20 miles an hour; in open country, 35 miles an hour. At intersections, level railway crossings and where the view of the driver is obscured, the speed allowed is 10 miles within and 15 miles outside of cities, towns and villages. Vehicles must not pass street cars which are stationary for the purpose of taking on or discharging passengers. At intersections the motor vehicle on the right has the right of way and before entering or crossing a through highway a vehicle must be brought to a full stop. A motor vehicle must be equipped with non-glare headlights, muffler, windshield wiper and mirror. Under Part XIII of the Act a person convicted of certain serious offences in connection with the operation of motor vehicles or a person against whom an unsatisfied judgment is outstanding is required to file proof of his financial responsibility. All accidents resulting in personal injury, or property damage apparently exceeding \$50, must be reported to the nearest provincial or municipal police officer.

**Manitoba.**—Under the Highway Traffic Act, 1930, cars must be registered in the office of the Municipal Commissioner, and registration is renewable annually on Jan. 1. On April 1,  $\frac{2}{3}$  of the annual fee and on Aug. 1,  $\frac{1}{2}$  of the annual fee is payable. All drivers must be licensed. No person, not a resident of the province, may operate without a licence for a period exceeding 30 days from the date of entry, unless the Province or State in which he resides gives reciprocity in this respect. Penalties for driving a car while intoxicated include imprisonment, suspension of driver's licence and impounding of the car. No person may operate a motor vehicle upon any highway or street at a greater speed than is reasonable and proper, having regard to the condition of the highway and the traffic. The onus of proof is on the motorist. No ray of light from any headlight may be thrown in a horizontal direction at a greater height from the ground than 42 inches in front of the motor vehicle when travelling on the highways. The use of searchlights and glare headlights is absolutely forbidden on highways. Number plates must be carried on the front and rear of the vehicles so as to be plainly visible. In the event of an accident the driver involved must render every help possible, and give his name and address to the police officer or, if no officer is at hand, report to the nearest police station or officer. Failure to comply may involve a fine of \$50 or 30 days imprisonment.

**Saskatchewan.**—The licensing authority under the Vehicles Act is the Minister of Highways. Licences expire annually on Dec. 31, and for private vehicles are computed on the wheel base, the minimum fee being \$10, the maximum \$32.50. The licence fee in respect of cars registered on and after Aug. 1 is one-half the annual fee. All motor vehicles except motor cycles must expose two number plates. The registration fee for a motor cycle is \$6. The fee for motor trucks is computed on the gross weight. The owner of every truck to be operated for gain before securing a licence must obtain a permit from the Public Utility Board. Besides two licence plates, he receives two weight plates, embossed with the gross weight for which the licence fee has been paid.

The fee for a chauffeur's licence is \$5. The fee for livery privileges is \$10 more than the fee paid for private licence for the vehicle to be registered. Permits to operate for gain must be obtained from the Public Utility Board. Every driver of a motor vehicle not in possession of a chauffeur's licence must secure an operator's licence.

A non-resident may use his motor vehicle for not more than three months in any year, but a non-resident operating a truck for gain must comply with the Public Utility Board requirements. Cities, towns and villages have authority to regulate speed limits within their boundaries. A loaded truck shall not be driven at more than 25 miles per hour, nor an unloaded truck at more than 35 miles per hour, while no motor vehicle may be driven at more than 35 miles per hour when passing any motor or other vehicle going in the opposite direction. Otherwise, speed is governed by the amount of traffic, the nature, condition and use of the highways. No motor vehicle and its load may have a greater width than 96 inches, while no vehicle may have a length of more than 33 feet, and no combination of vehicles coupled together may have a length of more than 85 feet. The maximum height of a vehicle including its load is 14 feet and the maximum weight of any vehicle and its load must not exceed 20,000 lb. Motor vehicles must stop for street cars which are taking on or discharging passengers. Should a driver on leaving a stopping place in a city or town desire to turn, he may do so only at an intersection of the public highway.

**Alberta.**—The law relating to motor vehicles is contained in the Vehicles and Highway Traffic Act, 1924. The speed limits are: 20 miles an hour in cities, towns and villages; 10 miles an hour at street crossings and bridges; and 30 miles an hour outside cities, towns and villages. A motor car may not pass a street car which has stopped for passengers to get on or off. A resident of any other province of Canada, entering Alberta for pleasure touring for a period not greater than six months, is required to have complied with the motor-vehicle laws of his own province, and on entering Alberta to register with the Provincial Police. Residents of the United States entering Alberta for touring purposes may carry with them their customs certificates in lieu of registration. The Provincial Secretary may revoke or suspend the licence of any chauffeur convicted under the provisions of the Liquor Act of selling or having for sale intoxicating liquor. Provision is made for the impounding of cars where the owners or drivers are convicted of driving cars while intoxicated or convicted under other sections of the Act relating to speeding and juvenile driving. There is provision against the carrying of loaded weapons in an automobile—a preventive measure against accidents during hunting trips.

**British Columbia.**—Under the Motor Vehicle Act and amending Acts, all motor vehicles are to be registered with the Commissioner of Provincial Police. Trailers must also be licensed. Motor vehicles registered outside of the province may be used for touring purposes for any period not greater than that allowed by owner's place of residence to touring motor-vehicles registered in British Columbia and in no case longer than six months providing that their owners obtain non-resident touring permits or carry the customs permits in the case of residents of the United States. All persons driving motor vehicles must carry current driver's licences.

Motor vehicles are to be driven in a careful and prudent manner at all times. The onus is on the driver for driving to the common danger if driving at a greater speed than 20 miles per hour in any city, town or village, or 30 miles per hour outside cities, towns or villages, or greater than the maximum rate of speed stated on signs erected on certain portions of the highway. A motor vehicle may not pass a standing street car at more than 5 miles per hour, if such street car is not taking on or discharging passengers, and must stop at least 10 feet from the passenger exit if such street car is taking on or discharging passengers (in cities where safety zones are provided, motor vehicles are allowed to pass between safety zone and curb at a rate as set by by-law). A motor vehicle must not exceed a speed of 15 miles per hour when passing schoolhouses between the hours of 8 a.m. and 5 p.m. of any day on which school is regularly held, or public playgrounds for children between dawn and dusk. Accidents in which death or personal injury has occurred, or in which loss or injury to property apparently exceeding \$25 is sustained, must be reported to the police.

No person shall ride as a passenger on a motor cycle in front of the person driving or operating the motor cycle. Provision is made for the surrender of drivers' licences upon conviction for an infraction of the Act or Regulations or of Section 285 of the Criminal Code; upon arrest or indictment for manslaughter a driver's licence is suspended. Drivers' and owners' licences of all persons convicted for certain serious offences in connection with the operation of motor vehicles, as well as all persons against whom an unsatisfied judgment for bodily injury or property damage in excess of \$100 is outstanding, are suspended until such time as proof of financial responsibility is furnished by them.

**Yukon.**—The Motor Vehicle Ordinance, No. 14, 1914, with amendments, requires all cars to be registered in the office of the Territorial Secretary, who issues certificates renewable annually on April 1. A non-resident may operate an unregistered motor for not more than 90 days. In cities, towns and villages the speed limit is 15 miles an hour, and 10 miles an hour at street intersections.

## PART VII.—AIR NAVIGATION.\*

During 1933 civil aviation was well maintained. Aircraft are a ready means of obtaining accurate information of conditions in remote and unsettled parts, and provide easy access thereto. Their use in developing and conserving natural resources has increased every year. Air-mail and air-transport lines are in operation in many parts of the Dominion.

Civil aviation in Canada is divided into two classes: (1) civil operations, carried out for other Government Departments under the Royal Canadian Air Force; (2) commercial aviation, under the regulation of the Controller of Civil Aviation. Both are under the Department of National Defence.

**Civil Government Air Operations.**—This branch carried out flying on forest fire patrols, fire suppression, oblique and vertical photography for surveys, transportation, etc., for different Government Departments in various parts of the country.

**Provincial Operations.**—The Ontario Provincial Air Service owns and operates 19 aircraft on forest fire protection, transportation, air photography and sketching in northern Ontario. Operations covered an area of about 800 miles from east to west, and 400 miles from north to south. A total of 8,731 hours was flown during 1933, as compared with 9,968 hours in 1932. The Manitoba Government Air Service operated 5 aircraft on forest protection in the province for the Forestry Branch; a total of 770 hours was flown on this work. The Saskatchewan Government Air Service operated 4 aircraft on forest protection in the province for the Department of Natural Resources; a total of 93 hours was flown on this work. British Columbia and Quebec contracted with commercial aircraft operators for flying required.

**Commercial Aviation.**—During 1933 there were 90 commercial aircraft operators in Canada. Their activities included forest fire patrols, timber cruising, air photography, transportation of passengers, express and mail, instruction, advertising, short passenger flights, etc., in various parts of the country.

**Air-Mail Services.**—Regular air-mail services were established in December, 1927. During 1933 commercial firms operated the following air-mail routes under Post Office Department contracts: *Winter Services.*—Leamington-Pelee Island; Quebec-Seven Islands-Anticosti; Moncton-Magdalen Islands; Moncton-Charlottetown. *Summer Services.*—Rimouski-Montreal; Vancouver-Victoria. *Yearly Services.*—Montreal-Albany; Sioux Lookout-Red Lake area; Amos-Siscoe-Pascallis; McMurray-Aklavik; Winnipeg-Pembina; Peace River-North Vermilion; Lac du Bonnet-Bissett; Prince Albert-lac La Rouge; Big River-Isle à la Crosse. Mail to the extent of 539,358 lb. was carried under contract, without loss or damage, during 1933. (See p. 745.)

\*Revised under the direction of J. A. Wilson, Esq., Controller of Civil Aviation, by A. E. Heatley, Department of National Defence.

**Encouragement of Aviation.**—To encourage a more widespread interest and knowledge of aviation, the Department of National Defence, since 1928, has assisted by issuing two light aeroplanes and making grants to each of the twenty-three flying clubs in the following localities: Halifax, Cape Breton, Saint John, Montreal, McGill University, Brant and Norfolk, Fort William, Hamilton, Kingston, London, Ottawa, St. Catharines, Toronto, Border Cities, Kitchener, Brandon, Winnipeg, Moose Jaw, Regina, Saskatoon, Calgary, Edmonton, Vancouver. The total membership at present is 2,075. A total of 9,972 hours was flown. 120 members obtained private pilots' licences, and 26 members obtained commercial pilots' licences during 1933. Many aerodromes have been established through this movement.

A large air terminal has been built at St. Hubert, 7 miles south of Montreal. A mooring tower for airships and an aerodrome have been constructed there, and immigration, customs and postal facilities are available. A terminal aerodrome has also been constructed at Rimouski for the despatch and reception of trans-Atlantic mails by air.

**Manufacture of Aircraft.**—An aircraft industry, to construct in Canada the aircraft and equipment required for aviation, is essential to the sound development of flying. Canadian Vickers, the pioneer firm in Canada, have produced several original types specially suited to operation in Canada. Several aircraft constructors from England and the United States have formed branches in Canada for the assembly and service of their products. The De Havilland Aircraft of Canada, Ltd., established a plant in Toronto; the Curtiss-Reid Aircraft Co. established a factory at Cartierville, Que.; the Fairchild Aircraft Ltd., at Longueuil, Que.; the Boeing Aircraft of Canada, Ltd., at Vancouver; and the Ottawa Car Manufacturing Co., one at Ottawa for A. V. Roe aircraft. Aero engine factories are established for construction or assembly and service of their products as follows: Armstrong-Siddeley Motors, Ltd., at Ottawa; Aero Engines of Canada, Ltd., at Montreal, for "Wright" and "Bristol" engines; Canadian Pratt and Whitney Aircraft Co., Ltd., at Longueuil, Que.

| Air engineers only (flying machines).....   | 212   | 241   | 208   | 208   | 281   | 313   |
| Total licensed personnel.....               | 657   | 780   | 866   | 983   | 1,159 | 997   |
| Unlicensed air mechanics employed.....      | 150   | 164   | 140   | 52    | 60    | 61    |

<sup>1</sup>These figures show duplication, since practically all aeroplanes are convertible to float seaplanes.

## PART VIII.—CANALS.\*

Before the period of extensive railway construction which commenced for Canada in the 1850's, the water routes, more especially the St. Lawrence, the Great Lakes and the Ottawa, were the chief avenues of transportation. These routes were interrupted at certain points, necessitating portages, and to eliminate the toil of unloading, transporting and reloading at the portages the canals of Canada were constructed.

The earliest mention of canals in Canada is in connection with the Lachine canal, begun by early French settlers in 1700, but only after the conquest of Canada by the British were improvements of the main water routes made, and in the early part of the 19th century increased internal and foreign trade and the introduction of steam navigation resulted in more attention being given to this work. Although the canals were constructed primarily for military purposes they soon became essential to the commercial life of the country.

## Section 1.—Canal Systems.

There are in Canada seven canal systems under the control of the Dominion Government in connection with navigable lakes and rivers. They consist of the canals: (1) between Port Arthur or Fort William and Montreal; (2) from Montreal to the International Boundary near lake Champlain; (3) from Montreal to Ottawa; (4) from Ottawa to Kingston and Perth; (5) from Trenton, lake Ontario, to lake Huron (not completed); (6) from the Atlantic ocean to Bras d'Or lakes, Cape Breton; and (7) from Winnipeg to lake Winnipeg. By means of these canals a total waterway of 1,846 miles has been opened to navigation, the actual mileage of canals being 509.40.

\*Revised by G. S. Wrong, B.Sc., Chief of the Transportation and Public Utilities Branch of the Dominion Bureau of Statistics. This Branch publishes an annual report on "Canal Statistics".

A detailed description of the individual canals was given on pp. 626-629 of the 1926 Year Book. Summary statistics of their length and lock dimensions are given in Table 41.

41.—Canals of Canada, Length and Lock Dimensions, 1935.

| Name.                     | Location.                                                   | Length. | Locks. |                     |        |                    |

<sup>1</sup>Navigable depths are occasionally less at times of extremely low water.

<sup>2</sup>Minimum depth between locks 25 feet.

<sup>3</sup>With lake Ontario at elevation 244 feet above sea-level.

**Government Expenditures on Canals.**—Tables 42 and 43 deal with the expenditures of the Dominion Government on the construction and maintenance of canals. The principal source of revenue is rentals for water for power purposes. All canals, it may be added, have since 1904 been free of tolls to vessels applying for the privilege of locking facilities. The total capital cost of Canadian canals since their construction was begun is set at \$249,932,926. The heavy capital expenditures in recent years are due to the construction of the Welland Ship Canal, on which \$131,065,440 had been spent up to Mar. 31, 1934. The lock gates were first opened on April 21, 1930, and upper lake vessels with certain restrictions were allowed through. In 1932 the largest of the lake vessels (633 feet long) used the canal and draughts up to 22 feet were accommodated.

### 42.—Expenditures and Revenues of Canals for Period Before Confederation, 1868-1910, and fiscal years ended Mar. 31, 1911-34.

NOTE.—For the individual years 1868 to 1910, see Canada Year Book, 1916-17, p. 462.

<sup>1</sup>The records relating to cost of construction by the Imperial Government were destroyed by fire in 1852 and the statistics prior to that year are not included in this table.

## Section 2.—Canal Traffic.

Tables 44 to 49 deal with the traffic passing through Canadian canals in recent years up to and including 1934. In this latest year the total traffic amounted to 18,069,252 tons, which was a decrease of 711,237 tons from the total for 1933. By the summer of 1931, the new Welland Ship Canal was advanced sufficiently to allow vessels drawing up to 18 feet of water to pass through and, at the opening of navigation in 1932, the allowable draught was increased to 20 feet for the large upper-lake vessels. Later in the season vessels drawing 20½ feet and with cargoes up to 15,900 tons used the canal. Iron ore, which had previously been shipped by rail from Point Edward to Hamilton, has since been shipped through from Lake Superior to Hamilton by water, and increased quantities of coal and other commodities have been shipped through the canal.

For details of traffic handled through each canal, see the annual report on Canal Statistics published by the Bureau of Statistics.

44.—Total Traffic through Canadian Canals, by Nationality of Vessels and Origin of Freight, navigation seasons 1911-34.<sup>1</sup>

NOTE.—For Canadian canal traffic from 1886 to 1899, see 1902 Year Book, p. 398, and for the figures for 1900-10 see the 1933 Year Book, p. 697.

<sup>1</sup>Totals include duplications where vessels use two or more canals.

**The Panama Canal.\***—The Panama canal, which was opened to commercial traffic on Aug. 15, 1914, is a waterway which is destined to be of the greatest importance to the British Columbian ports, from which vessels now leave direct for Great Britain and European ports throughout the year. As an alternative route to that of the transcontinental railway lines, such a passage by water is of vital importance in the solution of the larger transportation problems of the continent, and while its influence is perhaps more potential than actual, such a check on trans-continental rail rates is a valuable one. During the War the great expectations based upon the opening of the canal were not realized, owing to the scarcity of shipping, but, with the post-war decline in ocean freight rates, an increase in traffic between our Pacific ports and Europe has taken place, and, while the proportion carried in vessels of Canadian registry is comparatively small, the cargo tonnage has nevertheless assumed considerable proportions. During the years ended June 30, 1933 and June 30, 1934, as will be seen from Table 50, tonnages of 121,875 and 196,204 originating on our eastern coast and tonnages of 134,511 and 189,227 destined for our western coast were carried westward through the canal. The greater importance of the route as one from Pacific to Atlantic ports is illustrated by the 2,201,180 tons originating at western ports and 498,706 tons destined for eastern Canadian ports locked through in the latest period. Strictly intercoastal Canadian cargo during the latest year aggregated 106,519 long tons as compared with 90,802 long tons in 1933. The canal is thus becoming an avenue of trade between Eastern, and Western Canada.

The report of the Governor of the Panama Canal Zone for the year ended June 30, 1934, records an increase from 1933 of from 4,494 to 5,533 in the number of transits, an increase from 22,821,876 to 28,566,595 in canal net tonnage and increases from \$19,620,459 to \$24,063,789 in tolls collected, and from 18,177,728 to 24,718,651 in tons of cargo carried (Table 51).

With respect to traffic by nationality of vessels and cargo carried, vessels of United States registration carried 11,578,453 tons, or 46·8 p.c. of the total cargo of 24,718,651 tons locked through in the year 1934. British vessels carried 5,193,136 tons, or 21·0 p.c., Norwegian vessels 2,080,833 tons, or 8·4 p.c., Japanese vessels 1,510,916 tons, or 6·1 p.c., German vessels 962,218 tons, or 4·0 p.c.

## PART IX.—SHIPPING AND NAVIGATION.

Canadian shipping may be divided into three classes: (1) ocean or sea-going shipping; (2) inland or rivers and lakes international shipping; and (3) coasting trade or coastwise shipping. Ocean shipping covers the sea-going vessels arriving or departing from Atlantic and Pacific Coast ports, including St. Lawrence River ports up to Montreal. Inland international shipping is the term used to cover shipping between Canadian and United States ports on the Great Lakes and international rivers and on lakes and rivers accessible to shipping from United States ports such as the Ottawa, Rideau, Trent, etc. (Ferriage is, however, excluded from this and other classes of shipping.) Coastwise shipping or the coasting trade covers shipping between one Canadian port and another on the Atlantic coast, on the Pacific coast and on the inland international lakes and rivers or lakes and rivers accessible to them. It does not, however, include shipping on isolated Canadian waterways, such as the Mackenzie river, lake Winnipeg, lake St. John, etc.

Since the dates between which free navigation is possible down the St. Lawrence are so very important to Central Canada it has been considered advisable to include the following historical statement giving the dates, for years 1882 to 1934 inclusive, respecting the clearance of ice, the opening and closing of navigation, and the first arrivals and last departures of sea-going vessels in the ship channel between Quebec and Montreal.

OPENING AND CLOSING OF NAVIGATION, AND THE FIRST ARRIVAL AND LAST DEPARTURE OF SEA-GOING VESSELS IN THE HARBOUR OF MONTREAL, SINCE 1882; ALSO DATES WHEN CHANNEL BETWEEN QUEBEC AND MONTREAL WAS CLEAR OF ICE.

| Year.     | Channel Clear of Ice, Quebec to Montreal. | Opening of Navigation, Montreal Harbour. | Closing of Navigation, Montreal Harbour. | First Arrival from Sea, Montreal Harbour. | Last Departure for Sea, Montreal Harbour. |

<sup>1</sup>1912.    <sup>2</sup>1913.    <sup>3</sup>1929.

Whereas, in the case of most countries of such extensive coast line, the ocean shipping is much the more important, in Canada the shipping on inland waters, while finally dependent to a large extent on ocean traffic to foreign ports, shares, almost equally with that on the Atlantic and Pacific oceans, the attention devoted to water traffic. The Great Lakes are among the leading highways of the international trade of the world; consequently, the statistics of inland international shipping are included with those of sea-going shipping in Table 52, while those of sea-going shipping alone will be found in Table 53.

Tables 52-60, following, have been compiled or revised from the Shipping Report of the Department of National Revenue for the fiscal years ended Mar. 31, 1933 and 1934.

**52.—Sea-Going and Inland Vessels (Exclusive of Coasting Vessels and Ferriage) Arrived at and Departed from Canadian Ports, fiscal years ended Mar. 31, 1911-34.**

NOTE.—For the years 1868-1910, see Canada Year Book, 1911, p. 380.

## Section 1.—Ocean Shipping.

Canadian ocean shipping dates back to the days of early European fishermen who frequented the shores of Newfoundland and the Maritime Provinces. Ocean-going vessels of that time were crude wooden sailing craft of but 20 or 30 tons burden, entrusted only to skilful and hardy mariners for navigation through little-known seas. Later on exploration and settlement produced a larger volume of traffic, but it was not until the building of ships in Canada by the French assumed some dimensions that traffic became important. The first ocean-going vessels in Canada were probably built by Pont-Gravé, one of the first settlers in New France, and soon afterwards Talon and Hocquart, intendants of the colony, realizing the advantages offered to the industry by the timber resources available, gave it every encouragement. Shipyards were established at Quebec and other points along the St. Lawrence, and these, together with later establishments in the Maritime Provinces and on the western coast, have formed the principal bases of Canadian shipping on the Atlantic and the Pacific.

Canadian shipping attained some prominence in the days of fast wooden sailing vessels, and also at a later date when steam power first came into use. In 1833 the *Royal William*, a Canadian ship built to ply between Quebec and Halifax,

crossed the Atlantic from Pictou to London, the first vessel to navigate the Atlantic under steam power. A few years later Samuel Cunard established the well-known steamship line of that name. His company pursued a conservative course; wooden ships were used long after iron hulls were a proven success, and paddle wheels after the introduction of the screw propeller. By 1867 the company's business had shifted to New York and its terminal was moved thither from Halifax. The Allan line had a somewhat similar early history but remained a purely Canadian company. In addition to other lines of less importance, both the C.P.R. and the Dominion Government operate fleets on the Atlantic and the Pacific oceans.

In the following tables statistics are given of sea-going vessels entered and cleared at Canadian ports during the fiscal years from 1911 to 1934 (Table 53); of the nationalities, tonnages of freight carried, and numbers of crews of vessels entered and cleared at Canadian ports in the fiscal years ended 1933 and 1934 (Table 54); of entrances and clearances of sea-going and all ships at principal ports (Table 59); and of the countries whence arrived and to which departed (Tables 55 and 55A). The numbers and particularly the tonnages of vessels entered and cleared at Canadian ports, in both ocean and coasting trade, indicate clearly the predominance of British and Canadian shipping over that of all other nations. This is particularly the case on the Atlantic coast, where the bulk of our European and South American trade is handled. The figures in Table 53 show a significant and fairly steady expansion in the total of ocean shipping through Canadian ports during the period since 1911.

**53.—Sea-Going Vessels Entered and Cleared at Canadian Ports with Cargo and in Ballast, fiscal years ended Mar. 31, 1911-34.**

NOTE.—For the years 1868-1910, see Canada Year Book, 1911, p. 379.

## Section 2.—Inland Shipping.

Inland shipping is associated in its beginning with the birch-bark canoe of the American Indian. The advantages of this light and easily navigable boat were realized by explorers and fur traders, and for many years it was in general use, giving way to more substantial craft only with the demands of heavier traffic. The *bateau* and Durham boat came into common use after the migration of the U.E. Loyalists but soon gave place to larger vessels on the St. Lawrence and the other main highways of the time. Original plans of the Lachine canal, calling for a width of 12 feet and a depth of 18 inches, afford an illustration of the size of these primitive craft.

In the absence of any roads to make land travel possible, the St. Lawrence river and the Great Lakes formed the main highway to the interior. The route from Montreal to the Upper Lakes was broken at three places—from Montreal to Kingston transportation was by *bateau* or Durham boat, from Kingston to Queenston schooners were used, then there was the portage road from Queenston to Chippawa and, finally, schooner again to the destination. The charge for transporting a barrel of rum from Montreal to Kingston was from \$3 to \$3.50, and freight charges on other goods were proportions of this standard rate.

In 1809, the *Accommodation*, the first Canadian steamship, was built for the Hon. John Molson, to run between Montreal and Quebec. By 1818 Molson had formed a company, the St. Lawrence Steamship Co. or the Molson Line. On lake Ontario, the *Frontenac* was used from 1817 on a weekly service between York and Prescott and, following this beginning, came a period of great activity in lake and river shipping. In 1845, the *Gore* reached lake Huron by way of the Welland canal to carry on transport trade on the Upper Lakes, where previously there had not been enough traffic to support a large ship. Shipping on the Upper Lakes became brisker now, for there were settlers to be carried from Buffalo to the western United States and grain to be brought back. In this period Canadian shipping made its profit by carrying United States goods, for there was little traffic originating in the Canadian near-West.

Upon the advent of steam railways, water-borne traffic did not decrease but, on the contrary, increased, and at present the greater part of the western grain is shipped *via* the Great Lakes route to eastern ports. The iron ore and coal traffic between lake Superior and lake Erie ranges between 60 and 80 million short tons per annum; the total traffic on these upper lakes alone is greater than that carried by all Canadian railways and about one-twelfth of that carried by all United States railways.

**Inland International Shipping.**—Statistics of the inland international shipping between Canadian and United States ports for the fiscal years ended Mar. 31, 1930-34, exclusive of ferriage, are given in Table 56. The total tonnages of inland international shipping entered and cleared in the fiscal years 1926-34 were as follows: 1926, 29,591,831; 1927, 31,181,890; 1928, 35,589,163; 1929, 39,326,700; 1930, 36,446,557; 1931, 36,311,727; 1932, 31,096,156; 1933, 26,505,653; 1934, 27,179,518.

**56.—Canadian and United States Shipping on Rivers and Lakes between Canadian and United States Ports, Exclusive of Ferriage, fiscal years ended Mar. 31, 1930-34.**

### Section 3.—Coasting Trade.

Statistics of the arrivals and departures of the vessels engaged in the coasting trade of Canada, whether on the sea or the Great Lakes and international rivers, are given for the latest five years in Table 57. These statistics do not include vessels plying on inland waterways inaccessible to international shipping nor do they include ferry services between one Canadian port and another.

57.—British and Foreign Vessels Employed in the Coasting Trade of Canada, fiscal years ended Mar. 31, 1930-34.

## Section 4.—Grand Total Shipping Trade.

Statistics are given in Table 58 showing sea-going, inland international, coastwise and total vessels entered and cleared at Canadian ports, by provinces, during the fiscal years ended Mar. 31, 1933 and 1934, and totals for the fiscal years 1923 to 1934. It is noteworthy in this table that the volume of coastwise shipping is the greatest, while sea-going is next in tonnage. In the period from 1923 to 1929, both sea-going and coastwise shipping showed marked expansion, but in recent

years there has been some decline. Inland international shipping, on the other hand, has varied considerably from year to year without showing any definite trend. It is, however, significant of the importance of water-borne traffic on the inland rivers and lakes that the total tonnage of shipping entered and cleared was greater for Ontario than for any other province in the fiscal year ended 1930 and in the latest year, as in 1933, was only slightly below that of British Columbia. This was due to the fact that the great bulk of the inland international shipping was through Ontario ports, while there was also a large tonnage of coasting trade through these ports. Quebec came third in total shipping in 1934, followed by Nova Scotia and New Brunswick.

**58.—Totals of Numbers and Tonnages of All Vessels Entered and Cleared at Canadian Ports, Exclusive of Ferriage, 1923-34, With Details by Provinces for the fiscal years ended Mar. 31, 1933 and 1934.**

The relative volume of shipping in the leading ports of the provinces of Canada is shown in Tables 59 and 59A. Details are given of the sea-going vessels and of the total of all shipping (exclusive of ferriage) arrived at and departed from each port. In the fiscal year ended Mar. 31, 1934, the tonnage of sea-going vessels arriving at and departing from Vancouver exceeded that of any other port in Canada; Victoria was next, followed by Halifax and Montreal. In total shipping, which included coastwise and inland international as well as sea-going shipping, Vancouver was considerably in the lead, followed by Montreal, Victoria and Halifax.

**59.—Number and Tonnage of Sea-Going and of All Vessels Entered and Cleared at the Principal Ports of Canada, fiscal year ended Mar. 31, 1933.**

NOTE.—For details of coastwise and inland international shipping at these ports and at all other ports of Canada, see the Shipping Report of the Department of National Revenue for the fiscal year ended Mar. 31, 1933. Figures of total shipping are exclusive of ferriage.

Section 5.—Shipping Constructed and on the Registry.

The shipbuilding industry in Canada dates from the earliest settlement of the country, and up till the 1870's was one of the leading industries of Quebec and of the Maritime Provinces, 490 vessels with a total tonnage of 183,010 being constructed in the calendar year 1874. At that time, however, the advent of the steel ship rendered the wooden vessels, the material for which was so abundant in Canada, obsolete, with the result that the tonnage built has never since reached the above figure, though in the fiscal years 1919 and 1920 the construction of the

Canadian Government Merchant Marine, built as an extraordinary measure arising out of the War, raised the totals constructed to 104,444 and 164,074 tons respectively. Statistics of ships built and registered in Canada or sold to other countries are given in Table 60. For further information on the shipbuilding industry, see Table 7 of the chapter on Manufactures, pp. 466-467.

**60.—Vessels Built and Registered in Canada and Vessels Sold to Other Countries, fiscal years ended Mar. 31, 1911-34.**

NOTE.—For 1874-1900, see Canada Year Book, 1911, p. 383, and for 1901-10, see 1932 Year Book, p. 597. Statistics are from the Shipping Reports of the Department of National Revenue.

<sup>1</sup>Revised since the publication of the 1933 Year Book.**Section 6.—The Department of Marine.\***

Administration of the general shipping interests of Canada is in the hands of the Dominion Department of Marine. It deals with: (1) administration of the Canada Shipping Act and other Acts of the Dominion Government relating to marine transportation; (2) pilotage; (3) the construction and maintenance of lighthouses, lightships, fog alarms, buoys and beacons; (4) ports, harbours, piers, wharves and breakwaters; (5) the Meteorological Service of Canada; (6) relief of distressed seamen; (7) hydrographic, tidal and current surveys; (8) inquiries into the causes of shipwrecks and casualties, and the collection of wreck statistics; (9) life-saving service; (10) the inspection of steamboats; (11) the construction and maintenance of the St. Lawrence River ship channel; (12) marine signal service; (13) ice breaking and (14) the administration of Government radiotelegraph stations and the supervision of private stations in Canada. The net revenue of the Department for the fiscal year ended Mar. 31, 1934, was \$1,645,291, and the expenditure for the same period was \$12,208,231.

A summary statement of the revenue and expenditure of the Department of Marine is given for each fiscal year since 1901 in Table 62, while details for the six years from 1929 to 1934 are presented in Tables 63 and 64.

\*Revised by E. Hawken, Assistant Deputy Minister, Department of Marine.

**62.—Total Revenues and Expenditures of the Department of Marine, fiscal years ended June 30, 1901-06, and Mar. 31, 1907-34.**

NOTE.—For fiscal years 1868 to 1900, see 1933 Year Book, p. 715.

**Steamboat Inspection.**—The Steamboat Inspection Service of Canada, maintained under the authority of the Department of Marine, comprises the Board of Steamboat Inspection, together with staffs of inspectors at the principal ocean and inland ports. The Board decides on the standards required of all vessels coming under its jurisdiction. These must be attained by all ships given official warrant as to their seaworthiness and mechanical condition. Further, the Board grants certificates of competency to engineers of steamboats.

Table 65 shows the numbers and tonnages of steamboats inspected, not inspected, and subject to inspection; vessels added to the Dominion Register; and vessels lost, broken up, or destroyed, by Inspection Divisions, during the fiscal years ended Mar. 31, 1933 and 1934.

**Wrecks and Casualties.**—The figures of Table 67, supplied by the Department of Marine, apply to vessels of every nationality in respect of wrecks and casualties in Canadian waters, and to Canadian vessels in respect of wrecks and casualties in other waters. The returns in some years cover wrecks and casualties of previous years. Statistics of marine danger signals appear in Table 68.

**67.—Canadian Wrecks and Casualties, years ended June 30, 1911-17, and calendar years 1918-33.**

NOTE.—For details of the years 1870-1910, see Canada Year Book, 1911, p. 381.

### Section 7.—Merchant Marine Services Operated by the Canadian Government.\*

The War had far-reaching effects upon the merchant shipping of the world. The losses from submarines, the demands for naval auxiliary and transport services, and the abnormally large quantities of material to be carried overseas for both war purposes and the support of the civilian populations of Europe, all combined to create pressing demands for merchant shipping. In the latter part of the War, when submarine operations were intensified, the supply of merchant tonnage became a source of serious anxiety to the Allies and every effort was made not only to economise the shipping then afloat but to increase the supply by new building. It was under these circumstances that the Dominion Government placed orders with Canadian shipbuilding firms for the construction of 63 steel cargo vessels of six different types. These vessels were intended primarily to co-operate with British shipping in supplying the necessities of war, but, though the War ended before the ships were all built, the construction program was continued to provide employment and, in view of the losses of the War, to assure sufficient shipping as a complement to the National Railways and as a means of carrying abroad the products of Canada's farms, forests, mines and factories.

Shipping construction at that time was very costly and this abnormally high first cost has been a serious handicap to the economical operation of the ships ever since. Prior to Dec. 31, 1919, 19 vessels had been delivered by the builders. Additions were subsequently made to the fleet until the total fleet, as at Dec. 31, 1924, numbered 57 vessels of a total deadweight tonnage of 353,450. Through sale and the loss of three vessels the fleet was reduced to 29 vessels with a deadweight tonnage of 96,987 at Dec. 31, 1933. Early operations proved profitable: a surplus of \$1,056,767 was shown for the year ended Dec. 31, 1919 and a surplus of \$1,263,307 for the year ended Dec. 31, 1920 (without provision for interest

\*Revised under the direction of Geo. W. Yates, Assistant Deputy Minister, Department of Railways and Canals, by A. H. Allan, General Manager, Canadian National Steamships, Montreal.

charges). Operating income results from the date of the inception of these services have been as follows, exclusive of interest and depreciation on the original high cost of the vessels. Operating deficits are indicated by a minus sign:—

| Calendar Year. | Operating Results. | Calendar Year. | Operating Results. |

In conformity with the Canada-West Indies Trade Agreement Act of 1926 (16-17 Geo. V, c. 16), the Dominion Government has provided direct steamship services to the West Indies through the medium of Canadian National (West Indies) Steamships, Ltd. The service is provided by a fleet of eleven vessels of a total deadweight tonnage of 63,426. Five of these boats, known as the "Lady" ships, were specially constructed for passenger service on this route, while the remaining seven vessels previously formed part of the Canadian Government Merchant Marine fleet, and were taken over by the Canadian National (West Indies) Steamships, Ltd., for operating purposes, under entrusting agreements with the respective companies which owned the ships. The investment in vessels at Dec. 31, 1933, amounted to \$10,665,567, mainly made up of the construction cost of the "Lady" ships and the present-day valuation of the other seven ships, together with the cost of conversion for use in the West Indies service of three of the latter. The financial results of the operations of the Canadian National (West Indies) Steamships, Ltd., have been as follows:—

| Calendar Year. | Operating Revenues. | Operating Expenses. | Net Operating Loss. | Depreciation. | Interest. | Book Loss. |
|----------------|---------------------|---------------------|---------------------|---------------|-----------|------------|
|                | \$                  | \$                  | \$                  | \$            | \$        | \$         |
| 1929.....      | 3,332,683           | 3,780,524           | 447,841             | 227,315       | 442,739   | 1,117,895  |

## PART X.—TELEGRAPHS.\*

The Toronto, Hamilton and Niagara Electro-Magnetic Telegraph Co., organized by a group of Toronto men, was the first to establish an electric telegraph service in the pre-Confederation Province of Canada. It was formally organized on Oct. 22, 1846, and its Toronto-Hamilton line was opened on Dec. 19 of the same year. In January, 1847, the line was completed to Queenston, whence there was a connecting line to Buffalo. The Montreal Telegraph Co. commenced the construction of a line to Toronto in February, 1847, and began actual operation between the two cities on Aug. 3 of the same year. By the end of the year it had 540 miles of wire in use, 9 offices and 35 employees, and had sent out 33,000 messages. Both the Montreal and the Toronto companies were incorporated by special Acts at the 1847 session of the Legislature. In 1852 the Toronto, Hamilton and Niagara Co. sold out to the Montreal company.

The British North American Electrical Association was also formed in 1847, with the object of connecting Quebec with the Maritime Provinces, but for some years its line went no further than Rivière du Loup, though it was finally extended to Woodstock, N.B., where it connected with the American Telegraph Co., which already had lines in New Brunswick. The New Brunswick Telegraph Co. built a line connecting Saint John with the Maine Lines in 1848, and in the following year extended it to Amherst, N.S., where it connected with the Nova Scotia line, bringing Halifax for the first time into telegraphic communication with New York.

The movement for consolidation of services, so evident in the Canadian railways, was also active among the telegraph companies. Thus the Montreal company bought out the Toronto, Hamilton and Niagara Telegraph Co., the Montreal and Bytown Telegraph Co. and the Grand Trunk Telegraph Co., and maintained a strenuous competition with the Dominion Telegraph Co., organized in 1868. In 1881, however, the conflicting interests were consolidated under lease by the Great North Western Telegraph Co., this move effecting great economies in operation. A few years later, however, the Canadian Pacific Railway Co. established competing lines and by September, 1886, had opened 366 offices in Ontario, Quebec and Western Canada.

**Dominion Government Telegraph Service.**—This service is operated by the Telegraph Branch of the Department of Public Works. Its general object has been to furnish rapid communication for outlying and sparsely settled districts where the amount of business is so small that commercial companies will not enter the field but where the public interests require that there should be communication. Thus these facilities include: telegraph and telephone services to scattered settlements around the coasts of Cape Breton island; cable services to Campobello, Grand Manan and other islands in the bay of Fundy, to Prince Edward Island, Magdalen islands and Anticosti island in the gulf of St. Lawrence; telegraph or telephone services along the north shore of the gulf of St. Lawrence from Quebec to the straits of Belle Isle; cable connections with Pelee and Manitoulin islands in Ontario; some lines to northern outlying districts in Saskatchewan; lines from Edmonton to the Athabasca and Peace River country in Alberta; telegraph or telephone communications around the coast of Vancouver island and to fishing, lumbering and mining settlements along the coast of the mainland of British Columbia, as well as to isolated

\*Revised by G. S. Wrong, B.Sc., Chief of the Transportation and Public Utilities Branch of the Dominion Bureau of Statistics, which issues an annual report dealing with telegraph statistics.

mining centres in the interior; and finally the overland telegraph line to Dawson and other settlements in Yukon. All these services, on Mar. 31, 1934, comprised 8,864 miles of pole line, 10,782 miles of wire, 326 knots of cable and 705 offices, with 422 salaried employees engaged in operation and maintenance, as well as 242 other persons operating offices on a commission basis. The lines in operation amounted to 3,797 miles of pole line in British Columbia and an additional 535 miles in Yukon, 1,671 miles in Quebec, 1,442 in Alberta and 877 miles in Nova Scotia, as well as smaller mileages in New Brunswick, Ontario and Saskatchewan.

**Telegraph Systems.**—The Canadian telegraph systems are composed of lines owned by the Dominion Government and by chartered railway and telegraph companies. The lines previously owned by the Great North Western Telegraph Co., the Grand Trunk Pacific Telegraph Co., the Canadian Northern Railway Co and the National Transcontinental Railway are now owned by the Government and are operated by the Canadian National Telegraph Co. (formerly Great North Western Telegraph Co.). The Dominion Government Telegraph Service operates the line to Yukon and other lines in outlying districts.

The Canadian system, in proportion to population, is one of the most extensive in the world, and is operated under considerable climatic and geographic disadvantages. In the operation of railways and in the receipt and dispatch of market and press reports, its services to the nation are invaluable.

**Telegraph Statistics.**—A brief summary table giving the more important figures of the operation of Canadian telegraphs from 1920 to 1933 follows. For details see the Annual Report on Telegraph Statistics published by the Bureau of Statistics.

69.—Summary Statistics of All Canadian Telegraphs, calendar years 1920-33.

| Year.  | Gross Revenue. | Operating Expenses. | Net Operating Revenue. | Pole Line Mileage.  | Wire Mileage. | Employees.         | Offices. | Messages, Land. | Cable-grams. <sup>3</sup> | Money Transferred. |

<sup>1</sup>Cablegrams not included. The total in Table 69 includes messages handled by the Marconi Wireless Telegraph Co. <sup>2</sup>Not including press messages. <sup>3</sup>The total in Table 69 includes offices of wireless and cable companies. <sup>4</sup>Included with Canadian National.

**Submarine Cables.**—Six transoceanic cables have termini in Canada—five of them on the Atlantic coast and one on the Pacific. The year in which the cable was first demonstrated to be of commercial value was 1866, and up to the present its use has greatly increased. The Atlantic cables are controlled by English and United States' interests. The Pacific cable, from Canada to Australia and New Zealand, has been in operation since 1902, and was owned by a partnership of the Governments of Great Britain, New Zealand, Australia and Canada. As a result of the recommendation of the Imperial Wireless and Cable Conference of 1928, in view of increased wireless competition, it was decided to dispose of the Pacific and West Indian Islands cable systems to the Imperial and International Communication Co., a company formed to take over all Empire-owned cables and lease the Empire-owned beam wireless systems. The necessary legislation was passed by the United Kingdom in February, 1929, and by Canada in June, 1929.

## PART XI.—TELEPHONES.\*

The telephone is in part a Canadian invention, though its inventor, Alexander Graham Bell, a Scotsman by birth, was at the time of its invention a resident of the United States, having immigrated with his father to Brantford, Ontario, in 1870, and subsequently proceeded to Boston. According to his account, the discovery of the telephone, both as to its main principle and as to the first transmission of the human voice, was made at his father's residence at Tutela Heights, Brantford, in 1876, and the first telephone talk over any distance was conducted between Brantford and Paris, a distance of 8 miles, on Aug. 10, 1876.

Telephone development in Canada dates from the year 1880, when the Bell Telephone Co. was incorporated by Act of Parliament. Although at this time all patents and lines were owned by the Canadian Telephone Co., this was dependent on the Bell Co., to which it sold out in 1882. By 1883 the first submarine telephone cable had been laid between Windsor and Detroit, and during the year the Bell Co. operated in Canada 4,400 rental-earning telephones, 44 exchanges and 40 agencies, with 600 miles of long-distance wire. It controlled development in all the provinces except British Columbia, where the greater part of the system has always been in the hands of the British Columbia Telephone Co., Ltd.

With the rapid growth of private companies in the Maritime Provinces, the lines of the Bell Co. were disposed of in 1888 to the Maritime Telegraph and Telephone Co. in Nova Scotia, and to the New Brunswick Telephone Co. in New Brunswick, an interest in these corporations being retained under the terms of sale. A development of a different kind is seen in the three Prairie Provinces, where well-organized systems were sold to the Governments of Manitoba and Alberta in 1908 and to Saskatchewan in 1909. The lines in Ontario and Quebec are still largely owned by the Bell Telephone Co.

**Telephone Systems.**—The 2,403 telephone systems existing in 1933 (Table 72) include the three large provincial systems in Manitoba, Saskatchewan and Alberta, and a smaller governmental system in Ontario, together with the system operated by the National Parks of Canada, Department of the Interior. There were also 142 municipal systems, the largest operated by the cities of Edmonton, Fort William and Port Arthur. Out of the 1,503 co-operative telephone companies, no fewer than 1,169 were in Saskatchewan alone and 211 in Nova Scotia. Besides the above, there were 539 stock companies, 95 partnerships and 117 systems privately operated.

A summary of the principal statistics is contained in Table 71. Up to 1930 there had been a steady growth in the use of telephones, the number reaching a peak at 1,402,861, but in 1931, 1932 and 1933 decreases of 2·7 per cent, 7·5 per cent and 5·5 per cent, respectively, were recorded. The number of telephones per capita is, however, second only to that of the United States, the numbers being 13·94 telephones per 100 population in the United States and 11·16 in Canada. By provinces the numbers of telephones were in 1933: Ontario 543,907, Quebec 259,530, British Columbia 116,528, Saskatchewan 74,258, Manitoba 61,874, Alberta 57,429, Nova Scotia 43,556, New Brunswick 29,750, Prince Edward Island 5,348, and Yukon 150. The numbers of instruments per 100 population were as follows: British Columbia 16·4, Ontario 15·4, Quebec 8·7, Manitoba 8·6, Nova Scotia 8·3, Saskatchewan 7·8, Alberta 7·6, New Brunswick 7·1, Prince Edward Island 6·0 and Yukon 3·8.

\*Revised by G. S. Wrong, B.Sc., Chief of the Transportation and Public Utilities Branch of the Dominion Bureau of Statistics, which issues an annual report dealing with telephone statistics.

Estimates of the numbers of telephone conversations during 1933 were 2,247,144,000 local and 24,437,452 long-distance calls. Systems operating almost 90 p.c. of all telephones in Canada made estimates by actual count on days of normal business, and, after adjusting for uncompleted calls, holidays, Sundays, etc., the average was multiplied by 365. The long-distance calls in practically all cases were the actual long-distance calls put through or completed. The averages were 1,885 local and 21 long-distance calls per telephone and 213 telephone conversations per capita as compared with 223 in 1932. The estimated per capita average for the United States in 1932 was 205 and for New Zealand, 206.

Statistics of the number of telephone companies reporting to the Dominion Bureau of Statistics are given in Tables 72 and 73.

**71.—Summary Financial Statistics of Telephones in Canada, years ended June 30, 1911-18, and Dec. 31, 1919-33.**

| Year.  | Capitalization. |              | Cost of Property. | Gross Revenue. | Operating Expenses. | Net Operating Revenue. | Salaries and Wages, <sup>1</sup> | Systms. | Telephones. | Telephones per 100 Population. |

<sup>1</sup>Excluding employees on rural lines.

## PART XII.—RADIO.\*

Under the Radiotelegraph Act (c. 195, R.S.C., 1927), the administration of radio within the Dominion was vested in the Department of Marine. Dominion jurisdiction has been questioned by certain of the provinces from time to time, but on Feb. 9, 1932, the Judicial Committee of the Imperial Privy Council ruled that the control and regulation of radio communication is within the jurisdiction of the Dominion Parliament. This decision was a very important one and has done much to further the nationalization of radio broadcasting in Canada. (See pp. 788-789.)

### Section 1.—Radiotelegraphy.

**The Coast Station Radiotelegraph System.**—The present coast station system of 69 stations consists of three chains—one extending from Vancouver to Prince Rupert on the Pacific, another from Port Arthur to the Atlantic ocean in the east, and the third from Port Churchill to Resolution island at the entrance to Hudson strait. The Great Lakes coast stations connect with those of the east coast, which, in turn, connect with the Hudson Bay Route chain. There is no direct radio connection between the Great Lakes and the Pacific Coast chain.

Of the above stations, 17 on the east coast and Great Lakes are operated by the Canadian Marconi Co. under contract with the Department, and the remaining 52 on the east coast, west coast and Hudson bay and strait are operated directly by the Department. Twice daily, at advertised hours, a number of these stations broadcast messages to shipping containing such important information as weather forecasts, storm warnings, reports in connection with floating derelicts, ice and other dangers to navigation. In the interests of navigators, to whom accurate time is essential in computing observations on celestial bodies, three Canadian coast stations—two on the west coast and one on the east coast—transmit time signals at advertised hours daily.

\* Sections 1 and 2 have been revised by Commander C. P. Edwards, O.B.E., Director, Radio Service, Department of Marine, Ottawa. A fuller treatment of the historical and descriptive background of radio communication was published at pp. 607-610 of the 1932 Year Book.

Some years ago the discrimination of underwriters in the matter of insurance rates charged on ships plying to Canadian ports led the Department to feel that any reasonable expenditure which would tend to reduce these charges would be a sound investment. To this end 13 direction-finding stations have been established at specially selected sites with respect to navigational routes—7 on the east coast, 5 on Hudson bay and strait, and 1 on the west coast. These stations are fitted with special apparatus which enables the direction of the incoming radio signal transmitted by a ship to be accurately determined.

A more recent extension of the shore direction finder is the development of the direction-finding instrument on board ship. To assist this development, the Department has established radio beacon transmitters at a number of lighthouses and lightships (see Table 76). These radio beacons transmit characteristic radio signals with an approximate range of 50 miles every hour at advertised times during clear weather and continuously when the atmosphere in the vicinity of the station is so obscure as to impede navigation.

To insure the safety of life at sea, all passenger steamers and freighters plying to and from Canadian ports must carry radio equipment manned by competent operators in possession of a certificate of proficiency in radio. The Department maintains a complete radio inspection service to enforce this regulation. Inspectors located at various ports throughout the Dominion are responsible for checking the efficiency of the radio equipment on ships of all nationalities, and seeing that only competent operators are carried. Examinations for certificates of proficiency in radio are conducted by the Radio Branch, and 4,758 certificates had been issued up to Mar. 31, 1934.

Table 76 shows the name and situation of the Government-owned radiotelegraph stations in Canada and Newfoundland.

## Section 2.—Radiotelephony.

**Transatlantic Radiotelephone Service.**—A radiotelephone service between Canada and Great Britain was first made available to the Canadian public, through the medium of the Bell Telephone Co. *via* the transatlantic radio circuit operated by the American Telegraph and Telephone Co. from New York, in March, 1928. In 1932 a direct circuit with Great Britain was opened through the medium of the beam station of the Canadian Marconi Company at Drummondville, P.Q.

**Radio Broadcasting.**—Broadcasting of the human voice by radio first commenced in Canada with test programs carried out by the Canadian Marconi Company in Montreal during the winter evenings of 1919. Regular organized programs were commenced in December, 1920, by the same company, on a wavelength of 1,200 metres.

In April, 1922, the establishment of broadcasting stations on a general scale commenced, 52 private, commercial and amateur broadcasting licences being granted during the fiscal year 1922-23. During the fiscal year 1933-34, 74 broadcasting stations were in operation in the Dominion, and the number of licensed receiving sets was 707,625. The licence fee for a broadcasting station is \$25 for a period of 6 months, and for a receiving set \$2 per annum.

Approximately \$250,000 is expended annually by the Radio Branch of the Department of Marine for the suppression of inductive interference in the interests of broadcast listeners. This service is entirely free. Upwards of 100 men and 24 fully equipped cars are engaged in this work.

The extent to which private receiving sets are used for the reception of Public Broadcasting is indicated by the number of private receiving licences issued in the various provinces of the Dominion during the fiscal year 1933-34 as follows:—Alberta, 40,455; British Columbia, 55,978; Manitoba, 44,420; New Brunswick, 17,206; Nova Scotia, 25,039; Ontario, 288,357; Prince Edward Island, 1,758; Quebec, 201,154; Saskatchewan, 32,951; Yukon and Northwest Territories, 307.

### 78.—Wireless and Radio Stations in Operation in Canada, Mar. 31, 1930-34.

### Section 3.—The Canadian Radio Broadcasting Commission.\*

From the time its original networks were established, about the middle of 1933 until the present, the Canadian Radio Broadcasting Commission has maintained a daily broadcasting service on regular schedule to all the populated areas of Canada. Its time on the air in regular schedule broadcasting has amounted to approximately 40 hours a week, being 4½ hours on week days and about 9 hours on Sundays, with additional hours on Saturdays during certain periods. On week days the broadcasting has been in the evening hours when the maximum number of listeners can be served. The Sunday schedule includes also several hours in the afternoon. The service is provided on a system of broadcast networks organized as follows:—

Maritime network serving Nova Scotia, Prince Edward Island and New Brunswick;

Mideast network serving Ontario and Quebec;

Central network serving Manitoba and Saskatchewan;

Pacific network serving Alberta and British Columbia;

Midwest network serving Manitoba, Saskatchewan and Alberta;

Eastern network which includes the Maritimes and Mideast networks;

Western network which includes the Central, Midwest and Pacific networks;

National network which includes all the above and thus serves all points in Canada.

By the end of 1934 commission networks included upwards of 50 broadcasting stations covering the country from Sydney, N.S., to Vancouver, B.C. Of these stations 23 were 'basic' stations which, either through being operated by the commission itself or through contract arrangement with it, reserved specified time each day for commission broadcasting. The others were stations to which the commission service was made available but their use of it was entirely optional. The network stations are connected by approximately 12,000 miles of communication wires or about 5,900 miles of broadcast wire pairs. For the operation of this wire communication system, a telegraphic monitor circuit involving an additional 5,900 miles of wire and 64 repeater and control stations is used. The wire network was supplied jointly by the Canadian Pacific Telegraphs and Canadian National Telegraphs under contract arrangement with the commission. Of the network stations six are operated by the commission itself.

The national broadcasting service follows usual broadcasting practices with respect to the types and variety of entertainment provided. The daily broadcasting, however, contains no advertising, direct or indirect, and all Canadian cities are represented in the broadcasting. The regular service consists, broadly speaking, of: entertainment, mainly musical; informative and educational broadcasts; news bulletins and weather forecasts; and special features. Such a classification, however, is very general. An accurate classification would be difficult as a number of the regular features of the service fall under two or more headings. Many of the musical programs, for example, are directly educational and informative in that they include biographical sketches of the lives and works of the great composers. Musical programs include opera, chamber music, choral concerts, instrumental recitals, bands and orchestras of all kinds. In its musical programs particularly the commission seeks to serve all tastes. During the winter season of 1933-34 a series of weekly broadcasts by the Metropolitan Opera Co. of New York was carried

\*Supplied by Hector Charlesworth, Chairman, Radio Broadcasting Commission.

on the commission networks. In the commission's own studios light operas were produced by its own groups of artists. The commission also secured, and broadcasted from coast to coast, the Sunday afternoon series of concerts by the New York Philharmonic Society as well as other symphony concerts by well known organizations in Canada and the United States. Leading Canadian concert orchestras, dance orchestras, bands and choral groups have been heard frequently in the national service. Other entertainment programs include what might be called variety revues, humour, programs for children. There is a fifteen-minute news bulletin period every evening followed by weather bulletins and the broadcasting of "A Fact A Day About Canada" supplied by the Dominion Bureau of Statistics. During the fall and winter season the commission maintains a weekly service by short wave to the outposts in the Far North. This service includes a weekly summary of the news, a special entertainment program, and personal messages. In response to public request this northern messenger service is also carried on the national network.

The part of the service which falls under the head of informative and educational broadcasts includes addresses by outstanding Canadians and visitors from other lands, short talks by officials of the Government services, university lectures and debates, commentaries on world events and book reviews. As in other countries drama is finding a steadily increasing place on the air in this country and the commission broadcasts a number of plays written especially for the microphone by Canadians.

In addition to the regular schedule broadcasting, the commission broadcasts events of special interest taking place in Canada and other countries. During the past year for example it broadcasted the launching of the new ocean liner, the *Queen Mary*, the Jacques Cartier quarter-centennial celebrations at Gaspé and elsewhere, the wedding of the Duke of Kent and Princess Marina of Greece, and other events in which there was general interest. The commission participated in the Empire Christmas broadcasts of 1933 and 1934. Broadcasts in behalf of international peace, community relief and child welfare and other causes were carried on the commission networks.

During 1934 a new broadcasting station at Quebec was added to the chain of stations operated by the commission and another station for this chain was nearing completion at Windsor, Ontario. A receiving station was constructed at Ottawa with special equipment for the reception of short wave programs from the United Kingdom. This station was ready for operation in the summer of 1935 and the commission proposes to pick up selected programs from the United Kingdom and re-broadcast them over its networks by means of its blattnerphone recording equipment. Programs are regularly exchanged between the commission and the large broadcasting companies of the United States.

As required by the Canadian Radio Broadcasting Act the commission continued to control and regulate all broadcasting in Canada.

### PART XIII.—THE POST OFFICE.

**Historical.**—A postal service was established between Montreal and Quebec as early as 1721, official messengers and other travellers making a practice of carrying letters for private persons. When Canada came under British rule, the Post Office was placed on a solid footing by Benjamin Franklin, then Deputy Postmaster General for the American colonies, who visited Canada in 1763, opened post offices at Quebec, Montreal and Three Rivers, and also established courier

communication between Montreal and New York. Since 1755 Halifax had had a post office and direct postal communication with Great Britain.

As a consequence of the American Revolution and the resulting isolation of Canada from Nova Scotia, the first exclusively Canadian postal service, a monthly courier route from Halifax to Quebec, was established in 1788, involving a seven weeks trip and expenses of about £200 of which only one-third was met by postal charges. Up to 1804 the postal facilities of Upper Canada consisted of one regular trip by courier each winter with whatever mail might reach Montreal during the season of navigation. Charges were necessarily high, \$1.12 being paid on ordinary letters from London to York (now Toronto) *via* Halifax.

The first post office in York (now Toronto) was opened about 1800. By 1816 there were 19 offices in the two Canadas and by 1827 this number had increased to 114. At this time the system consisted primarily of a trunk line of communication between Halifax, Quebec, Montreal, York and Amherstburg, over which couriers travelled at varying intervals. Branching off this line were routes to Sorel, Sherbrooke, St. Johns, Hull, Hawkesbury, Perth and Richmond, with most deliveries made once or twice a week.

Hitherto the Post Office had been under the control of the Imperial Department, but considerable agitation resulted in the service being transferred on April 6, 1851, to the several provinces. Only enough mutual control was maintained to insure the continuance of Imperial and intercolonial services. The provinces had complete jurisdiction over the establishment and maintenance of systems and rates.

At Confederation the provincial systems were transferred to the Dominion. The Post Office Act of 1867 established a service throughout Canada. The domestic rate on letters was reduced from 5 to 3 cents per half-ounce, and in 1870 the rates to the United States and the United Kingdom were reduced from 10 to 6 cents and from  $12\frac{1}{2}$  to 6 cents, respectively, per half-ounce. In 1875 a convention between Canada and the United States reduced postal rates between the countries to the domestic level. In 1878, on the admission of Canada to the Postal Union, letter postage to the countries of the Postal Union was reduced to 5 cents per half-ounce. After a conference in 1897 Imperial penny postage (2 cents per half-ounce) was established on Dec. 25, 1898, while the domestic rate was reduced from 3 to 2 cents per ounce. These rates were maintained until 1915, when a 1-cent war tax was imposed on all pay letters and post cards (except where this would be in violation of international agreements), and also on postal notes. Later the rate to the United Kingdom was increased to 4 cents on the first and 3 cents on succeeding ounces, while that to Postal Union countries was raised to 10 cents on the first and 5 cents on succeeding ounces. The Postal Union rate was reduced in October, 1925, to 8 cents for the first ounce and 4 cents for subsequent ounces. Penny postage again became effective for Canada, to the United States, Newfoundland and other countries of North America on July 1, 1926, and to the United Kingdom and all other places within the British Empire on Dec. 25, 1928. On May 24, 1929, penny postage became effective to France and, on Dec. 25, 1929, was extended to all places in South America. On July 1, 1930, the rate to other Postal Union countries was made 5 cents for the first ounce and 3 cents for each succeeding ounce. On July 1, 1931, a special revenue tax, imposed by the Government for the purpose of obtaining additional revenue, came into effect on letters addressed to places in Canada, throughout the Empire, to France and to North and South America

generally, making the rate in these cases 3 cents for the first ounce and 2 cents for each succeeding ounce.

The Post Office Department is administered by the Postmaster General. Besides the several administrative branches at Ottawa, the Dominion is divided into 15 districts, each in charge of a Superintendent of Postal Service. The Canadian system embraces a territory more extensive than that served by any other system, excepting those of United States and Russia, and the sparsity of population and the comparative lack of development make inevitable a peculiarly difficult and expensive service.

**Rural Mail Delivery.**—A system of rural mail delivery was inaugurated in Canada on Oct. 10, 1908, limited at that time to existing stage routes, persons residing on such routes being entitled to have mail boxes put up in which the mail carrier was to deposit mail matter and from which he was to collect mail matter and carry it to the post office. As a consequence of the public approval of this scheme, new regulations, taking effect on April 1, 1912, made all persons residing in rural districts along and contiguous to well-defined main thoroughfares of one mile and upwards eligible to receive their mail in this manner, while couriers on rural mail routes were also required to sell postage stamps and take applications, and accept money, for money orders and postal notes. The result has been an increase in the number of rural routes from approximately 900 in 1912 to 4,329 in 1933, having 236,380 mail boxes as against approximately 25,000 in 1912. The establishment of these routes has been an important factor in the amelioration of the conditions of Canadian rural life.

**Statistics.\***—Tables 79 to 81 show the numbers of post offices in operation in Canada in the latest six years, the gross revenue in each office collecting \$10,000 and upwards in 1933 and 1934, and the net revenues and expenditures of the Department in various years since 1890.

\*Revised as to financial transactions by H. E. Atwater, Financial Superintendent, Post Office Department.

<sup>1</sup> "Net Revenue" is exclusive of salaries and allowances to postmasters and some other smaller items. The gross revenue in the fiscal year 1933 was \$36,891,968 and in 1934, \$36,352,253.

**Auxiliary Services.**—The auxiliary postal services—the issuing of money orders (including postal notes) and the facilities offered by the Post Office savings banks—have expanded enormously since Confederation. In 1868, there were 515 money order offices in operation, issuing orders to an amount of \$3,342,574. In 1934 the number of offices had increased to 6,464. In the following tables, illustrating the use of money orders and postal notes, it will also be noticed that the large number of 12,633,710 money orders, representing a value of \$107,471,321, was issued during 1934. The number of postal notes received and paid was 5,115,761, with a value of \$9,247,459. Statistical tables showing deposits with the Government savings banks since Confederation and the business of the Post Office savings banks, 1929-34, are included in the chapter on Currency and Banking, (Chapter XXII).

**82.—Operations of the Money Order System in Canada, fiscal years ended Mar. 31, 1911-34.**

NOTE.—For 1868 to 1910, see Canada Year Book, 1911, p. 289. For 1901-10, see 1932 Year Book, p. 622.

| Total value, including postage and postal note stamps affixed..... \$ | 15,578,489         | 14,681,376         | 12,629,304         | 10,530,490         | 9,247,459          |

**Postage Stamps.**—The value of the postage stamps, post cards, etc., sold during each of the latest seven fiscal years, was: \$26,200,776 in 1928, \$26,475,541 in 1929, \$27,101,353 in 1930, \$25,769,781 in 1931, \$27,242,715 in 1932, \$25,999,159

in 1933 and \$25,541,129 in 1934. Receipts from postage paid in cash were as follows: \$7,467,611 in 1928, \$8,410,255 in 1929, \$9,045,805 in 1930, \$8,887,322 in 1931, \$9,078,136 in 1932, \$8,173,950 in 1933 and \$8,129,387 in 1934.

**Air-Mail Services.**—The total poundage of mail carried by air throughout Canada during the year ended Mar. 31, 1934 was 592,758 lb., an increase of 30 p.c. over the previous year, while the mileage flown showed an increase of approximately 10 p.c.

An interesting feature of the returns is the volume of mail carried by air into the several mining districts, and there would seem to be little doubt that aerial postal communication contributes materially to the development of Canada's natural resources.

**84.—Mileage Flown and Weight of Mails Carried by Air, fiscal year ended Mar. 31, 1934.**

**Subsidies, etc.**—The conveyance of mail by land, water and air entailed a total expenditure of \$13,140,593 during the fiscal year ended 1934. Land transportation (largely that by rural delivery) cost \$6,097,562, railway carriage cost \$6,557,541, conveyance by steamship cost \$270,600, while that by air cost \$214,890. These amounts were paid solely for services rendered as carriers. In addition, however, considerable mail is carried, on both the Atlantic and Pacific coasts, by steamships and steamship lines which are especially subsidized by the Government. Table 85, showing amounts so paid in 1932, 1933 and 1934, follows.

**85.—Mail Subsidies and Steamship Subventions, fiscal years ended Mar. 31, 1932-34.**

NOTE.—The figures in the following table were supplied by F. E. Bawden, Esq., Director of Steamship Subsidies, Department of Trade and Commerce. They appear annually in the Annual Report of the Auditor General and represent the amounts paid in connection with contracts made under statutory authority by the Department of Trade and Commerce for trade services, including the conveyance of mails.

## CHAPTER XIX.—LABOUR AND WAGES.\*

### PART 1.—LABOUR.

#### Section 1.—Occupations of the People.

The occupations of the people of a country are, at any given time, mainly determined by its natural resources and the stage which has been reached in their development. The outstanding characteristics of Canada are its enormous extent, its immense natural resources and the comparatively slight development of these, only the resources of the southern portions being as yet at all well-known. The developed areas fall into four economic units with quite distinct physical characteristics: first, the Maritime Provinces, where lands, forests, mines and fisheries are the chief natural resources; secondly, Ontario and Quebec, with lands, forests, mines and abundant water power for manufacturing purposes; thirdly, the Prairie Provinces, where the land is the chief natural resource, except in Alberta which contains immense coal deposits; lastly, British Columbia, with fisheries, forests and mines, where agriculture plays a comparatively minor part. When the country as a whole is considered, the immense fertile areas of arable land must be considered as its chief natural resource, but in different parts of its vast expanse other resources predominate and give the key to the chief occupations of the people.

In Canada, as in other new countries, the labouring population (using the term in its widest sense) bears a larger proportion to the total than is the case in older civilizations where there exists more realized wealth. In addition to our native-born workers, great numbers of young males and smaller numbers of females, who have nothing to sell but their personal services, have, in the past, immigrated from older countries to Canada to find here a better market for their labour. Thus both the sex distribution and the age distribution of the population of Canada is rendered somewhat abnormal, an unusually large percentage of that population being of working age and of the male sex—that is, of the sex which is most generally gainfully employed.†

A gainful occupation for census purposes is an occupation by which the person who pursues it earns money or money equivalent, or in which he assists in the production of marketable goods. Children working at home or women doing housework in their own homes without wages, and having no other employment, were not included among the gainfully employed. A person who happened to be idle or unemployed at the date of the census was enumerated as of the occupation usually followed when employed, or of the occupation in which last regularly employed.

The gainfully occupied, as defined above, recorded in the Census of 1931 are presented in the tables which follow under two different classifications, *i.e.*, by occupations in Table 1 and by industries in Table 2. The differences in these classifications are explained in the introductions to the tables.

**The Labour Force of Canada in 1931.**—In 1931, out of a total population 10 years of age and over in the nine provinces of 8,159,059 over (including 3,668 of unstated ages), 3,927,591 or 48·1 p.c. were gainfully occupied, as compared with 3,173,169 or 47·5 p.c. in 1921, 2,723,634 or 49·4 p.c. in 1911, 43·9 p.c. in 1901 and 44·5 p.c. in 1891.

\* The sections and subsections of this chapter, with the exceptions of Sections 1, 3, 7 and Section 9, Subsections 3 and 5, all of Part I and Section 4 of Part II, have been revised by, or under the direction of, W. M. Dickson, Deputy Minister, Department of Labour, Ottawa. The information in Section 3, Part I, has been obtained through the courtesy of the Provincial Departments of Labour or Bureaus of Labour, and that in Section 7, Part I, has been revised by the chairmen of the respective provincial Workmen's Compensation Boards. The remaining sections have been prepared in the Dominion Bureau of Statistics.

† On the sex distribution of the population, see pp. 111-113; on the age distribution, see pp. 117-120.

**Male Labour in 1931.**—Of the male population in the nine provinces 10 years of age and over in 1931 (4,252,537) 3,261,570 or 76·6 p.c. were gainfully occupied, as compared with 2,683,019 or 77·5 p.c. in 1921, 2,358,813 or 79·5 p.c. in 1911, 74·2 p.c. in 1901 and 76·6 p.c. in 1891. Thus the latest census shows a decrease in the proportion of males gainfully occupied, a decrease probably due partly to a later age at school leaving, partly to a change in the age distribution of the male population 10 years of age and over, a larger percentage of the total being at relatively advanced ages, and a smaller percentage in the younger groups. For example, 5·5 p.c. of the males of Canada were over 65 years of age in 1931 as compared with 4·7 p.c. in 1921.

**Female Labour in 1931.**—Of the female population of 10 years and over in the nine provinces, numbering altogether 3,906,522 in 1931, 666,021 or 17·1 p.c. were then gainfully occupied, as compared with 490,150 or 15·3 p.c. in 1921, 364,821 or 14·3 p.c. in 1911, 12·0 p.c. in 1901 and 11·1 p.c. in 1891. Thus the tendency for women to go increasingly into gainful occupations, which has been noticeable since 1891, continues.

**Occupational Classification.**—The classification of occupations was based upon the principle of the material worked on, the process performed and type of service rendered, while degree of skill was also taken into account. The detailed classification, which is given in full detail by provinces in Bulletin XXXI, Census of 1931, provides readily for a combination of occupations into more comprehensive occupational groups.

It was considered to be more useful to group all the building trades together under Construction rather than to assign some to other groups. For example, the occupation "carpenters" might have been included under Wood Products and "plumbers, gasfitters, steamfitters" under Metal Products. The arrangement endeavours to provide as convenient a grouping of occupations as possible without seriously departing from the principle of assigning certain occupations to specific groups. Clerical occupations which can hardly be included under one occupational division more than another are shown in a separate group. The occupation "labourer" is not included in any of the groups except the primary ones—"agricultural", "mining", and "logging". In the "logging" group the labourers have been included in "lumbermen". "Labourers" in all but the primary industries were classified in a residuary occupation "labourers and unskilled workers (not agricultural, mining or logging)". No attempt was made to classify them occupationally because it was felt that the labourer in an automobile factory, for example, is not necessarily following a metal-working occupation or a labourer in a store, a commercial one.

<sup>1</sup> Group totals include other occupations not specified.

<sup>2</sup> Farm labourers composed 82.2 p.c. of those receiving no pay. These were largely farmers' sons.

**Industrial Classification.**—The above occupational classification of the gainfully occupied differs from the industrial classification (Table 2) in that, in Table 1, all persons following occupations similar in nature come under the same occupational group irrespective of the industry in which employed, whereas in Table 2 persons in the same occupation may appear under several industrial groups, and any one industrial group may be made up of quite diverse occupations. For example, under "manufacturing", as an occupational group, are included only such occupations as are concerned with the making of some product, and each of these occupational classes contains every person following the occupation whether employed in factory or elsewhere. On the other hand, the group or division "manufacturing", in the industrial classification, includes occupations commercial, clerical, professional, etc., in their nature, as well as those directly connected with the making of various products, but only persons actually employed in factories come under this group. In other words, all machinists, all blacksmiths, in fact all persons following processing occupations, whether employed in factories or elsewhere, are included under the occupational group "manufacturing" in Table 1, while the industry group "manufacturing" in Table 2 includes machinists and blacksmiths working in factories only, also persons following such occupations as clerks, civil engineers, truck drivers, etc., who were employed by manufacturing concerns.
